ANNUAL REPORT FOR THE YEAR ENDED 30 JUNE 2010

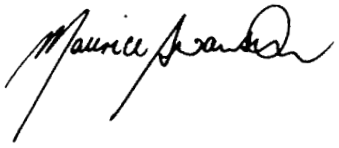
Hon Minister for Health

In accordance with Section 61 of the Financial Management Act 2006, we hereby submit for your information and presentation to the Parliament of Western Australia, the Annual Report of the Western Australian Health Promotion Foundation (Healthway) for the financial year ended 30 June 2010.

The Annual Report has been prepared in accordance with the provisions of the Financial Management Act 2006 and other legislative requirements.

The Western Australian Health Promotion Foundation is constituted under the authority of the Tobacco Products Control Act 2006.

Assoc Prof Rosanna Capolingua
Chairperson



Maurice Swanson
Deputy Chairperson

WHO WE ARE

Healthway seeks to promote and support healthy lifestyles to reduce the burden of preventable disease in Western Australia.

Healthway (the Western Australian Health Promotion Foundation) was established in 1991 under Section 15 of the Tobacco Control Act 1990 as an independent statutory body reporting to the Minister for Health. Healthway now functions under Part 5 of the Tobacco Products Control Act 2006.

Healthway provides sponsorship to sports, arts, and racing organisations to promote healthy messages, facilitate healthy environments and increase participation in healthy activities. Healthway also provides grants to a diverse array of organisations to encourage healthy lifestyles and advance health promotion programs.

The key priorities for Healthway are reducing harm from tobacco, reducing harm from alcohol, reducing obesity and promoting good mental health.

OUR VISION

A Healthy WA

OUR MISSION

To improve the health of Western Australians by:

- promoting and facilitating healthier lifestyles, policies and environments; and
- empowering individuals, groups and communities to be healthier.

Healthway's Strategic Plan 2008-2011 provides the overall directions for Healthway's work, but Healthway operates within a dynamic environment and must to some extent be responsive to issues and changing priorities at a national and international level, where these impact on health in WA.

Following extensive national consultations the Australian Government's National Preventative Health Taskforce (NPHTF) published its landmark National Preventative Health Strategy in September 2009. The strategy sets out a detailed set of recommendations for action, which if implemented, would aim to make Australia the healthiest nation by 2020. These recommendations focus on halting and reversing the rise in overweight and obesity; reducing the prevalence of daily smoking to 10% or less; reducing the proportion of Australians who drink at short-term risky/high-risk levels to 14% and the proportion who drink at long-term risky/high-risk levels to 7%; and contributing to the 'Close the Gap' target for Indigenous people.

In February 2010, the Board of Healthway formally accepted the NPHTF strategy recommendations as a set of principles for Healthway's work that are consistent with the Strategic Plan 2008-2011.

The growing obesity epidemic impacts significantly on the health of Western Australians and therefore the work of Healthway. The prevalence of overweight and obesity has been increasing significantly over the past two decades, with data from the 2007/08 National Health Survey2 reporting that 62% of Australians are now considered overweight or obese. Further, prevalence is higher among certain population sub-groups, including those who are socio-economically disadvantaged and Aboriginal and Torres Strait Islander peoples. These data reaffirm Healthway's need to focus on the priority areas of physical activity and nutrition, and target populations such as Aboriginal and socio-economically disadvantaged groups.

Behaviours such as physical activity and nutrition which are central to the obesity epidemic, are strongly influenced by environmental factors. There is now growing evidence to support the notion that children's food choices and dietary habits are influenced by advertising3. This has led the World Health Organization to conclude a probable causal link between unhealthy food advertising and overweight and obesity4. Targeting the policy environment through decreasing children's exposure to junk food advertising, via television or other non-broadcast mediums, is a crucial step in enabling children to make healthier food choices. It is also a strategy which is likely to have a considerable public health impact, as television in particular has significant reach within Australia. Similarly, the provision of smoke free environments is considered an important population level tobacco control strategy, with recent legislation further restricting smoking in public spaces.

There appears to be considerable public support for policy and other structural changes to encourage healthy environments. Recent studies on parents' perceptions of television food advertising aimed at children showed parents supported restrictions around television advertising and better enforcement of existing regulations5,6, and increased healthy food advertising to children5. Similarly, research by the Health Promotion Evaluation Unit at the University of Western Australia provides evidence of Western Australians' support for healthier food choices and a smoke free environment at the Perth Royal Show7. Two thirds (67%) of people agreed with the Royal Show going entirely smoke free in 2009. Most (82%) indicated their attendance would not change if the show was smoke free and 8% indicated their attendance would increase. The vast majority (81%) of people agreed with increasing the number of healthy food options at the show. Results such as these are encouraging as they indicate that the general public in Western Australia is supportive of healthy environmental changes.

The evidence base around, and the substantial public support for healthier environments presents Healthway with a fantastic opportunity to continue to facilitate the development of health promoting environments. New initiatives introduced

for the first time in 2009/10, such as the co-sponsorship policy, the 100% smoke-free policy, structural reform and venue sponsorships, will enhance Healthway's existing funding and sponsorship programs, to create sustainable health promotion benefits.

Board Members

Membership of the Board of Healthway is set out under section 61 of the Tobacco Products Control Act 2006.

Under the Act, the Board consists of 11 members of whom one is to be the chairperson appointed by the Minister for Health on the nomination of the Premier.

The remaining 10 members of the Board are appointed by the Minister for Health on the nomination of stakeholder groups, or are the CEOs of specified Government Departments or their nominees.

On June 30 2010, the members of the Board were:

ASSOCIATE PROFESSOR ROSANNA CAPOLINGUA

Chairperson

Associate Professor Capolingua joined the Board of Healthway as the nominee of the Australian Medical Association (WA) in 2000 and was appointed Chairperson in 2009.

Dr Capolingua has played an active leadership role within the medical profession and she has a keen interest and extensive experience in community health and effective governance of public and private organisations.

She has been a general practitioner in Perth for more than 20 years and is principal of her own successful medical practice. During this time, she served two terms as State AMA President and two terms as AMA National President where she chaired the AMA Ethics and Medico Legal Committee and the Taskforce on Indigenous Health.

She is a member of the Council and Board of the Medical Defence Association, the Board of St John of God Healthcare, the University of WA's Raine Foundation, Health Training Australia and the Board of Governors of the University of Notre Dame.

Dr Capolingua is a former member of two National Health and Medical Research Council advisory bodies, has served on the Medical Board of WA, has chaired the Australian Publishing Company and is a former Board member of MercyCare.

As Medical Director of the AMA (WA) Youth Foundation, Dr Capolingua is the driving force behind the Dr Yes and Youth Friendly Doctor programs which have helped more than 90,000 high school children deal with issues such as sexual health, mental health, drugs and alcohol.

MAURICE SWANSON

Deputy Chairperson

Mr Swanson was appointed to the Board as the nominee of The Australian Council on Smoking and Health (ACOSH).

He is currently Chief Executive of the Heart Foundation (WA Division) and prior to joining the Heart Foundation in 1998, he was Director, Health Promotion Services with the Health Department of WA.

Mr Swanson has considerable experience in management and the delivery of health promotion programs, public relations and media advocacy. His main areas of interest in health promotion are tobacco control and the prevention of cardiovascular disease.

Mr Swanson has been a member of ACOSH since 1983 and is also the executive officer of the National Heart Foundation's Tobacco Control Committee, a member of the Board of Action on Smoking and Health (ASH) and a member of the Cancer Council of Australia's Tobacco Issues Committee.

MIKE ALLENBY

Mr Allenby was appointed to the Board as the nominee of the WA Sports Federation (WASF).

He has a keen interest and involvement in sport. He was Chief Executive Officer of the WA Cricket Association from 1998 to 2001 and has been a board member of WASF since 1998 and is currently chairperson of the WASF Board. His personal sporting interests include soccer, cricket and golf.

Mr Allenby is Chairman of a chemical engineering consultancy company in Perth, is director of a Malaysian water treatment company and has held management roles in private companies in Australia and in the United States. Mr Allenby has a special interest in governance in business and in not for profit organisations. He is a Fellow of the Australian Institute of Management as well as Fellow of the Institute of Company Directors with a BSc in Chemistry.

WALTER BARRETT

Mr Barrett was appointed to the Board as the nominee of the WA Local Government Association (WALGA).

Since 1994, he has been an elected councillor on the Shire of Murray and is the Deputy Shire President.

He served as a police officer in Western Australia for 34 years and after retiring as a First Class Sergeant in 1993, Mr Barrett became very involved in local government and community health.

He is a member of the Shire of Murray's Corporate Services, Technical Services and the Planning and Development Committees, the Local Government Reform Committee, and Rivers Regional Council. He represents the Peel Zone on WALGA's State Council and is a member of the Municipal Waste Advisory Committee and the Finance and Planning Committees of WALGA..

Mr Barrett has been a part time investigator with the Health Department of WA's Smoking and Health Program Team helping to ensure retailers comply with the Tobacco Control Act, now the Tobacco Products Control Act. He is also a member of the Australian Institute of Company Directors.

CLINICAL PROFESSOR GARY GEELHOED

Dr Geelhoed was appointed to the Board as the nominee of the Australian Medical Association (WA).

He is a medical expert on child health, a paediatrician and Director of Princess Margaret Hospital for Children's Emergency Department since 1990.

He is also involved in medical research on many areas of children's health and has contributed to medical textbooks including the Encyclopaedia of Respiratory Medicine and the Textbook of Paediatric Emergency Medicine.

Dr Geelhoed is the immediate past State President of the AMA (WA) and is a member of the AMA's Federal Council.

As AMA (WA) President, Dr Geelhoed was a strong advocate for public health and campaigned strongly to encourage local councils to introduce smoking bans in alfresco dining areas.

His successful campaign to encourage Subiaco City Council to reverse its policy on smoking led to the AMA (WA) winning the 2009 Public Health Award presented by the Federal AMA.

Dr Geelhoed worked for many years with Princess Margaret Hospital's Child Protection Unit Committee and has chaired the State Trauma Advisory Committee.

MARGARET DAWKINS

Ms Dawkins was appointed to the Board as the representative of the Department for Communities' Office for Youth.

She is Acting Executive Director, Policy and Planning, which incorporates youth and children's policy as part of the Department's broader policy portfolio. Ms Dawkins has many years of experience in strategic administration in the public sector in policy areas including child abuse and children in care, volunteering, seniors, carers, youth and women.

She is a current member of the State Government's Drug and Alcohol Senior Officers Group, Crime Prevention Senior Officer's Group and the Community Services Policy Directors Group supporting the Human Services Directors General. In a previous role as Director of Strategic Planning, Ms Dawkins developed a strategic framework for the new Department for Communities and oversaw the implementation of the State Government's election commitments for seniors.

Ms Dawkins has previously headed the Office for Seniors Interests and the State Government's Volunteering Secretariat. She originally trained as a psychologist and teacher and has worked as both a practitioner and in research and evaluation in the child abuse and broader social welfare areas.

CATHCART WEATHERLY

Mr Weatherly was appointed to the Board as the nominee of the WA Arts Federation.

He has a passionate interest in the arts, culture and social justice issues.

Originally from Tasmania, he moved to Western Australia in the 1990's and, in 1996, was appointed founding Executive Director of the Community Housing Coalition of WA – the peak representative body for non-government, not-for-profit housing providers. In that role he was a member of many state and national committees including a three year term as Chairperson of the Community Housing Federation of Australia and a Board member of the WA Council of Social Service (WACOSS).

In 2001, he served on the State Government's State Homelessness Task Force which inquired into and proposed an action plan for resolving the issue of homelessness in WA.

Since 2005, Mr Weatherly has been General Manager of the Spare Parts Puppet Theatre in Fremantle. He is also Chairperson of the WA Professional Performing Arts Companies Association, a Board member of the WA Arts Federation and the newly formed Performing Arts Touring Alliance. Most recently, he was appointed to the new Live Performance Australia Policy Committee.

JENNIFER RIATTI

Ms Riatti was appointed to the Board as the representative of the Department of Sport and Recreation (DSR) where she is Director, Programs and Services.

Ms Riatti has a wealth of experience working with government at state and national level on a wide range of community issues.

Prior to joining the staff of DSR, Ms Riatti was Manager of the Premier's Physical Activity Taskforce from 2002 to 2008 within the Department of Premier and Cabinet and later at DSR.

She previously worked at the Department of Immigration and Ethnic Affairs and the Department of Employment, Education and Training in Canberra.

Ms Riatti was also Coordinator of the implementation of the National Collaborative Adult English Language, Literacy and Numeracy Strategy.

Between 1997 and 2002, Ms Riatti was Portfolio Manager, Vocational Education and Training Programs within Commercial and International Operations at West Coast College of TAFE.

COLIN WALKER

Mr Walker was appointed to the Board as the representative of the Department of Culture and the Arts. He is the Director of the Department's Cultural Development and Strategic Programs.

Mr Walker is a senior arts manager with extensive experience and networks in the private, not for profit arts and government sectors.

Prior to joining the Department in 2006, Mr Walker was Director, Arts & Business West Midlands in Birmingham in the UK and Head of International Development Arts & Business in London.

He has acted as an arts sponsorship consultant to a range of international brands and many of the most recognisible arts institutions in the UK.

In his current role with the Department of Culture and the Arts, Mr Walker is responsible for developing and implementing the Department's policies relating to Indigenous arts, young people and the arts, the collections sector, international, urban planning, public art, digital arts, research, arts in health and arts in education. He is Chair of the Urban Art sub-committee of the State Graffiti Taskforce.

ANDREW WATT

Mr Watt was appointed to the Board as the nominee of the Australian Council for Health, Physical Education and Recreation WA (ACHPER), an organisation of which he is Vice President.

He is Regional Manager of Creating Communities Australia where he manages a range of community and economic development projects which involves working with key stakeholders across government, non-government, business and resource sectors to plan and activate towns and cities.

Mr Watt has previously held several positions with the Department of Education and Training including School Principal, Manager District Operations, Project Manager of Local Area Planning, Deputy Principal and teacher. Mr Watt was also the Primary Project Leader of the Be Active School and Community Project which was funded by Healthway.

DR TARUN WEERAMANTHRI

Dr Weeramanthri was appointed to the Board as the representative of the WA Department of Health in 2008. He is currently Executive Director Public Health and Chief Health Officer at the Department. After training as a general physician in WA from 1984 to1990, Dr Weeramanthri worked in the Northern Territory from 1991 to 2007, first in Aboriginal health research and then in public health and clinical medicine. After four years as Chief Health Officer in the NT, Dr Weeramanthri moved back to WA in 2008, where he now provides professional leadership and strategic advice to the Department of Health on public health issues

Chairman's Report

The past year has been both challenging and rewarding for Healthway.

Challenging, in so far that the people of Western Australian continue to carry a heavy burden from preventable chronic diseases attributable to smoking, unsafe consumption of alcohol and unacceptably high levels of obesity. Rewarding, in that we can look back on a number of new initiatives introduced over the past year which will reduce some of the drivers of unhealthy behaviors and lifestyles.

While adult smoking rates in WA fell to under 15% (the lowest of any Australian State) another challenge builds. As the number of smokers has decreased by more than a quarter over the past 15 years, the number of overweight or obese people has increased by more than 50 per cent in the same period.

The Western Australia Burden of Disease Study released in April 2010 revealed that obesity had, for the first time, surpassed tobacco use as the number one preventable cause of chronic disease, accounting for 8.7 per cent of all disease, ahead of 6.5 per cent for smoking.

Alarmingly, the balance of available evidence suggests the rates of overweight and obesity in Western Australia are continuing to increase. Of most concern is the fact that the rate of obesity in West Australian children is amongst the highest in the world.

At the same time, short term harm from alcohol consumption in Western Australia remains unacceptably high and places an enormous burden on families, hospitals, police, social services, and other emergency services. A strong culture of risky drinking continues to thrive in Western Australia and this contributes to a range of social problems such as crime, assaults, road trauma, domestic violence, family disruption and property damage.

In the face of these challenges Healthway has introduced new initiatives to reduce the drivers of these unhealthy behaviors and lifestyles.

Most significant of these has been the implementation of initiatives to reduce the harmful effects of alcohol and junk food promotion through sport, arts and racing organisations.

Alcohol sponsorship of community activities and events is a significant driver of increased alcohol consumption by young people and new drinkers. Alcohol sponsorship also creates and reinforces social norms associated with drinking at unsafe levels. As a consequence, the World Health Organisation and Australia's National Preventative Health Taskforce have recommended increased regulation or bans on alcohol sponsorship of community events. Likewise, there is now strong evidence that food advertising to children through mediums such as sponsorship and TV advertising affects children's food choices and drives unhealthy dietary habits.

In the absence of effective regulation of alcohol and junk food sponsorship, Healthway's approach to co-sponsorship has been revised to provide an incentive for Healthway-funded organisations to reconsider existing or potential partnerships with alcohol or junk food brands. Healthway sponsors over 600 community organisations each year.

Already we are seeing the positive effects of this approach to co-sponsorship. Many sporting organisations have either eliminated or substantially reduced alcohol or junk food promotions linked to their activities. The Perth Wildcats, West Coast Fever and Netball WA were early high-profile examples. These organisations terminated partnerships with alcohol and/or junk food companies over the past year and have committed to maintaining a healthy sponsorship portfolio. A large number of organisations have more recently followed this lead. This is great news for participants, spectators and the general public.

Healthway continued to recognise the positive contribution sports, arts and racing organisations to the WA community over the past year. Healthway's total investment in sponsorship of these organisations in 2009/10 was approximately $12 million. Healthway's approach to co-sponsorship will ensure the detrimental effects of alcohol or junk food promotion linked to the activities of sponsored organisations do not outweigh the substantial positive contributions these organisations offer to the community.

Healthway continues to develop new initiatives to challenge the social acceptance of smoking. A new partnership with the Perth Royal Show in September 2009 delivered the

largest smoke free community event in the world. The West Australian public embraced this reform, with Show attendance numbers the second highest on record. Perth Zoo entered into a partnership with Healthway in April 2010 which saw this iconic venue go 100% smoke-free for the first time in its 112 year history.

Together with legislative changes that introduce extended smoking bans across WA, these reforms protect all West Australians from the harmful effects of passive smoking and, more importantly, stimulate public debate around the social unacceptability of smoking.

Healthway has a responsibility to the tax payers of WA to direct its funds to improving the health of Western Australians. We look forward to continuing our endeavors with this goal in mind and together in our relationships with community groups generate positive healthy changes for our community.

In closing I would like to thank my fellow Healthway Board members for their hard work and dedication over the past year. I would particularly like to thank my predecessor Ms. Jenn Morris, whose term as Chairperson concluded in late 2009. My thanks also goes to the dedicated staff of Healthway who share our commitment to a healthier WA.

‘Healthway’s approach to co-sponsorship will ensure the detrimental effects of alcohol or junk food promotion linked to the activities of sponsored organisations do not outweigh the substantial positive contributions these organisations offer to the community.’

Assoc Prof Rosanna Capolingua
Chairperson

Executive Director's Report

The 2009/10 year was most notable for the major reforms undertaken on the Healthway sponsorship program.

Healthway has a long history of involvement in sponsorship, having invested over $186 million into sponsorship of the arts, sport and racing sectors in WA since its inception in 1991. The sponsorship program continued to be the principal program through which health promotion funding is delivered in the 2009/10 year, with a further investment by Healthway of $12 million in community sponsorships.

Healthway sponsorship of community activities and events has delivered substantial returns for the WA public. Preventable chronic diseases place an enormous burden on the WA public and health promotion is a powerful and effective tool to reduce this burden. Independent evaluation of the Healthway sponsorship program has demonstrated the effectiveness of sponsorship as a strategy to promote health messages leading to self-reported behaviour change. Furthermore, economic modeling has shown the financial returns from health promotion efforts can be as high as a $50 reduction in costs for every $1 invested.

As sponsorship markets, community expectations and the drivers of preventable disease change over time, so Healthway's sponsorship program must also evolve. A review of the sponsorship program in mid 2009 identified several areas for improvement and the implementation of these reforms was a major focus during the past year.

Standardised and more objective assessment criteria were developed and applied to all sponsorship portfolios; a new framework was introduced to provide applicants with the opportunity to self-select different sponsorship objectives; contracts were reviewed to better align funding, support and evaluation mechanisms of best fit to different sponsorship categories; and the burden of compliance and reporting was substantially reduced for smaller sponsorships.

A key objective of the Healthway sponsorship program is to reduce the promotion of unhealthy messages or brands where possible. Unlike tobacco advertising, which was banned in Western Australia in 1990, there are no comprehensive bans or statutory restrictions on alcohol or junk food advertising through sponsorship in Australia. Given the compelling evidence linking alcohol and junk food promotions with increased alcohol consumption in young people, and poor dietary habits in children respectively, Healthway is compelled to scrutinise the alcohol and junk food sponsorships of all organisations applying for Healthway funding.

Of particular concern is the growing body of evidence linking alcohol advertising with increased alcohol consumption in young people. In the light of this evidence both the World Health Organisation and Australia's National Preventative Health Taskforce have recommended bans or increased regulation of alcohol marketing through sponsorship of sport and cultural events.

Under the new approach to co-sponsorship Healthway undertakes a risk assessment on all co-sponsorship arrangements to determine the extent to which they contribute to harm from alcohol or obesity. Generally, Healthway is only concerned with alcohol or junk food sponsorship arrangements assessed as high risk. As expected, the co-sponsorship policy has had a material bearing on only a small percentage of applications. No sponsorship application has been rejected outright on the basis of co-sponsorship concerns at the time of writing this report, and only a relatively small percentage (approximately 15%) of all sponsorship offers have been made subject to supplementary conditions relating to unhealthy sponsors. Importantly, Healthway's overall investment in sponsorship will not decrease as a consequence of the revised approach to co-sponsorship.

A number of other major new initiatives were also commenced in 2009/10. Through the health promotion grants program Healthway launched a new $600,000 Community Alcohol Grants initiative in partnership with the Drug and Alcohol Office and the Department of Health. These grants offer support for locally focused activities to reduce alcohol-related harm, with a priority focus on regional and remote WA and on Aboriginal communities.

Throughout 2009/10 Healthway continued a range of initiatives to build the capacity of the health promotion sector and contribute to the important evidence base underpinning the

field of health promotion. Healthway awarded two new 5-year Research into Practice Grants to support high quality research in health promotion through to the translation stage. These inaugural grants were awarded to teams at the University of WA and Edith Cowan University. Healthway was also pleased to award two Indigenous Research Training Scholarships for the first time in 2009/10. Finally, in 2009/10 Healthway announced a new special five-year research initiative focusing on reducing harm from alcohol, to be awarded in 2010/11.

Healthway's ongoing support for research mirrors the emphasis placed on the evidence-base underpinning funding decisions and operational policies, such as those applicable to sponsored groups. Projects funded by Healthway will continue to be either evidence-based, or supported by appropriate evaluation mechanisms to ensure they are 'evidence- building'.

In closing I would like to acknowledge the commitment and invaluable guidance of our Board members and advisory committee members. I would especially like to acknowledge the hard work and dedication of the Healthway staff team.

'Independent evaluation of the Healthway sponsorship program has demonstrated the effectiveness of sponsorship as a strategy to promote health messages leading to self-reported behaviour change.'

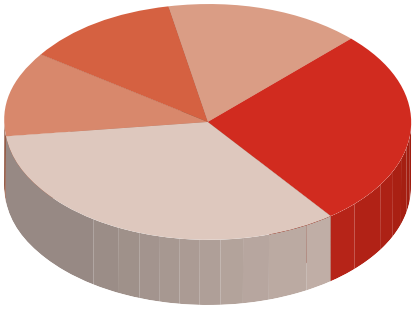
Healthway's strategic framework 2008-2011 focuses on four priority areas and is guided by four overarching themes.

The priority areas are reducing harm from tobacco, reducing harm from alcohol, preventing overweight and obesity and promoting good mental health. The overarching themes to the strategic framework are reducing inequalities, building and using the evidence, sustainable change, and investment in the future.

PERFORMANCE IN HIGH PRIORITY HEALTH AREAS

The highest priority health issues in Healthway's 2008-2011 Strategic Plan are reducing harm from tobacco and alcohol, preventing overweight and obesity, and promoting mental health and wellbeing. In 2009/10, more than 84% of Healthway funding across all program areas was allocated to these high priority health issues.

Percentage of Healthway funding in 2009/10 allocated to high priority health issues (across all program areas)



- Tobacco Smoking Control **27.36%**
- Overweight and Obesity Prevention **33.29%**
- Alcohol and Other Drug Missuse **11.81%**
- Mental Health Promotion **12.11%**
- Other Health Issues **15.43%**

Reducing harm from tobacco

Tobacco smoking kills around 1,200 west Australians annually and remains a significant health challenge for the community. Healthway plays a significant role in further reducing smoking in public places and limiting exposure to tobacco products through its health promotion grants and sponsorship program. In 2009/10 Healthway allocated more than a quarter (27.36%) of its total budget for grants and sponsorships to tobacco control initiatives, a similar percentage to the previous year.

Healthway introduced its new Venue Sponsorship during 2009/10, which enabled the organisation to support a number of significant events and organisations for the purpose of introducing structural reforms including smoke-free outdoor policies. These included the Australia Day Family Zone on the South Perth foreshore, a series of summer music concerts in Kings Park, and the Perth Zoo.

An increasing number of Healthway sponsorships were conditional on events being entirely smoke-free in 2009/10. This was in the lead-up to the introduction of a new condition of sponsorship that all indoor and outdoor areas under the control of the sponsored organisation must be smoke-free, which came into force on 1 July 2010. A highlight in 2009/10 was the sponsorship through the Arts program of the Royal Agricultural Society for the 2009 Smoke-free WA Royal Show, which attracted a record number of visitors and positive community feedback on the smoke-free policy. In the sport and racing area, smoking restrictions were expanded at the junior football club level to include a total smoking ban in any area where Auskick activities take place.

Healthway continued to be a significant funder of major WA tobacco control projects and campaigns in 2009/10. During the year, funding was renewed for the Cancer Council of WA's (TCCWA) Make Smoking History project, which is co-funded with TCCWA and the WA Department of Health, and which celebrated its 10 year anniversary in 2010. Healthway funding was also renewed for the Heart Foundation's highly successful youth-focused "Smarter than Smoking" project. Funding continued for the Aboriginal Health Council of WA "Beyond the Big Smoke" project, and the Australian Council on Smoking and Health (ACOSH), which plays a major role in driving the agenda for tobacco control in WA.

Reducing harm from alcohol

The burden of chronic disease attributable to alcohol related problems is increasing and current patterns of alcohol consumption, particularly among young people, represent a greater risk to health compared with 20 years ago. Consequently, Healthway has increased its focus and investment on reducing harm from alcohol in the current strategic period. In 2009/10, Healthway allocated 11.8% of its total budget to grants and sponsorships addressing alcohol and other drugs misuse, higher than in previous years.

Healthway also allocated 26.19% of its sponsorship budget to promoting alcohol and other drugs messages in 2009/10, a significant increase compared with 2008/09 (14%). This included a partnership with the Drug and Alcohol Office and the WA Department of Health to establish a Community Alcohol Grants program offering funding for health promotion and prevention initiatives to reduce harm from alcohol at the community level. The grants were promoted from January 2010 and in the first six months at least seven proposals were either funded, under assessment or in development. In addition, Healthway advertised a new special initiative 5-year alcohol research grant in 2009/10 that will be funded from the 2010/11 budget. This attracted four expressions of interest and two of these were shortlisted for full applications.

In the Sport program, the Alcohol Think Again message received considerable exposure during the year as the principal sponsor of the West Coast Fever netball team and as a consequence of the Perth Wildcats winning the National Basketball League Grand Final. In the Arts area, the Boyup Brook Country Music Festival was sponsored to promote Alcohol Think Again message approximately 16,000 people, with presentation rights allocated to a number of high profile components of the weekend such as the Best New Talent Award. The event was hosted by the popular Ernie Dingo and local GWN presenter Shauna Wills, and showcased some of Australia's leading performers to successfully engage with young people, Indigenous groups and residents from the surrounding rural and regional communities.

Healthway's new co-sponsorship policy, introduced in 2009/10 will apply to all sponsorship contracts entered into from 1 July 2010 and is expected to significantly reduce the harmful effects of alcohol sponsorship on the WA community. The policy will also reduce the risk of Healthway objectives being undermined by alcohol promotions of at Healthway-sponsored events and activities.

Preventing overweight and obesity

Insufficient physical activity and the over-consumption of energy dense foods and drinks are the principal causes of excess body weight. Healthway therefore prioritises projects and sponsorships that encourage physical activity and promote healthy eating. In 2009/10 Healthway allocated almost one third of its total funding (32.29%) for projects and sponsorships aimed at preventing overweight and obesity, a similar percentage to 2008/09.

The sponsorship program has continued its focus on nutrition and physical activity during the year though sports such as basketball, gymnastics, athletics, baseball and equestrian. A naming rights sponsorship of the Australian Track and Field Championships, with extensive media coverage, provided further exposure of the Go For 2&5 message. During the report year Healthway also maintained the focus on working with the WA School Canteen Association and partner organisations to increase healthy food choices in food outlets. In particular, new Venue Sponsorships awarded to Perth Zoo and to Mellen Events for the Kings Park summer music concert series, included a major focus on increasing the range of healthy food choices available.

In the Arts program, both the Busselton Beach Festival and the Festival of Busselton were sponsored to promote the Be Active message through naming rights and other activities. Both events effectively combined resources to produce a program of coordinated activities reaching over 26,000 people.

Another significant development in 2009/10 was the introduction of Healthway's new co-sponsorship policy, which will significantly reduce the risk that Healthway objectives are undermined by promotions for unhealthy foods and drinks at Healthway-sponsored events and activities from 1 July 2010.

One of two inaugural five-year Research into Practice Grants awarded in 2009/10 was a major follow-up study of the internationally recognised RESIDE study by Billie Giles-Corti at the University of WA, to examine the long term impact of urban design and other environmental factors on residents' physical activity and eating behaviour. In addition, an innovative three year research project grant awarded to Associate Professor Deborah Kerr at Curtin University will investigate the use of mobile phone technology to motivate young people to eat healthier diets. Two Healthway Visiting Fellowships were awarded in 2010, both of which focused on obesity prevention.

Mental health promotion

Mental ill-health is a significant issue and the leading cause of the non-fatal burden of disease and injury, affecting around 19% of West Australians annually. Healthway is well placed to promote positive mental health through a wide range of community sport, arts and recreational activities. In 2009/10 Healthway allocated 12.11% of its project and sponsorship funding to projects promoting positive mental health, a small increase from the previous year.

2009/10 saw a continuing expansion of the Healthway-supported Mentally Healthy WA campaign, and Healthway funded over 50 sponsorships promoting the campaign's Act Belong Commit (ABC) health message. The ABC message was promoted primarily to young people through the Arts, particularly in the regional WA towns of Albany, Karratha, Esperance, Broome, Northam and Margaret River, and in the metropolitan area in Kwinana, Rockingham and Mandurah through programs presented by local government.

During the report period Healthway's investment in sporting projects promoting the Act Belong Commit message almost doubled. Sponsorship of a new community mass participation fun run organised by HBF resulted in extensive exposure of the ABC message as well as more than ten thousand participants completing the 4km and 14km courses.

The second of two inaugural five-year Research into Practice Grants awarded in 2009/10 was to Professor Donna Cross at Edith Cowan University. This major study will build on earlier research from this group to develop and evaluate an intervention to increase whole-of-school capacity to reduce aggression and bullying, aligned with the national Safe Schools Framework. In addition, five of the nine research Starter Grants awarded in 2009/10 address mental health issues.

REDUCING INEQUALITIES

Some groups in the population are at higher risk of poor health, or may have unhealthier lifestyles or behaviours. In 2009/10 Healthway continued to prioritise health promotion activities focusing on these groups, as well as supporting work to better understand how these groups can be supported to have healthy lifestyles. The high priority groups identified in the Healthway Strategic Plan 2008-2011 include Aboriginal people, rural and remote populations, economically, socially or educationally disadvantaged groups, and others experiencing inequalities. Children and young people remain an important target group for Healthway in the current strategic period, reflecting the evidence linking early childhood experiences and behaviours with lifelong patterns of health.

Increase the focus on promoting and improving health in population groups where health inequalities exist.

Healthway has a strong focus on allocating resources to supporting projects that reach high priority target groups. In 2009/10 Healthway allocated funds to high priority target groups across all its program areas as follows:

Projects and funding to high priority groups in 2009/10 across Healthway programs;

Priority group	% of total projects in 2009/10	% of total program budget in 2009/10
Indigenous people	22.52%	54.78%
Rural and remote populations	37.62%	62.28%
Children and Youth	86.44%	81.12%
Other disadvantaged groups *e.g. low income*	25.71%	61.09%

NB. This classification allows for multiple responses therefore the %'s in the table add to more than 100%

Healthway has refined its data collection systems in order to more accurately record the percentage of people from priority population groups reached through its programs. As a result however, the figures for 2009/10 are not comparable with previous years, which showed lower percentages. The table shows that in 2009/10, 22.52% of projects and 54.78% of funding was allocated to activities targeting indigenous people and 37.62% of projects and 62.28% of funding was allocated to activities targeting rural and remote populations. In addition, 86.44% of projects reached children and youth, with 81.12% of funding allocated to activities targeting this group, and 25.71% of projects targeted other disadvantaged groups such as people on low incomes and culturally and linguistically diverse groups, with 61.09% of funding allocated to activities that targeted these groups.

A new health promotion project, Alive and Kicking Goals, was funded during 2009/10 to the Broome Men's Outreach Services inc, and is training around 15 young indigenous men from the Broome Saints Football Club as peer educators to deliver suicide prevention workshops to indigenous young people in approximately 20 rural Kimberley communities. A grant awarded to the David Wirrpanda Foundation is establishing a new 'Dardi Girlz' program that will deliver education on healthy lifestyles and a range of important life-skills to around 40 teenage girls and their families in the Rockingham-Kwinana area.

In 2009/10 a range of Healthway sport sponsorships focused on increasing physical activity opportunities for people with Disabilities. Along with continued support of the WA Disabled Sport Association, Healthway's sponsorship of the Riding for the Disabled Association WA, Sailability WA and the Wheelchair Sports WA Association ensured there was strong promotion of the Be Active message and a wide variety of physical activity options available for people with a disability.

During the year Healthway also supported the IBEX Football Club's Ethio-Australian Football Tournament, Anglicare WA's 'Up and Running Health and Fitness Project' for at risk youth and the City of Wanneroo's CALD Fitness Program for women in the northern suburbs. The Royal Life Saving Society's Remote Aboriginal Communities Swimming Program was sponsored for the first time in 2009/10 and resulted in over 100 school aged participants from Yandeyarra, Jigalong, Bidyadanga, Warmun and Burringurrah participating in a structured lap swimming program. A key element of the program, which provided fruit as a reward, was the partnership building between the school, the local store and the swimming pool.

The Arts and Health Fellowship in 2009/10 was hosted by the Michael Leslie Foundation of the Performing Arts involving the highly respected theatre/health worker from the NiteStar Program in New York, Mr David Williams. Mr Williams undertook a comprehensive program of activities involving sexual education through theatre activities targeting at risk youth. He visited Karratha, Dampier, Geraldton, Mullewa, Kalgoorlie, Coolgardie, Narrogin and Albany and Broome and also conducted a program of activities in the metropolitan area.

Improve knowledge and understanding to address the determinants and modifiers of health inequalities.

Healthway's research program is making a major contribution to improving knowledge around inequalities in health. In 2009/10, Healthway funded a two year research project grant to Dr Simone Pettigrew at the University of Western Australia, to investigate factors that influence and contribute to children's health in low SES families. A particularly innovative aspect of the study is the involvement of low SES parents as "co-researchers" in the study, using participatory research methods.

A three-year research project grant awarded to Professor Billie Giles-Corti at UWA will investigate associations between the built environment and health across the life course, thus identifying aspects of neighbourhood design that may be contributing to inequalities. In addition, a Starter grant awarded to Dr Kate Riddell at the University of WA will evaluate the Michael Leslie Performing Arts program, which aims to maximise educational attainment, self-esteem, school retention and aspirations among indigenous young people. The study will therefore add to knowledge around how the arts can be used to address inequalities in health.

An indigenous Training Scholarships awarded to Leanne Pilkington at Curtin University will investigate participation in cervical and breast cancer screening and follow-up by indigenous women. The study offers the opportunity to address inequalities in this important group by improving understanding of the barriers to screening uptake.

Build awareness and support for groups who are experiencing inequalities.

In 2009/2010 Healthway staff and managers contributed to committees and seminars to promote Healthway's objectives and explain funding opportunities. Examples included regular attendance at meetings of the inter-agency Youth Funders Forum and membership of the Royal Agricultural Society's Open Art Committee. Healthway staff also contributed to interagency funding seminars in the outer Metropolitan area and to training for regional Mentally Healthy WA project officers, all of whom provide support and guidance to potential grant and sponsorship recipients in regional areas.

Healthway funding continued for the Healthway Regional Coordinator position in the Kimberley. Since the position commenced in 2006, there has been an almost three-fold increase in Healthway funding to the region. The Coordinator provides important support to prospective funding applicants in the Kimberley as well as running a small local grants scheme in order to respond quickly to the needs of the Indigenous community.

BUILDING & USING THE EVIDENCE

A key theme in the Healthway 2008-2011 Strategic Plan is contributing to and supporting work that adds to the evidence-base for health promotion. Healthway is well positioned to support strong research and projects to address gaps in current knowledge, particularly with respect to priority population groups.

Healthway is committed to resourcing innovative strategies for improving health and wellbeing in WA. This includes initiating ground-breaking health promotion programs, funding research and evaluation, and facilitating effective knowledge translation. Healthway is in a unique position to share and communicate the knowledge gained from research in health promotion to suitable audiences across its program portfolios of health, sport, arts and racing.

Focus on improving & increasing the translation of research findings into effective and sustainable policy and practice in health promotion.

A focus for Healthway in the current strategic period is on increasing the translation of research findings into effective and sustainable policy and practice. In 2009/10 Healthway continued to fund a trial Knowledge Transfer Manager position, based on the 2006 review of the Healthway Research Program, which identified potential strategies to strengthen the organisation's role in knowledge dissemination. Outputs from this position in 2009/10 included producing and disseminating ten case study brochures from successful Healthway funded health promotion projects and organising a major 'research into practice' seminar on childhood obesity in November 2009, which was attended by more than 90 delegates.

In addition, research seminars held in July and November 2008 focused on Healthway funded research and priority issues. The July seminar focused on women and children's health and included the 2009 Visiting Healthway Fellow Nancy Poole from British Columbia, and Visiting Research Committee Chair in 2009, Professor Liz Waters from the University of Melbourne. This seminar was also video-conferenced to regional WA.

The November seminar also showcased an innovative Healthway funded research grant to Professor Rob Donovan from Curtin University, who presented findings from his study on the elements of alcohol advertising that appeal to young people.

The work of the Health Promotion Evaluation Unit (HPEU) at UWA continues to make a major contribution to building the evidence for effective health promotion as well as informing Healthway's work. Studies completed during 2009/10 included the development and testing of a nutrition and environmental audit instrument for use with Healthway sponsorships, a survey on Rottnest Island of visitor attitudes to smoke-free policies and a public survey of the Australia Day Family Zone to measure public attitudes to topical health issues.

Continue to nurture quality research and evaluation in WA.

Healthway is committed to supporting high quality research in WA and in 2009/10 allocated approximately $2 million to research grants and scholarships, half of which was allocated to new projects. All major research grants undergo a comprehensive review process involving assessment by up to 4 independent experts from outside WA to ensure rigour and transparency of decision-making.

Healthway encourages new investigators to apply for Starter grants as a means of supporting and building research capacity in Western Australia, and received 22 applications for these grants in 2009/10, the highest number for several years. Of these, nine high quality studies were supported and all of the successful applications addressed high priority health issues and/or target groups for Healthway.

Healthway's continuing commitment to funding evaluation of health promotion and sport, arts and racing projects contributes significantly to the evidence base around health promotion and sponsorship.

SUSTAINABLE CHANGE

The effects of successful programs and interventions need to be sustained over time to achieve lasting improvements in the health of the community. All Healthway projects and programs aim to include sustainable outcomes as a key component, either in terms of behavioural, program or policy sustainability.

Behavioural sustainability refers to changes in awareness, knowledge or skills that continue beyond the end of the project or program. Program sustainability refers to activities being retained or integrated into those of another organisation beyond the end of the funded program and policy sustainability refers to the integration of changes into organisational policy such that the changes are integrated into the culture of the organisation.

The 2008-2011 strategic plan commits Healthway to building on sustainable approaches that have been proven in the past, such as creating supportive environments for health and working through partnerships.

Recognise and support the variety of ways sustainable change can be achieved across programs.

The major review of Healthway's sponsorship program during 2009/10 and implemented in the final quarter, introduced a set of minimum health policy requirements of all sponsored organisations, including completely smoke-free indoor and outdoor areas, free drinking water, provision of healthy food choices where food is served and low-alcohol options where alcohol is served. Previous evaluations have shown that once organisations introduce healthy environment policies, these are generally maintained by the organisation because of public popularity, even if the Healthway funding is only short term.

In recent years, Healthway has placed a major focus on improving the provision of healthy food and drink options in sponsored sport and recreation venues, through a partnership with the WA School Canteen Association (WASCA). This work continued in 2009/10 with four new major recreation/aquatic centres becoming involved in the project for the first time including one in regional WA. The project has disseminated more than 150 copies of its new 'Fuel to Go' resource to support organisations seeking to introduce healthy food and drinks options.

Behavioural sustainability in Healthway sponsorship projects is evaluated every two years using the HPEU series of audience surveys at sponsored events, the 'Sponsorship Monitor', which measures audience awareness, understanding, attitudes, intentions and behaviours in relation to health messages promoted at the events. The results from the 2008/09 Sponsorship Monitor show that 74% of people attending Healthway-sponsored events during the year were aware of the message promoted at the event and 9.8% reported a change in their behaviour as a result of exposure to the message at a previous event.

The Healthy Club program aims to achieve sustainable change by assisting sporting clubs to develop and implement health policies designed to create a healthy sporting environment. Sports Medicine Australia (WA Branch) continues to coordinate the program on behalf of Healthway and in 2009/10, 479 applications were received with 424 or 88% of these being successful. Approximately 86% of the successful Healthy Clubs reached children and youth, and 41% were based in regional or remote WA.

Advocacy is a key strategy in health promotion for achieving sustainable change through public policy measures. Funding continued in 2009/10 for the Public Health Advocacy Institute of WA (PHAIWA), and for the Australian Council on Smoking and Health.

INVESTING IN THE FUTURE - BUILDING HEALTH PROMOTION CAPACITY

Capacity building in health promotion is a critical strategy for improving the health of the population in a way that is sustainable, through developing skills and organisational structures, and through provision of resources.

The Healthway strategic plan for 2008-2011 identifies a commitment to increasing the capacity of the health promotion workforce in WA. This includes supporting the development of health promotion leaders, funding scholarships and facilitating collaborative partnerships between researchers, policy makers and practitioners. Healthway also recognises that capacity building should not be confined to the health promotion workforce and is committed to increasing health promotion leadership and literacy across sectors, Healthway stakeholder groups and at the community and individual levels.

Contribute to the development of an effective health promotion workforce in WA.

Healthway has maintained a commitment to building capacity for health promotion in WA for many years, by investing in workforce development through scholarships, fellowships, traineeships and other development opportunities. Healthway Health Promotion Graduate Scholarships and Fellowships offer funding for up to three years to support Masters, Doctoral and post-doctoral research in health promotion.

In 2009/10 Healthway funded two Health Promotion Graduate Scholarships and two Indigenous Research Training Scholarships. All the new researchers are conducting studies that address Healthway high priority health areas. Six of the nine Starter grants funded by Healthway in 2009/10 were awarded to new researchers, defined as 'junior' researchers who have not previously held major competitive research grants.

Two Healthway Visiting Fellowships were awarded in 2010, both of which focused on obesity prevention. The first supported a visit to WA by Dr Tim Lobstein from the International Association for the Study of Obesity and Dr Jane Landon from the UK National Heart Forum, and the second supported Professor Kim Raine from the University of Alberta in Canada. Both fellowships included collaborations with WA based researchers and practitioners, contributing to building capacity for effective interventions and policy to address overweight and obesity in WA.

The development and support of the next generation of health promotion leaders is another area in which Healthway has made a significant contribution. In 2009/10 funding was allocated to run a fourth Healthway Leadership Development in Health Promotion Program in 2010/2011. Since introducing the first program in 2003, 36 health professionals have completed leadership development training through the program, and around 25% are based in regional WA including 2 young indigenous people.

Workforce development also includes sharing and disseminating knowledge from funded programs. Healthway held three research seminars in 2009/10, attended by a total of more than 150 people, including several people in regional areas who accessed one of the seminars by videoconference.

Contribute to the development of health promotion skills in sectors outside health.

Healthway supports sponsored sport, arts and racing organisations to effectively implement strategies to promote healthy lifestyles through its relationship with sponsorship officers based in six health agencies in WA. During 2009/10 Healthway also contributed to a Smarter than Smoking workshop for sport development officers and to professional development for Mentally Healthy WA local staff, who include local government and community organisation staff as well as health professionals.

Healthway is one of the inaugural members of the International Network of Health Promotion Foundations, which has a role to share experiences internationally on effective programs and support the development of new Foundations. In 2009/10 Healthway continued to be funded by the Network to run the secretariat role, which has led to the development of strong international collaborations.

Develop and nurture the expertise of individuals and groups working within health promotion to ensure that high quality, innovative and effective health promotion work continues in WA.

During 2009/10 Healthway funding continued to the Australian Health Promotion Association WA Branch (AHPA-WA) for the highly successful Healthway/AHPA Graduate Scholarship and ATSI Traineeship programs. The scheme has supported around 35 graduates and more than 12 Aboriginal people to develop their careers in health promotion over the past 15 years.

In July 2009, 10 Smarter than Smoking Regional Arts Scholarships were offered to young people from all over WA to attend Propel Youth Arts ArtsCAMP where they were involved in a range of personal/professional development activities. Healthway also sponsored the devolved YCulture program, providing sponsorships to young people to develop and present their own arts activities and promoting the Drug Aware message. This program is managed by Propelarts in the metropolitan area and Country Arts WA in rural and remote areas.

Finally, in 2009/10 Healthway initiated capacity building scholarship schemes for regional people to attend three major conferences in WA, planned for the second half of 2010. These include the 18th Alcohol and Other Drugs Symposium in Fremantle, the National Health Promoting Schools Conference and the State PHA conference.

GOVERNMENT GOALS

State Building-Major Projects

Not applicable.

Financial & Economic Responsibility

In 2009/10 sponsorship reforms were developed and became effective from 1 July 2010. It is anticipated that this will generate more streamlined processes, implementing improved tools for assessing funding applications which will also enhance accountability and more structured performance based payments. These approaches will form part of a suite of reforms within the sponsorship program which will improve the returns on the public investment.

For further information refer to the Financial Statements within this report.

Outcomes Based Service Delivery

Healthway is focused on achieving results through sponsorship and health promotion grants and contracts the Health Promotion Evaluation Unit to provide independent and robust evaluation of behavioural change and related outcomes arising from Healthway funded projects.

Healthway's effectiveness indicators report on distinct areas that measure the extent to which Healthway key outcomes have been met. These indicators are as follows:

- extent to which funded organisations have met the requirements and objectives agreed to with Healthway;
- extent to which sponsorship as a strategy contributes to health behaviour change; and
- extent to which Healthway support has enabled capacity building activities in the community.

For further information refer to the section on Key Performance Indicators within this report.

Stronger Focus On Regions

Healthway has maintained a strong commitment to supporting projects and programs in regional and remote areas of WA for several years. The current Strategic Plan 2008-2011, 'Creating a Healthier Future for West Australians', continues this commitment to regional WA through the key overarching theme of 'Reducing inequalities', which identifies rural and remote communities as a high priority, and commits Healthway to approaches such as specifically targeting funding to groups who experience disadvantages in health due to their geographical location. An example of such a targeted approach is the Healthway regional coordinator position in the Kimberley, which received continued funding in 2009/10, with the central aim of building capacity and supporting the development of new projects and sponsorships in the region.

In 2009/10 Healthway allocated more than 60% of funding across all programs to supporting activities in rural and remote areas. One of Healthway's largest health promotion projects is the state-wide Mentally Healthy WA campaign, of which Healthway is the major funder. In 2009/10 Mentally Healthy WA was implemented in more than 25 communities state-wide, and the campaign message "Act, Belong Commit" was promoted through more than 50 Healthway sponsorships, representing over 100 individual events, festivals and activities in regional areas. The new Community Alcohol grants scheme offered in 2009/10 in collaboration with the Drug and Alcohol Office and the WA Department of Health has a strong focus on supporting community-based initiatives in regional areas.

During the year Healthway also continued to support highly successful sponsorship projects in regional areas, such as the sponsorship of Garnduwa Amboorly Wirnan Aboriginal Corporation in the Kimberley for its sport development and 'Be Active Communities' programs in remote areas. In the Arts Program, the devolved YCulture program, managed by Propelarts and Country Arts WA, continued to provide sponsorships to young people to develop and present their own arts activities, and continues to be an effective vehicle to promote the Drug Aware message.

The Royal Life Saving Society's Remote Aboriginal Communities Swimming Program was sponsored for the first time through Healthway's Sport Program in 2009/10 and resulted in over 100 school aged participants from Yandeyarra, Jigalong, Bidyadanga, Warmun and Burringurrah participating in a structured lap swimming program. A key element of the program, which provided fruit as a reward, was the partnership building between the school, the local store and the swimming pool.

Another example from Healthway's Arts Program is sponsorship of the Madjitil Moorna Choir from Kalamunda to engage with young Indigenous people in Halls Creek through a program of arts and cultural activities led by musical directors George Walley, Della Rae Morrison and Jessie Lloyd. A highlight of the sponsored events program was an outdoor family picnic on a friendly and safe community recreation area created through a ban on the sales of take-away alcohol.

Social & Environmental Responsibility

The field of health promotion acknowledges the importance of social, economic and environmental influences on people's health. These key factors and their contribution to inequalities in health are important considerations for much of Healthway's work, and are acknowledged in the 2008-2011 Strategic Plan. Healthway's commitment includes not only targeting activities towards groups in the population who experience the poorest health, but also supporting research to create a better understanding of the impediments and barriers to health among these groups, and how to address these barriers.

In the Research Program for example, Healthway funded a new study in 2009/10 to the University of WA to explore the barriers, motivators and facilitators influencing parenting behaviours among low socio-economic (SES) groups, specifically in relation to diet and physical activity. The research will inform future health promotion initiatives designed to improve nutrition and activity patterns among children from low SES backgrounds.

In recent years Healthway has reduced the application lead time for all its small grants and sponsorships (less than $5,000), resulting in more streamlined decision making processes for applications from small organisations and community groups. The Community Alcohol Grants scheme introduced in 2009/10 has been able to offer a minimal 2-month lead time, through a delegated approval process for this particular program, approved by the Board.

In 2010-11 Healthway introduced a new Venue Sponsorship program, targeting major recreational venues and significant events, and designed to encourage sustainable environmental change through healthier food provision and responsible alcohol service. In 2010, the program supported the City of South Perth to run a smoke-free and alcohol-free family zone on the South Perth foreshore on Australia Day, and supported the Perth Zoo to introduce a total smoke-free policy and an ambitious program of nutrition reforms throughout the venue.

Since 2003, one of the key strategies Healthway has adopted to create healthier environments in WA is through the requirement for organisations receiving more than $20,000 in grant or sponsorship funding to introduce comprehensive health policies incorporating smoke-free obligations, healthy food choices and responsible alcohol practices. This requirement will be strengthened further through a new condition of funding introduced from July 2010, requiring all sponsorship applicants to implement a comprehensive set of minimum policy standards.

In 2009/10 Healthway also strengthened its smoke-free policy requirements. From July 2010, all sponsored groups must implement and enforce total smoke-free outdoor policies as a condition of funding, thereby protecting visitors and participants at Healthway-sponsored events from the harmful and unpleasant effects of second hand tobacco smoke. Healthway's continuing partnership with the WA School Canteen Association in 2009/10 has also ensured that an increasing number of Healthway-sponsored sport and racing venues now offer a range of healthy food choices aligned to the WA Department of Education's 'traffic light system'.

Healthway's social responsibility is also evidenced by its commitment to independent evaluation of its work and programs, and in particular the surveys conducted every four years with organisations in receipt of Healthway funding. A major component of these surveys is the quality of the relationships between Healthway and the organisations receiving funding, which provides important feedback to Healthway on its administrative processes and the expectations of funded groups. The most recent survey in 2009 found that a high proportion of organisations reported positive relationships with Healthway and the majority reported that Healthway's expectations of their organisation were reasonable.

Acknowledgement of Health Agencies

In 2009/10, Healthway engaged the following health agencies to support sponsorships:

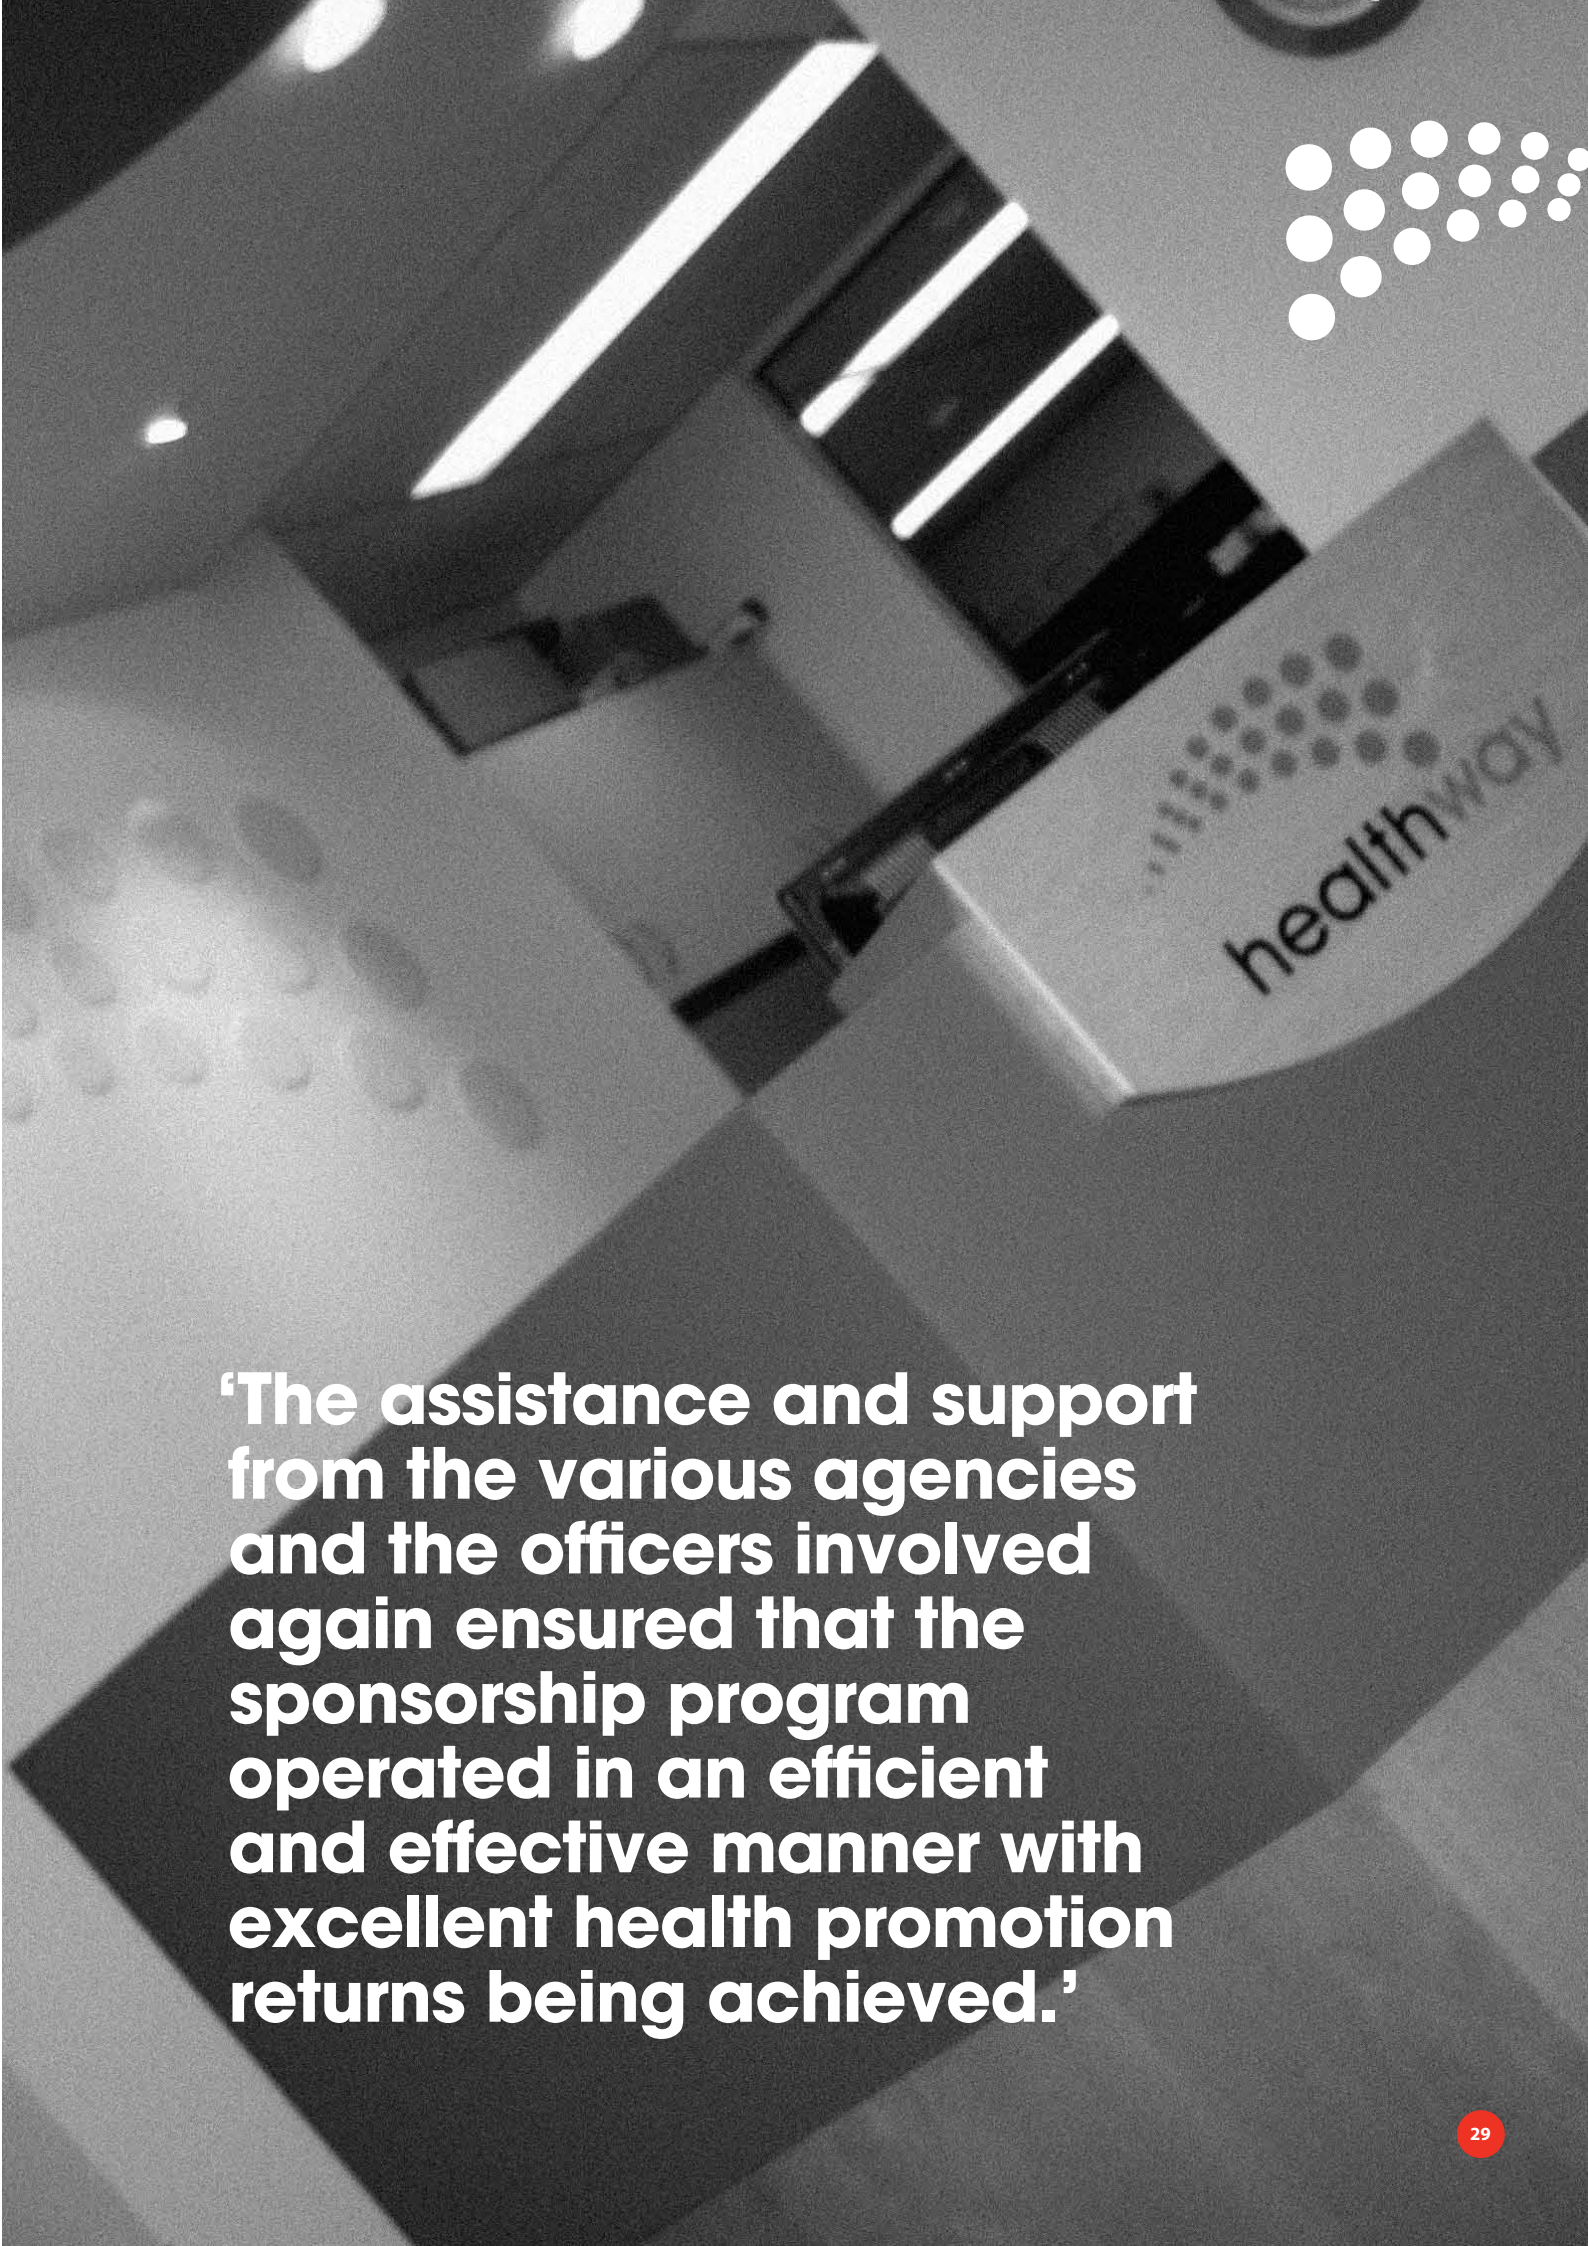
- The Cancer Council WA
- The Drug and Alcohol Office
- The National Heart Foundation (WA Division)
- Relationships Australia
- Sports Medicine Australia
- Curtin University of Technology
- Kimberley Population Health Unit

These agencies supported 796 Healthway sponsorships in 2009/10. 550 of these were kit sponsorships (including 424 Healthy Club sponsorships supported by Sports Medicine Australia). 55 of these sponsorships were administered by Healthway.

The Healthway funded Act Belong Commit campaign has expanded from the original six pilot sites to the whole of the state. In 2009/10, 56 Act Belong Commit sponsorships were conducted in regional and metropolitan WA.

The assistance and support from the various agencies and the officers involved again ensured that the sponsorship program operated in an efficient and effective manner with excellent health promotion returns being achieved.

Since 2005, Healthway has funded a Regional Coordination Initiative through the Kimberley Population Health Unit to achieve a greater link between funded health programs and sponsorship messages. Nine sponsorships were supported by the Kimberley Regional Coordinator in 2009/10.



‘The assistance and support from the various agencies and the officers involved again ensured that the sponsorship program operated in an efficient and effective manner with excellent health promotion returns being achieved.’

GOVERNANCE DISCLOSURES

Governance disclosures relate to government policy requirements, such as those regarding potential conflict of interest or ministerial directives.

Ministerial Directives

No Ministerial directives were received during the financial year.

Contracts With Senior Officers

At the date of reporting, other than normal contacts of employment of service, no Senior Officers, or firms of which Senior Officers are members, or entities in which Senior Officers have a substantial interests, had any interests in existing or proposed contracts with Healthway.

Indemnity Insurance Premium

Healthway covers members of the Healthway Board and senior management under a Directors and Officers Liability Insurance policy limited to $5 million at a premium cost of $4,000 (exc gst). Board members make a small contribution towards the premium costs.

OTHER DISCLOSURES

Employment and Industrial Relations

Staff Profile

Employee Profile	2009-10	2008-09
Full-time Permanent	13	13
Part-time Permanent (FTE basis)	1	1
Total FTE	14.0	14.0

Healthway has maintained a full time staffing equivalent of 14.0 with two officers working part-time.

Staff Development

The focus on staff development continued in 2009/10 with various initiatives adopted such as team workshops, on-the-job coaching for staff by senior managers and individual tailored courses. Key areas covered during 2009/10 include accountable and ethical decision making, occupational safety and health, electronic records management and expansion of wellbeing initiatives.

Healthway also makes every effort to enable staff take up development opportunities. During 2009/10 an officer was released to take up a secondment opportunity within the public sector.

Industrial Relations

There were no industrial issues during the year and no services to the public were disrupted.

Occupational Safety and Health and Injury Management

Healthway maintained its strong culture and focus on promoting and implementing occupational health and safety for its staff, Board and Committee members, contractors and visitors. Promoting a "Healthier WA" forms part of Healthway's organisational values and its broader strategic objectives.

In 2009/10 Occupational, Safety and Health (OSH) procedures and awareness continued to be integrated within the organisation based on shared responsibility and strong commitment where all staff participate in OSH discussions.

Weekly staff meetings continue where Occupational Safety and Health is a standing item under the agenda which encourages discussion, awareness and reporting safety and health matters.

During 2010 Healthway moved premises and therefore a number of additional measures were introduced to ensure that a healthy and safe work environment was retained. Staff also viewed a video on manual handling and assisted to set up their new work area in accord with ergonomic principles.

As part of Healthway's approach to maintaining a high focus on OSH, workplace inspections and self-assessment are undertaken by designated OSH trained officers. In addition, this year an external consultant was engaged to assess compliance with OSH requirements. Overall the report reflected that Healthway is compliant with OSH requirements and OSH has high visibility in the organisation.

The health and wellbeing program implementation progressed with further with a number of new initiatives undertaken including access to physical activity programs, access to wide-ranging courses made available to all staff, nutritional appreciation through monthly salad days and ongoing access to flu vaccinations and annual health checks.

Healthway's commitment to Occupational Health and Safety is further supported in its documented Code of Practice including an injury management system and development of a return to work program format (in accord with Workers' Compensation and Injury Management Act 1981) and Vehicle Safety Policy, both which were reviewed during the year.

Report of performance against 2009-10 targets:

Indicator	2009/10 Target	2009/10 Actual
Number of fatalities	0	0
Lost time/injury/diseases (LTI/D) incidence rate	0	0
Lost time injury/diseases severity rate	0	0
Workers compensation claims	0	0
Percentage of managers trained in occupational safety and health and injury management responsibilities	100	100

OTHER LEGAL COMPLIANCE

Advertising

In accordance with section 175ZE of the Electoral Act 1907, details of expenditure incurred during 2008/09 are set out below:

Category	Name of Agency	Amount expended
Advertising Agencies	Adcorp Australia	$814 (exc GST)
Market research organisations		Nil
Polling organisations		Nil
Direct mail organisations		Nil
Media advertising organisations		Nil

Recordkeeping Plans

Under Section 19 of the State Records Act 2000 Healthway is required to have a Recordkeeping Plan, to provide an accurate reflection of its recordkeeping program. An ongoing commitment to good records management and compliance was maintained throughout the year, demonstrated by the following:

State Records Commission - Standard 2, Principle 6 – Compliance	
Compliance Indicator	**Healthway Compliance**
The efficiency and effectiveness of Healthway's recordkeeping systems has been evaluated.	Following Healthway's move to new premises in February 2010 a review and enhancement of Healthway's Records Management Polices and Procedures was undertaken. This review was incorporated in the revised Record Keeping Plan which was submitted to the State Records Commission by early March 2010. The Disaster Recovery Plan for Electronic Records including Healthway's Grants Management System was revised, tested and successfully implemented. This plan integrates with Healthway's Business Continuity Plan, which was also reviewed following the move to new premises in 2010. Healthway's Internal Auditors reviewed the organisation's recordkeeping systems to ensure that creation, retention, storage and dissemination of information is adequate. The review identified that "there is sufficient documentation of the process in place and that the record keeping practices are consistent with documented policies and procedures. A current record management plan is in place (last updated in March 2010) and is in compliance with the State Records Act 2000". Regular audits of current file compactus continued to be undertaken and staff informed of outcomes and recommendations for procedural improvements.
Healthway conducts a recordkeeping training program.	No external training was undertaken this year as there was no change in Healthway's Corporate Services staff with recordkeeping responsibilities. Internal on the job training was undertaken by relevant Corporate Services staff when new staff commenced in other program areas. Staff were updated on Healthway's revised Record Keeping, Business Continuity and IT Disaster Recovery Plans.

Compliance Indicator	Healthway Compliance
The efficiency and effectiveness of Healthway's recordkeeping training program is reviewed from time to time.	Weekly staff meetings attended by all staff continue to provide a forum for staff to discuss issues openly and to enable them to be involved in setting directions for training. Healthway's Retention and Disposal processes were reviewed and guidelines issued to enable staff to review their work area documents prior to the move to new premises.
Healthway's induction program addresses employee roles and responsibilities in regard to their compliance with the recordkeeping plan.	Healthway's Induction Program provides initial recordkeeping training to all staff and the Induction Manual includes up to date copies of all records management policies and procedures.

Disability and Access Inclusion Plan Outcomes

Healthway actively seeks to ensure that people with disabilities have access to facilities, services, information, funding and consultation forums. Healthway continued to provide funding to organisations that support people with disabilities and are able to promote health messages. In 2009/10 Healthway moved premises there was and a strong focus on locating Healthway on the ground floor to ensure ease of access for people with disabilities. In addition several design features were incorporated to accommodate people with disabilities.

The website continued to provide accessibility features such as alternate font sizing and the e-newsletter provides similar features.

Staff have developed a good working relationships with organisations that work with people with disabilities and are aware and understand disability and access issues. In addition, Healthway continues to encourage people with knowledge of disability issues to participate on Committees. Further, the induction process for new staff includes training on understanding disability and access issues.

Compliance with Public Sector Standards and Ethical Codes

In accordance with s31(1) of the Public Sector Management Act 1994, Healthway is required to report on compliance with Public Sector Standards in Human Resource Management and Codes of Ethics and Codes of Conduct.

During the year there were no breaches of public sector standards claims lodged and no claims for breaches of Codes of Ethics.

Healthway continued to develop a culture valuing high work ethics and integrity. As part of this approach accountable and ethical training was undertaken by all staff and generic Code of Conduct and Conflict of Interest matters remain as standing items at weekly staff meetings, providing a forum for open discussion. Also during 2009/10 the Healthway Board adopted improved recording of interests that are tabled at each meeting.

Auditor General

INDEPENDENT AUDIT OPINION

To the Parliament of Western Australia

WESTERN AUSTRALIAN HEALTH PROMOTION FOUNDATION
FINANCIAL STATEMENTS AND KEY PERFORMANCE INDICATORS
FOR THE YEAR ENDED 30 JUNE 2010

I have audited the accounts, financial statements, controls and key performance indicators of the Western Australian Health Promotion Foundation.

The financial statements comprise the Statement of Financial Position as at 30 June 2010, and the Statement of Comprehensive Income, Statement of Changes in Equity and Statement of Cash Flows for the year then ended, a summary of significant accounting policies and other explanatory Notes.

The key performance indicators consist of key indicators of effectiveness and efficiency.

Board's Responsibility for the Financial Statements and Key Performance Indicators
The Board is responsible for keeping proper accounts, and the preparation and fair presentation of the financial statements in accordance with Australian Accounting Standards and the Treasurer's Instructions, and the key performance indicators. This responsibility includes establishing and maintaining internal controls relevant to the preparation and fair presentation of the financial statements and key performance indicators that are free from material misstatement, whether due to fraud or error; selecting and applying appropriate accounting policies; making accounting estimates that are reasonable in the circumstances; and complying with the Financial Management Act 2006 and other relevant written law.

Summary of my Role
As required by the Auditor General Act 2006, my responsibility is to express an opinion on the financial statements, controls and key performance indicators based on my audit. This was done by testing selected samples of the audit evidence. I believe that the audit evidence I have obtained is sufficient and appropriate to provide a basis for my audit opinion. Further information on my audit approach is provided in my audit practice statement. This document is available on the OAG website under "How We Audit".

An audit does not guarantee that every amount and disclosure in the financial statements and key performance indicators is error free. The term "reasonable assurance" recognises that an audit does not examine all evidence and every transaction. However, my audit procedures should identify errors or omissions significant enough to adversely affect the decisions of users of the financial statements and key performance indicators.

4th Floor Dumas House 2 Havelock Street West Perth 6005 Western Australia Tel: 08 9222 7500 Fax: 08 9322 5664

Western Australian Health Promotion Foundation
Financial Statements and Key Performance Indicators for the year ended 30 June 2010

Audit Opinion

In my opinion,

(i) the financial statements are based on proper accounts and present fairly the financial position of the Western Australian Health Promotion Foundation at 30 June 2010 and its financial performance and cash flows for the year ended on that date. They are in accordance with Australian Accounting Standards and the Treasurer's Instructions;

(ii) the controls exercised by the Foundation provide reasonable assurance that the receipt, expenditure and investment of money, the acquisition and disposal of property, and the incurring of liabilities have been in accordance with legislative provisions; and

(iii) the key performance indicators of the Foundation are relevant and appropriate to help users assess the Foundation's performance and fairly represent the indicated performance for the year ended 30 June 2010.

COLIN MURPHY
AUDITOR GENERAL
12 August 2010

Certification of Financial Statements

The accompanying financial statements of the Western Australian Health Promotion Foundation have been prepared in compliance with the provisions of the Financial Management Act 2006 from proper accounts and records to present fairly the financial transactions for the year ending 30 June 2010 and the financial position as at 30 June 2010.

At the date of signing, we are not aware of any circumstances which would render any particulars included in the financial statements misleading or inaccurate.

The Statement of Cash Flows should be read in conjunction with the accompanying notes.

1 AUSTRALIAN ACCOUNTING STANDARDS

General

The Authority's financial statements for the year ended 30 June 2010 have been prepared in accordance with Australian Accounting Standards. The term 'Australian Accounting Standards' refers to Standards and Interpretations issued by the Australian Accounting Standard Board (AASB).

The Authority has adopted any applicable, new and revised Australian Accounting Standards from their operative dates.

Early adoption of standards

The Authority cannot early adopt an Australian Accounting Standard unless specifically permitted by TI 1101 Application of Australian Accounting Standards and Other Pronouncements. No Australian Accounting Standards that have been issued or amended but not operative have been early adopted by the Authority for the annual reporting period ended 30 June 2010.

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

(a) General Statement

The financial statements constitute a general purpose financial statements that have been prepared in accordance with Australian Accounting Standards, the Framework, Statements of Accounting Concepts and other authoritative pronouncements of the Australian Accounting Standards Board, as applied by the Treasurer's Instructions. Several of these are modified by the Treasurer's Instructions to vary the application, disclosure, format and wording.

The Financial Management Act and the Treasurer's Instructions are legislative provisions governing the preparation of financial statements and take precedence over the Australian Accounting Standards, the Framework, Statements of Accounting Concepts and other authoritative pronouncements of the Australian Accounting Standards Board.

Where modification is required and has a material or significant financial effect upon the reported results, details of that modification and the resulting financial effect are disclosed in the notes to the financial statements.

(b) Basis of Preparation

The financial statements have been prepared on the accrual basis of accounting using the historical cost convention, except for applicable assets and liabilities which, as noted, are measured at fair value.

The accounting policies adopted in the preparation of the financial statements have been consistently applied throughout all periods presented unless otherwise stated.

The financial statements are presented in Australian dollars rounded to the nearest dollar ($).

The judgements that have been made in the process of applying the Authority's accounting policies that have the most significant effect on the amounts recognised in the financial statements are disclosed at note 3 'Judgements made by management in applying accounting policies'.

The key assumptions made concerning the future, and other key sources of estimation uncertainty at the end of the reporting period that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are disclosed at note 4 'Key sources of estimation uncertainty'.

(c) Reporting Entity

The reporting entity comprises the Authority only.

(d) Income

Revenue recognition

Revenue is measured at the fair value of consideration received or receivable. Revenue is recognised for the major business activities as follows:

Sale of goods

Revenue is recognised from the sale of goods and disposal of other assets when the significant risks and rewards of ownership transfer to the purchaser and can be measured reliably.

Provision of services

Revenue is recognised on delivery of the service to the client or by reference to the stage of completion of the transaction.

Interest

Revenue is recognised as the interest accrues.

Service Appropriations

Service Appropriations are recognised as revenues at nominal value in the period in which the Authority gains control of the appropriated funds. The Authority gains control of appropriated funds at the time those funds are deposited to the bank account or credited to the holding account held at Treasury. (See note 15 Income from State Government).

Grants, donations, gifts and other non-reciprocal contributions

Revenue is recognised at fair value when the Authority obtains control over the assets comprising the contributions, usually when cash is received. Unexpended grant monies returned to Healthway are recognised upon the receipt of cash.

Other non-reciprocal contributions that are not contributions by owners are recognised at their fair value. Contributions of services are only recognised when a fair value can be reliably determined and the services would be purchased if not donated.

Where contributions recognised as revenues during the reporting period were obtained on the condition that they be expended in a particular manner or used over a particular period, and those conditions were undischarged as at the reporting period, the nature of, and amounts pertaining to, those undischarged conditions are disclosed in the notes.

Gains

Gains may be realised or unrealised and are usually recognised on a net basis. These include gains arising on the disposal of non-current assets and some revaluations of non-current assets.

(e) Property, Plant and Equipment

Capitalisation/Expensing of assets

Items of property, plant and equipment and infrastructure costing $5,000 or more are recognised as assets and the cost of utilising assets is expensed (depreciated) over their useful lives. Items of property, plant and equipment and infrastructure costing less than $5,000 are immediately expensed direct to the Statement of Comprehensive Income (other than where they form part of a group of similar items which are significant in total).

Initial recognition and measurement

All items of property, plant and equipment and infrastructure are initially recognised at cost. For items of property, plant and equipment and infrastructure acquired at no cost or for nominal cost, the cost is the fair value at the date of acquisition.

Subsequent measurement

All items of property, plant and equipment are stated at historical cost less accumulated depreciation and accumulated impairment losses.

Depreciation

All non-current assets having a limited useful life are systematically depreciated over their estimated useful lives in a manner that reflects the consumption of their future economic benefits.

Depreciation is calculated on the straight line basis, using rates which are reviewed annually. Useful lives for each class of depreciable assets are:

Motor Vehicles	5 years
Furniture, Fixture and Fittings	5 to 20 years
Office Equipment	5 to 20 years
Computer Equipment	3 years

(f) Impairment of Assets

Property, plant and equipment are tested for any indication of impairment at each reporting period. Where there is an indication of impairment, the recoverable amount is estimated. Where the recoverable amount is less than the carrying amount, the asset is considered impaired and is written down to the recoverable amount and an impairment loss is recognised. As the Authority is a not-for-profit entity, unless an asset has been identified as a surplus asset, the recoverable amount is the higher of an asset's fair value less costs to sell and depreciated replacement cost.

The risk of impairment is generally limited to circumstances where an asset's depreciation is materially understated, where the replacement cost is falling or where there is a significant change in useful life. Each relevant class of assets is reviewed annually to verify that the accumulated depreciation/amortisation reflects the level of consumption or expiration of the asset's future economic benefits and to evaluate any impairment risk from falling replacement costs.

The recoverable amount of assets identified as surplus assets is the higher of fair value less costs to sell and the present value of future cash flows expected to be derived from the asset. Surplus assets carried at fair value have no risk of material impairment where fair value is determined by reference to market based evidence. Where fair value is determined by reference to depreciated replacement cost, surplus assets are at risk of impairment and the recoverable amount is measured. Surplus assets at cost are tested for indications of impairments at the end of each reporting period.

(g) Leases

The Authority has entered into an operating lease arrangement for the rent of the office building and motor vehicles where the lessor effectively retains all of the risks and benefits incident to ownership of the items held under the operating leases. Equal instalments of the lease payments are charged to the Statement of Comprehensive Income over the lease term as this is representative of the pattern of benefits to be derived from the leased property.

(h) Financial Instruments

In addition to cash , the Authority has two categories of financial instrument:

- Loans and receivables; and
- Financial liabilities measured at amortised cost.

Financial instruments have been disaggregated into the following classes:

Financial Assets

- Cash and cash equivalents
- Restricted cash and cash equivalents
- Receivables

Financial Liabilities

- Payables

Initial recognition and measurement is at fair value which normally equates to the transaction cost or face value. Subsequent measurement is at amortised cost using the effective interest method.

The fair value of short-term receivables and payables is the transaction cost or the face value because there is no interest rate applicable and subsequent measurement is not required as the effect of discounting is not material.

(i) Cash and Cash Equivalents

For the purpose of the Statement of Cash Flows, cash and cash equivalent (and restricted cash and cash equivalent) assets comprise cash on hand and short term deposits with original maturities of three months or less that are readily convertible to a known amount of cash and which are subject to insignificant risk of changes in value, and bank overdrafts.

(j) Accrued Salaries

Accrued salaries (see Note 22) represent the amount due to staff but unpaid at the end of the financial year, as the pay date for the last pay period for that financial year does not coincide with the end of the financial year. Accrued salaries are settled within a fortnight of the financial year end. The Authority considers the carrying amount of accrued salaries to be equivalent to its net fair value.

(k) Receivables

Receivables are recognised and carried at original invoice amount less an allowance for any uncollectible amounts (i.e. impairment). The collectability of receivables is reviewed on an ongoing basis and any receivables identified as uncollectible are written off. The allowance for uncollectible amounts (doubtful debts) is raised when there is objective evidence that the Authority will not be able to collect the debts. The carrying amount is equivalent to fair value as it is due for settlement within 30 days. Refer also to note 2(h) 'Financial Instruments' and note 17 'Receivables'.

(l) Payables

Payables are recognised at the amounts payable when the Authority becomes obliged to make future payments as a result of a purchase of assets or services. The carrying amount is equivalent to fair value, as they are generally settled within 30 days. Refer to note 2(h) 'Financial Instruments' and note 20 'Payables'.

(m) Provisions

Provisions are liabilities of uncertain timing or amount and are recognised where there is a present legal or constructive obligation as a result of a past event and when the outflow of resources embodying economic benefits is probable and a reliable estimate can be made of the amount of the obligation. Provisions are reviewed at the end of each reporting period. Refer to note 21 'Provisions'.

Provisions - Employee Benefits

Annual Leave and Long Service Leave

The liability for annual and long service leave expected to be settled within 12 months after the reporting period is recognised and measured at the undiscounted amounts expected to be paid when the liabilities are settled. Annual and long service leave expected to be settled more than 12 months after the reporting period is measured at the present value of amounts expected to be paid when the liabilities are settled. Leave liabilities are in respect of services provided by employees up to the end of the reporting period.

When assessing expected future payments consideration is given to expected future wage and salary levels including non-salary components such as employer superannuation contributions. In addition, the long service leave liability also considers the experience of employee departures and periods of service.

The expected future payments are discounted using market yields at the end of the reporting period on national government bonds with terms to maturity that match, as closely as possible, the estimated future cash outflows.

All annual leave and unconditional long service leave provisions are classified as current liabilities as the Authority does not have an unconditional right to defer settlement of the liability for at least 12 months after the reporting period.

Leave benefits are calculated at remuneration rates expected to be paid when the liabilities are settled. A liability for long service leave is recognised after an employee has completed four years of service. An actuarial assessment for long service leave undertaken by PriceWaterHouseCoopers Actuaries in 2010 determined that the liability measured using the short hand method was not materially different from the liability measured using the present value of expected future payments.

Superannuation

The Government Employees Superannuation Board (GESB) in accordance with legislative requirements administers public sector superannuation arrangements in Western Australia.

Employees may contribute to the Pension Scheme, a defined benefit pension scheme now closed to new members or the Gold State Superannuation Scheme (GSS), a defined benefit lump sum scheme also closed to new members.

Employees commencing employment prior to 16 April 2007 who were not members of either the Pension or the GSS Schemes became non-contributory members of the West State Superannuation Scheme (WSS). Employees commencing employment on or after 16 April 2007 became members of the GESB Super Scheme (GESBS). Both of these schemes are accumulation schemes. The Authority makes concurrent contributions to GESB on behalf of employees in compliance with the Commonwealth Government's Superannuation Guarantee (Administration) Act 1992. These contributions extinguish the liability for superannuation charges in respect of the WSS and GESBS Schemes.

Refer to note 2(n) 'Superannuation expense'.

Provisions - Other

Employment On-Costs

Employment on-costs, including workers' compensation insurance, are not employee benefits and are recognised separately as liabilities and expenses when the employment to which they relate has occurred. Employment on-costs are included as part of 'Other expenses' and are not included as part of the Authority's 'Employee benefits expense'. The related liability is included in 'Employment on-costs provision'.

Refer to note 11 'Other expenses' and note 21 'Provisions'.

(n) Superannuation expense

The superannuation expense in the Statement of Comprehensive Income comprises employer contributions paid to the GSS (concurrent contributions), the West State Superannuation Scheme (WSS), and the GESB Super Scheme (GESBS).

The GSS Scheme is a defined benefit scheme for the purposes of employees and whole-of-government reporting. However, it is a defined contribution plan for agency purposes because the concurrent contributions (defined contributions) made by the agency to GESB extinguishes the agency's obligations to the related superannuation liability.

(o) Comparative Figures

Comparative figures are, where appropriate, reclassified to be comparable with the figures presented in the current financial year.

3 JUDGEMENTS MADE BY MANAGEMENT IN APPLYING ACCOUNTING POLICIES

The preparation of financial statements requires management to make judgements about the application of accounting policies that have a significant effect on the amounts recognised in the financial statements. The Authority evaluates these judgements regularly.

Operating Lease Commitments

The Authority has entered into a commercial lease and has determined that the lessor retains all the significant risks and rewards of ownership of the property. Accordingly, the lease has been classified as an operating lease.

4 KEY SOURCES OF ESTIMATION UNCERTAINTY

The Authority makes key estimates and assumptions concerning the future. These estimates and assumptions are based on historical experience and various other factors that have a significant risk of causing a material adjustment to the carrying amount of assets and liabilities within the next financial year.

Long Service Leave

In calculating the Authority's long service leave provision, several estimations and assumptions have been made. These include expected future salary rates, salary inflation, discount rates, employee retention rates and expected future payments. Any changes in these estimations and assumptions may impact on the carrying amount of the long service leave provision.

5 DISCLOSURE OF CHANGES IN ACCOUNTING POLICY AND ESTIMATES

Initial application of an Australian Accounting Standard

The Authority has applied the following Australian Accounting Standards effective for annual reporting periods beginning on or after 1 July 2009 that impacted on the Authority.

AASB 101	Presentation of Financial Statements (September 2007). This Standard has been revised and introduces a number of terminology changes as well as changes to the structure of the Statement of Changes in Equity and the Statement of Comprehensive Income. It is now a requirement that owner changes in equity be presented separately from non-owner changes in equity. There is no financial impact resulting from the application of this revised Standard.
AASB 2007-10	Further Amendments to Australian Accounting Standards arising from AASB 101. This Standard changes the term 'general purpose financial report' to 'general purpose financial statements', where appropriate in Australian Accounting Standards and the Framework to better align with IFRS terminology. There is no financial impact resulting from the application of this Standard.
AASB 2009-2	Amendments to Australian Accounting Standards – Improving Disclosures about Financial Instruments AASB 4, AASB 7, AASB 1023 & AASB 1038. This Standard amends AASB 7 and will require enhanced disclosures about fair value measurements and liquidity risk with respect to financial instruments. There is no financial impact resulting from the application of this Standard.

Future impact of Australian Accounting Standards not yet operative

The Authority cannot early adopt an Australian Accounting Standard unless specifically permitted by TI 1101 Application of Australian Accounting Standards and Other Pronouncements. Consequently, the Authority has not applied early any following Australian Accounting Standards that have been issued that may impact the Authority. Where applicable, the Authority plans to apply these Australian Accounting Standards from their application date.

		Operative for reporting periods beginning on/after
AASB 2009-11	Amendments to Australian Accounting Standards arising from AASB 9 [AASB 1, 3, 4, 5, 7, 101, 102, 108, 112, 118, 121, 127, 128, 131, 132, 136, 139, 1023 & 1038 and Interpretations 10 & 12]. The amendment to AASB 7 requires modification to the disclosure of categories of financial assets. The Authority does not expect any financial impact when the Standard is first applied. The disclosure of categories of financial assets in the notes will change.	1 January 2013

6 EMPLOYEE BENEFITS EXPENSE

	2010 $	2009 $
Wages and salaries (a)	1,259,936	1,204,956
Superannuation (b)	125,300	116,541
Annual leave (c)	(14,265)	(4,664)
Long Service leave (c)	9,202	34,629
	1,380,173	1,351,462

(a) Includes the value of the fringe benefit to the employee plus the fringe benefits tax component.

(b) Defined contribution plans include West State, Gold State and GESB Super Scheme (contributions paid).

(c) Includes a superannuation contribution component.

Employment on-costs such as workers' compensation insurance are included at note 11 'Other Expenses'. The employment on-costs liability is included at note 21 'Provisions'.

7 SUPPLIES AND SERVICES

Communications	46,738	37,585
Consultants and contractors (a)	441,155	358,001
Consumables	65,122	79,368
Travel	24,923	17,933
Other	92,252	58,772
	670,190	551,659

(a) Includes Audit fees, see also note 31 'Remuneration of auditor'.

8 DEPRECIATION EXPENSE

Motor vehicles	7,805	21,132
Office Establishment	6,983	11,970
Equipment and apparatus	5,371	2,489
Computing equipment and software	50,561	34,072
	70,720	69,663

9 ACCOMMODATION EXPENSES

Lease rentals	354,065	155,379
Cleaning	83,315	69,046
	437,380	224,425

	2010 $	2009 $
10 GRANTS AND SPONSORSHIPS		
Health promotion and research grants	6,037,211	6,476,136
Arts sponsorships	3,012,987	2,988,849
Sport sponsorships	6,069,404	5,951,003
Racing sponsorships	772,202	887,000
Support sponsorships	1,927,519	2,016,390
Evaluations	421,798	350,000
	18,241,121	18,669,378
11 OTHER EXPENSES		
Other staff costs (a)	13,170	20,922
Maintenance	37,889	14,823
	51,059	35,745

(a) Includes workers' compensation insurance and other employment on-costs. The on-costs liability associated with the recognition of annual and long service leave liability is included at note 21 'Provisions'. Superannuation contributions accrued as part of the provision for leave are employee benefits and are not included in employment on-costs.

12 INTEREST REVENUE		
Bank Interest	685,428	986,118
	685,428	986,118
13 OTHER REVENUE		
Return of unexpended grants and sponsorships	337,356	360,085
Other	252,858	308,435
	590,214	668,520
14 NET GAIN/(LOSS) ON DISPOSAL OF NON-CURRENT ASSETS		
Costs of Disposal of Non-Current Assets		
Plant, equipment and vehicles	145,487	51,376
Proceeds from Disposal of Non-Current Assets		
Plant, equipment and vehicles	10,909	55,637
Net gain/(loss)	(134,578)	4,261

15 INCOME FROM STATE GOVERNMENT

	2010 $	2009 $
Appropriation received during the year:		
Service appropriation (a)	19,596,000	19,147,000
	19,596,000	19,147,000

(a) Service appropriations are accrual amounts reflecting the net cost of services delivered. The appropriation revenue comprises a cash component only.

16 CASH AND CASH EQUIVALENTS

Held at Treasury - WA Health Promotion Fund	8,227,407	7,783,338
Cash on Hand	331	235
	8,227,738	7,783,573

17 RECEIVABLES

Current		
GST receivable	744,875	751,391
Interest receivable	122,500	85,000
	867,375	836,391

18 OTHER ASSETS

Prepayments	6,359	22,196
	6,359	22,196

19 PROPERTY, PLANT AND EQUIPMENT

Motor Vehicles		
At Cost	20,382	42,750
Less Accumulated depreciation	20,382	31,776
	-	10,974
Fixtures and Fittings		
At Cost	-	267,447
Less Accumulated depreciation	-	118,521
	-	148,926
Equipment and Apparatus		
At Cost	35,461	21,011
Less Accumulated depreciation	14,341	18,315
	21,120	2,696

	2010 $	2009 $
Computing Equipment and Software		
At Cost	210,075	190,669
Less Accumulated depreciation	161,901	119,532
	48,174	71,137
	69,294	233,733

Reconciliations of the carrying amounts of property, plant, equipment and vehicles at the beginning and end of the reporting period are set out below.

2010	Motor Vehicles $	Fixtures and Fittings $	Equipment and Apparatus $	Computing Equipment $	Total $
Carrying amount at the start of the year	10,974	148,926	2,695	71,137	233,731
Additions	-	-	23,796	27,598	51,394
Disposals	(3,169)	(141,943)			(145,112)
Depreciation	(7,805)	(6,983)	(5,371)	(50,561)	(70,720)
Carrying amount at the end of the year	-	-	21,120	48,174	69,294

2009	Motor Vehicles $	Fixtures and Fittings $	Equipment and Apparatus $	Computing Equipment $	Total $
Carrying amount at the start of the year	82,624	160,896	5,184	45,828	294,531
Additions	-	-		59,381	59,381
Disposals (a)	(50,518)	-	-	-	(50,518)
Depreciation	(21,132)	(11,970)	(2,489)	(34,072)	(69,663)
Carrying amount at the end of the year	10,974	148,926	2,695	71,137	233,731

(a) The adoption of the new capitalisation threshold of $5000 has resulted in assets that had values of under $5000 being declassified as assets and accounted for in Equity.

There were no indications of impairment to property, plant and equipment at 30 June 2010.

19 PAYABLES

Current		
Trade payables	87,013	81,380
Grants and sponsorships	7,206,192	6,771,443
	7,293,205	6,852,823

21 PROVISIONS

	2010 $	2009 $
Current		
Employee benefits provision		
Annual Leave (a)	91,095	105,360
Long service leave (b)	133,957	161,645
Other provisions		
Employment on-costs (c)	19,588	23,163
	244,640	290,168
Non-current		
Employee benefits provision		
Long service leave (b)	102,741	65,154
Other provisions		
Employment on-costs (c)	7,757	4,920
	110,498	70,074

(a) Annual leave liability

Annual leave liabilities have been classified as current as there is no unconditional right to defer settlement for at least 12 months after the reporting period. Assessments indicate that actual settlement of the liabilities will occur as follows:

Within 12 months of the end of the reporting period	62,813	70,596
More than 12 months after the reporting period	28,282	34,764
	91,095	105,360

(b) Long service leave liability

Long service leave liabilities have been classified as current where there is no unconditional right to defer settlement for at least 12 months after the reporting period. Assessments indicate that actual settlement of the liabilities will occur as follows:

Within 12 months of the end of the reporting period	114,875	79,895
More than 12 months after the reporting period	121,823	146,904
	236,698	226,799

(c) Employment on-costs

Movements in Other Provisions		
Employment on-cost provisions		
Carrying amount at the start of year	28,083	24,177
Net Movements	(739)	3,906
Carrying amount at year end	27,344	28,083

The settlement of annual and long service leave liabilities gives rise to the payment of employment on-costs including workers' compensation insurance. The provision is the present value of expected future payments. The associated expense is disclosed in note 11 'Other expenses'.

	2010 $	2009 $
22 OTHER CURRENT LIABILITIES		
Current		
Board and Committee Fees	3,919	2,150
Accrued salaries	17,308	14,662
Amount owing to the ATO	4,674	5,300
Other	1,910	32,525
	27,811	54,637
23 EQUITY		
Equity represents the residual interest in the net assets of Healthway. The Government holds the equity interest in Healthway on behalf of the community.		
Accumulated surplus		
Balance at start of year	1,608,191	1,704,624
Result for the period	(113,579)	(96,433)
Balance at the end of the year	1,494,612	1,608,191
24 NOTES TO THE STATEMENT OF CASH FLOWS		
Reconciliation of cash		
Cash at the end of the financial year as shown in the Statement of Cash Flows is reconciled to the related items in the Statement of Financial Position as follows:		
Cash and cash equivalents	8,227,407	7,783,338
Cash on hand	331	235
	8,227,738	7,783,573
Reconciliation of net cost of services to net cash flows used in operating activities		
Net cost of services	(19,709,579)	(19,243,433)
Non-cash items:		
Depreciation	70,720	69,663
(Gain)/Loss on Disposal of Assets	134,578	(4,261)

	2010 $	2009 $
(Increase)/decrease in assets:		
Current receivables	(37,500)	130,219
Other current assets	15,837	(18,293)
Increase/(decrease) in liabilities:		
Current payables	440,382	(379,475)
Current provisions	(45,528)	32,242
Other current liabilities	(26,826)	8,913
Non-current provisions	40,424	24,390
Net GST receipts/(payments)	47,991	75,227
Change in GST in receivables/payables	(41,475)	36,653
Net cash used in operating activities	(19,110,976)	(19,268,155)

At the end of the reporting period, the Authority had fully drawn on all financing facilities, details of which are disclosed in the financial statements.

25 COMMITMENTS

(a) Grants expenditure commitments

Grant expenditure commitments relate to the Board's approval to fund applications which were received on or prior to 30 June 2010 and are contingent on Healthway's continued existence and future revenue being received. The balance is not recognised as a liability until the year payment is to be made. The amounts payable are as follows:

Within 1 year	6,659,299	5,958,624
Later than 1 year and not later than 5 years	3,194,717	2,170,859
	9,854,016	8,129,483

(b) Non-cancellable operating lease commitments

Commitments for minimum lease payments are payable as follows:

Within 1 year	384,396	162,233
Later than 1 year and not later than 5 years	1,904,416	145,200
Later than 5 years	1,254,563	-
	3,543,375	307,433

Non-cancellable lease commitments include property and motor vehicle leases.

Healthway relocated premises in February 2010 and a new non-cancellable lease was established with rent payable monthly in advance. The current lease concludes 31 October 2019 with two, three year options.

26 CONTINGENT LIABILITIES AND CONTINGENT ASSETS

There were no known contingent liabilities and contingent assets at balance

sheet date and at the date of signing the financial report.

27 EVENTS OCCURING AFTER THE BALANCE SHEET DATE

No events, matters or circumstances have arisen since the end of the reporting period which significantly affected or may significantly affect the operations of the Authority, the results of those operations, or the state of affairs of the Authority in future financial years.

28 EXPLANATORY STATEMENT

(a) Significant variations between estimated and actual results for 2010

Significant variations are considered to be those greater than 10% and $25,000.

	2010 Budget $	2010 Actual $	Variance $
Income			
Interest revenue	950,000	685,428	264,572
Other revenue	0	590,214	(590,214)

The variation in interest revenue is due to interest rate movements during the year.

During 2009-2010 the Drug and Alcohol Office provided a further contribution of $200,000 towards a Community Alcohol Grant Program. The balance of revenue received of $390,214 mainly reflects unspent funds returned by grant and sponsorship recipients in accordance with Agreements.

Expenses			
Supplies and services	567,000	670,190	(103,190)
Accommodation	390,000	437,380	(47,380)
Loss on disposal of non-current assets	0	134,578	(134,578)

During 2009-2010 the relocation of Healthway premises resulted in an adjustment to rental charges and once-off associated relocation costs including accelerated write-off of building fixtures.

(b) Significant variations between actual results for 2009 and 2010

Significant variations are considered to be those greater than 10% and $25,000.

	2010 Actual $	2009 Actual $	Variance Actual $
Income			
Interest revenue	685,428	986,118	(300,690)
Other revenue	590,214	668,520	(78,306)

Interest revenue movement reflects lower interest rates than previous years.

The revenue variation mainly reflects the increased contribution by the Drug and Alcohol Office towards the Community Alcohol Grant Program.

Expenses			
Supplies and services	670,190	551,659	118,531
Accommodation	437,380	224,425	212,955
Loss on disposal of non-current assets	134,578	0	134,578

The 2009-2010 budget was increased to allow for expected increases in rental charges and once-off costs associated with the relocation.

29 FINANCIAL INSTRUMENTS

(a) Financial Risk Management Objectives and Policies

Financial instruments held by the Authority are cash and cash equivalents, receivables and payables. Healthway has limited exposure to financial risks. Healthway's overall risk management program focuses on managing the risks identified below.

Credit risk

Credit risk arises when there is the possibility of the Authority's receivables defaulting on their contractual obligations resulting in financial loss to the Authority.

The maximum exposure to credit risk at the end of the reporting period in relation to each class of recognised financial assets is the gross carrying amount of those assets inclusive of any provisions for impairment as shown in the table at Note 29(c) 'Financial Instruments Disclosures' and Note 17 'Receivables'.

Credit risk associated with the Authority's financial assets is minimal. For receivables other than government, the Authority trades only with recognised, creditworthy third parties. The Authority has policies in place to ensure that sales of products and services are made to customers with an

appropriate credit history. In addition, receivable balances are monitored on an ongoing basis with the result that the Authority's exposure to bad debts is minimal. At the end of the reporting period there were no significant concentrations of credit risk.

Allowance for impairment of financial assets is calculated based on objective evidence such as observable data indicating changes in client credit ratings. For financial assets that are either past due or impaired, refer to Note 29(c) 'Financial Instrument Disclosures'.

Liquidity risk

Liquidity risk arises when the Authority is unable to meet its financial obligations as they fall due. The Authority is exposed to liquidity risk through its trading in the normal course of business.

The Authority has appropriate procedures to manage cash flows including drawdowns of appropriations by monitoring forecast cash flows to ensure that sufficient funds are available to meet its commitments

WATC manage and invest cash balances on behalf of the Agency. The return on cash investments are subject to fluctuating interest rates.

Market risk

The Authority's exposure to market risk for changes in interest rates relate primarily to cash investments. The Authority does not trade in foreign currency and is not materially exposed to other price risks.

(b) Categories of Financial Instruments

In addition to cash, the carrying amounts of each of the following categories of financial assets and financial liabilities at the end of the reporting period are as follows:

	2010	2009
Financial Assets	**$**	**$**
Cash and cash equivalents	8,227,738	7,783,573
Loans and receivables (a)	122,500	85,000
Financial Liabilities		
Financial liabilities measured at amortised cost	7,321,016	6,907,460

(a) The amount of loans and receivables excludes GST recoverable from the ATO (statutory receivable).

(c) Financial Instruments disclosures

Credit Risk and Interest rate Exposures

The following table disclose the Authority's maximum exposure to credit risk, interest rate exposures and the

ageing analysis of financial assets. The Authority's maximum exposure to credit risk at the end of the reporting period is the carrying amount of financial assets as shown below. The table discloses the ageing of financial assets that are past due but not impaired and impaired financial assets. The table is based on information provided to senior management of the Authority.

The Authority does not hold any collateral as security or other credit enhancement relating to the financial assets it holds.

The Authority does not hold any financial assets that had to have their terms renegotiated that would have otherwise resulted in them being past due or impaired.

Interest rate exposures and ageing analysis of financial assets(a)

		Interest Rate Exposure			
	Weighted Average Effective Interest Rate	**Carrying Amount**	**Floating Interest Rate**	**Non Interest Bearing**	**Past Due Not Impaired**
Financial Assets		$	$	$	$
2010					
Cash and cash equivalents	3.999%	8,227,738	8,227,407	331	-
Receivables		122,500	-	122,500	-
		8,350,238	8,227,407	122,831	-
2009					
Cash and cash equivalents	5.388%	7,783,573	7,783,338	235	-
Receivables		85,000	-	85,000	-
		7,868,573	7,783,338	85,235	-

(a) The amount of receivables excludes GST recoverable from the ATO (statutory receivable).

Liquidity risk

The following table details the contractual maturity analysis for financial liabilities. The contractual maturity amounts are representative of the undiscounted amounts at the end of the reporting period. The table includes interest and principal cash flows. An adjustment has been made where material.

Interest rate exposure and maturity analysis of financial liabilities

		Interest rate exposure				
	Weighted Average Effective Interest Rate	Carrying Amount	Floating Interest Rate	Non Interest Bearing	Maturity Dates Up to 3 Months	Maturity Dates 3-12 Months
Financial Liabilities		$	$	$	$	$
2010						
Payables		7,293,205		7,293,205	2,990,382	4,302,823
Other liabilities		27,811		27,811	27,811	-
		7,321,016	-	7,321,016	3,018,193	4,302,823
2009						
Payables		6,852,823		6,852,823	2,170,664	4,682,159
Other liabilities		54,637		54,637	54,637	-
		6,907,460	-	6,907,460	2,225,301	4,682,159

The amounts disclosed are the contractual undiscounted cash flows of each class of financial liabilities.

Interest rate sensitivity analysis

The following table represents a summary of the interest rate sensitivity of the Authority's financial assets and liabilities at the end of the reporting period on the surplus for the period and equity for a 1% change in interest rates. It is assumed that the change in interest rates is held constant throughout the reporting period.

		-100 basis points		+100 basis points	
	Carrying amount	Profit $	Equity $	Profit $	Equity $
2010					
Financial Assets					
Cash and cash equivalents	8,227,407	(82,274)	(82,274)	82,274	82,274
		(82,274)	(82,274)	82,274	82,274

2009

Financial Assets

Cash and cash equivalents	7,783,338	(77,833)	(77,833)	77,833	77,833
		(77,833)	(77,833)	77,833	77,833

Fair Values

All financial assets and liabilities recognised in the Statement of Financial Position, whether they are carried at cost or fair value, are recognised at amounts that represent a reasonable approximation of fair value unless otherwise stated in the applicable notes.

30 REMUNERATION OF MEMBERS OF THE ACCOUNTABLE AUTHORITY AND SENIOR OFFICERS

Remuneration of Members of the Accountable Authority

The number of members of the Accountable Authority whose total of fees, salaries, superannuation, non-monetary benefits and other benefits for the financial year, falls within the following bands:

	2010	2009
$0 - $10,000	11	10
$10,001 - $20,000	2	1
$20,001 - $30,000	-	1

The total remuneration of the members of the Accountable Authority is:	72,522	75,897

The total remuneration includes the superannuation expense incurred by the Authority in respect of members of the Accountable Authority.

Remuneration of Senior Officers

The number of senior officers, other than senior officers reported as members of the Accountable Authority, whose total of fees, salaries, superannuation, non-monetary benefits and other benefits for the financial year, fall within the following bands are:

	2010	2009
$110,001 - $120,000	1	2
$120,001 - $130,000	1	1
$130,001 - $140,000	1	1
$140,001 - $150,000	-	1
$150,001 - $160,000	1	-
$170,001 - $180,000	1	-

The total remuneration of senior officers is:	688,184	646,035

The total remuneration includes the superannuation expense incurred by the Authority in respect of senior officers other than senior officers reported as members of the Accountable Authority.
No senior officers are members of the Pension Scheme.

31 REMUNERATION OF AUDITOR

	$	$
Remuneration payable to the Auditor General for the financial year is as follows:		
Auditing of the accounts, financial statements and performance indicators.	40,000	38,300

32 RELATED BODIES

The Authority had no related bodies during the financial year.

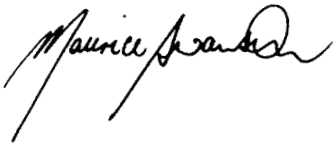
33 AFFILIATED BODIES

The Authority had no affiliated bodies during the financial year.

Certification of Performance Indicators

We hereby certify that the performance indicators are based on proper records, are relevant and appropriate for assisting users to assess the Western Australian Health Promotion Foundation's performance and fairly represent the performance of the Western Australian Health Promotion Foundation for the year ending 30 June 2010.

Rosanna Capolingua
Chairperson



Maurice Swanson
Deputy Chairman

27 July 2010

Key Performance Indicators

Healthway's outcome is to increase individual knowledge and skills, and change behaviour and community and organisational policies and environments to improve health.

KEY EFFECTIVENESS INDICATORS

Healthway's effectiveness indicators report on distinct areas that measure the extent to which Healthway's key outcome has been met.

These indicators are as follows:

- extent to which funded organisations have met the requirements and objectives agreed to with Healthway (refer to contractual evaluation measure);
- extent to which sponsorship as a strategy contributes to health behaviour change (refer to Sponsorship Monitor Survey); and
- extent to which Healthway support has enabled capacity building activities in the community (refer to capacity building indicator).

Since 1992, quantitative evaluative data measuring the outcomes of Healthway funded projects have been extracted and reported by the Health Promotion Evaluation Unit (HPEU) which is an independent academic group based at The University of Western Australia.

Contractual Evaluation Measure

Extent to which funded organisations have met the requirements and objectives agreed to with Healthway

Healthway has adopted a six point scale under a Graduated Project Evaluation approach, developed through HPEU. Each project receives a score by Healthway upon the completion of the project as measured against a set of criteria and contractual obligations. These are then aggregated in the table below and reflected against respective program areas.

Grant and sponsorship recipients are required to complete statistical forms at the conclusion of each project. These are used as part of the project assessment, to arrive at a contractual evaluation measure. Other factors include assessment by Healthway Board members, Committee members and staff or by health agency representatives monitoring the respective grant or sponsorship.

Key to Scores

Score	Descriptive Interpretation	Notional number interpretation
6	The outcomes[1] of the project exceeded those required by the contract to a very substantial degree. The project delivered outstanding value for money.	150%+
5	The outcomes[1] of the project exceeded those required by the contract to a large degree. The project delivered excellent value for money.	120-149%
4	The outcomes[1] of the project were consistent with, or in the vicinity of, those required by the contract. The project delivered good value for money.	95-119%
3	The outcomes[1] of the project fell short of those required by the contract, but were still within the bounds of acceptability. The project delivered marginally adequate value for money.	75-94%
2	The outcomes[1] of the project fell well short of those required by the contract. The project delivered poor value for money.	50-74%
1	The outcomes[1] of the project fell short of those required by the contract to a very substantial degree. The project delivered completely unacceptable value for money.	<50%

[1] Reference to outcomes takes into account measures relating to educational strategies, population reach, contributions to increases in individual knowledge and skills and the extent to which organisations have implemented health policies and maintain a healthy environment. These contractual evaluation measures relate directly to Healthway's overall outcome.

Contractual Evaluation Measures of all Projects and Sponsorships

Contractual evaluation measure: Average contractual evaluation score (cf. Norm of 4.0)	2010/11 Target	2009/10 Actual	2008/09	2007/08	2006/07
Health Promotion Projects	4.0	3.9	4.1	3.9	4.0
Arts projects	4.0	4.0	4.0	4.1	4.1
Sport projects	4.0	3.9	4.0	3.9	3.9
Racing projects	4.0	4.1	4.0	4.0	4.3
Support Sponsorship	4.0	3.9	4.0	4.0	4.1

The contractual evaluation measures for 2009/10 are consistent with previous years and generally within the targets established for the period. The measures reflect that grant and sponsorship recipients continue to understand and meet Healthway's objectives and the requirements contained within grant and sponsorship agreements. These requirements generally include the implementation of health promoting policies and environmental changes as part of an organisation's operations. Under the new sponsorship reforms organisations in receipt of a grant or sponsorship will need to meet minimum health promotion, structural and co-sponsorship requirements covering areas such as tobacco control, nutrition and alcohol.

The reports from the Organisational Survey 1992 – 2009 were completed by HPEU in July 2010 and volume 4 of the survey results reported on relationships between Healthway and sponsored organisations. The survey was conducted in 2009 and sampled all organisations that completed Healthway funded projects after 30 April in the preceding year and commenced projects before 30 April in the Survey year. In 2009, 302 organisations were contacted, consisting of 285 sponsored sport, arts and racing organisations and 17 health organisations.

The Survey confirmed that a high proportion of organisations reported a positive sponsorship relationship with Healthway,that Healthway's performance met their expectations and that Healthway's expectations of their organisation were reasonable. The implementation of health promotion programs was positively perceived by sponsored groups and health organisations. This survey has been repeated in 2009/10 and the results are reflected in this section under Capacity Building.

In the period ahead, Healthway will continue to support organisations to meet contractual obligations in a manner that will also help maintain health promotion outcomes beyond the terms of the contract.

Targets proposed for 2010/11 are consistent with prior years and will incorporate the part-year implementation of a sponsorship review to be undertaken during 2009/10 which has result in more focused sponsorships and acquittal requirements. The targets for each sponsorship and grant program is set at an average of 4.0 acknowledging that projects are expected to meet the contracted obligations, provide good value for money and that Healthway is supporting projects meet these targets during a period of transition in implementing the recommendations of the Sponsorship review.

Sponsorship Monitor Survey

Extent to which sponsorship as a strategy contributes to health behaviour change

	2010/11 Target	2008/09	2006/07	2004/05
% People attending Healthway sponsored events who were aware of the health message	74%	74%	72%	67%
% People attending a Healthway sponsored event who correctly understood the health message	62%	58%	65%	63%
% People who showed intention to act on health message	18%	17%	21%	17%

As part of their evaluation work, HPEU has developed a standard set of instruments and methodology, which have been published in the peer reviewed scientific literature[2], enabling them to undertake extensive audience surveys at Healthway sponsored events. These surveys, compiled over the course of a year are collectively known as the "Sponsorship Monitor" and measure the impact of health messages on audiences, including health message awareness, understanding of the message and intention to act on the message promoted at the event.

[2] Donovan R, Jalleh G, Clarkson J and Giles-Corti B. 1991. Evidence for the effectiveness of sponsorship as a health promotion tool. Australian Journal of Primary Health Interchange 5 (4) 81-91

These studies confirm the effectiveness of sponsorship as a strategy to achieve high levels of awareness and comprehension of health messages at sport, arts or racing events. They also provide evidence that health sponsorship can lead to behaviour change.

Due to the complexity of the survey and the analysis required, these extensive surveys are generally undertaken every alternate year.

The most recent Sponsorship Monitor was completed during 2008/09. A total of 2,407 people completed an evaluation survey at a sponsored event and almost one half of all surveys completed were self administered child surveys, which reflects the nature of Healthway sponsored events in the 2008/09 year. For each organisation included in the evaluation, one sponsored event/activity was randomly selected to represent the sponsorship and an independent data collection service performed the field work. The interviewers followed a standardised methodology which includes collecting a minimum of 50 interviews from audience members selected at random at each event. Depending on the venue, activity and target audience, either interview administered or self administered surveys were used to collect the data. Children and adolescents were always provided with self-administered surveys.

Data collection for the 2008/09 Sponsorship Monitor took place from May 2008 to April 2009 and involved audience surveys from randomly selected events representing 34 major Healthway sponsored sport, arts and racing projects in metropolitan and regional areas. The sample of projects is based on the standardised methodology for the Sponsorship Monitor, which enables the results to be compared across different years. The sample consists of all sponsorship projects funded above a pre-agreed dollar level. Some variability of the Survey results between sponsorship years is expected as the sampling distribution varies according to the type of major sponsorship projects supported by Healthway in that year. In 2008/09, significantly fewer interview-administered surveys were completed in comparison to previous years, which is reflective of differences in the types of projects sponsored within the data collection period. The 2008/09 sample also contained a significantly larger proportion of children aged 10-12 years than previous Sponsorship Monitors.

Total awareness of health messages at Healthway-sponsored events in this period was significantly higher than in previous years Although the measure of understanding the health message was lower than previous years, it is important to note that the percentage of audience members intending to act on the message promoted at events was in line with the target level and close to the average over previous survey years.

The increase in awareness levels in part reflects the emphasis during the year on strategies that have been evaluated and have proven effectiveness such as large well-placed signs, moving signage, frequent announcements about the message at events. The slightly lower levels of message understanding are considered to be due to the greater proportion of children in the sample in 2008/09, the mix of health messages promoted in sponsorship projects during the year, and the larger number of self-completed versus interviewer administered questionnaires used to collect the data. The particular mix of health messages applied to events and new health messages introduced for children require time to be correctly understood.

The Sponsorship Monitor Surveys provide evidence over many years that a consistently high percentage of people attending events are aware of and understand the health promotion message promoted at Healthway-sponsored events, and process the information to the extent that they form an intention to act on the messages promoted.

In light of the changes introduced to the sponsorship program in 2009/10 future sponsorship monitor surveys will employ a modified sampling methodology, as not all Healthway sponsorships from 2010/11 will incorporate message promotion objectives. The target figures in the table are therefore based on expected performance of message promotion sponsorships in 2010/11 based on past performance.

During the year Healthway will also be working closely with HPEU to develop performance indicators for the newly introduced participation and structural reform sponsorships.

Capacity Building

Extent to which Healthway support has enabled capacity building activities in the community

The Healthway Strategic Plan 2008-2011 places a priority on building and sustaining capacity of individuals, organisations and communities to promote and improve the health of Western Australians which is recognised in the two overarching themes being "sustainable change" and "investing in the future".

For Healthway, capacity building recognises the development of sustainable skills, structures, resources and commitment to embrace behavioural change that continues beyond the term of a project or program.

Healthway has identified four capacity building domains as follows:

1. Organisational commitment including policy changes;
2. Building partnerships and creating supportive environments;
3. Building health promotion skills and activities; and
4. Reaching new priority groups.

These domains form part of an extensive and comprehensive Organisational Survey conducted independently by the Health Promotion Evaluation Unit (HPEU) approximately every four years. Therefore to provide ongoing comparative data an abridged survey is conducted every two years as shown in Table A below. In view of the full Organisational survey undertaken during 2009/10 the next abridged survey will be undertaken in two years in 2011/12.

Table A below presents comparative data from the both surveys relating only to the responses of sport, arts and racing organisations (i.e. the impact of responses from health organisations has been removed from the Organisational Survey results in 2005/06).

The results in Table A show similar levels of capacity development amongst the sport, arts and racing organisations in the field study compared with those surveyed in 2005. The data indicate that Healthway had a strong influence in the large movement in the proportion of organisations that had increased organisational commitment to health and implemented health priorities. The 2007 data also provides evidence for the continued effects of Healthway on sponsored sport, art and racing organisations beyond the term of Healthway funding.

Table B below provides the results of the full set of data as collected in previous surveys. The 2009 Organisational Survey results in Table B indicate that capacity building measures/indicators relating to the implementation of health policies, health promotion skills and reaching new priority groups have generally increased compared with 2001/02 and maintained similar levels compared with 2004/05.

The targets established for 2009/10 are also included in Table B below. The results of the 2009 organisational survey showed that Healthway continued to have a strong influence across all four capacity building indicators, particularly in the "health promotion Skills/Activities dimension", which was higher than 2006 and 2007. "Building partnership and Environments" and "Reaching new target groups" were observed to show a high level of impact amongst funded organisations, which was similar to previous years.

Creating "organisational commitment/policy changes" remained high in 2009, but was lower than the previous survey conducted in 2007 which recorded a result of 82% compared to 75% in 2009. In part this reflects changes in the wording of the questions in the 2009 survey. However, a field study conducted by HPEU titled "Views of Sport, Arts and Racing Organisations on Healthway's Health Policy Requirements" reported that these sponsored groups have reported a number of challenges in developing, implementing and enforcing health policies. It is now envisaged that the streamlining of the sponsorship program going forward will help to reduce the overall burden of compliance on sponsored groups.

The overall trend of the data suggests that Healthway continues to invest in areas that are impactful on health promotion capacity building across the four broad dimensions measured. The results also suggest that organisations in receipt of Healthway funding are able to deliver on a range of activities that align with Healthway's stated capacity development objectives.

In view of the implementation of the Strategic Plan 2008-2011 it is also envisaged that a review of the questions and approach of the Organisational Survey will be undertaken by Healthway and HPEU during the year ahead. Accordingly there may be some revision of the capacity building indicators and measures in the future.

Table A

Abridged Survey	2007/08	2005/06
Surveyed projects (number)	112	462
% organisations implementing health policies and demonstrating commitment to health promotion	82	78
% organisations building partnerships and creating supportive environments	72	70
% organisations commitment to building and sustaining health promotion skills	64	65
% organisations reaching new priority groups	62	62

Table B

Full Organisational Survey	2009/10 Target	2009/10 Actual	2005/06	2004/05	2001/02	1997/98
Surveyed projects		302	462	220	672	616
% organisations implementing health policies and demonstrating commitment to health promotion	75	75	75	75	61	50
% organisations building partnerships and creating supportive environments	65	70	63	65	67	64
% organisations committed to building and sustaining health promotion skills	74	72	73	69	68	74
% organisations reaching new priority groups	69	64	69	70	66	57

Grants and Sponsorships

The efficiency indicator measures the average administrative cost for every $100 of approved funding for the WA community through the grant and sponsorship programs.

Administrative costs are apportioned between health promotion capacity building projects and grant and sponsorship activities. This apportionment is based on a methodology that involves detailed process mapping of organisation wide work flow analysis assessing the direct proportion of labour effort component for processing, assessing, monitoring and acquitting grants and sponsorships which is utilised as the basis for calculating this efficiency indicator.

Grant and sponsorship workflows remained consistent with previous years and will be reviewed in 2010/11 to measure the impact of the recently implemented sponsorship reforms on processes.

The table below shows the movements in administrative corporate costs associated with planning, assessing, approval, monitoring and acquittal of grants and sponsorships. During 2009/10 additional once-off costs of relocating Healthway's premises and other higher charges impacted on the average administration cost per $100 of approved funding costed at $12.73.

In 2010/11 the average administrative cost per $100 of approved funding is expected to be consistent with the 2009/10 level at $12.34 after allowing for once-off costs in 2009/10 and the full year impact of accommodation rental and salary increases.

	2009/10 Target	2009/10 Actual	2008/09	2007/08	2006/07
	$	$	$	$	$
Average cost per $100 of approved funding	11.04	12.73	10.60	9.98	9.40

Capacity Building

Healthway has a clear commitment to building and sustaining health promotion capacity through its grant and sponsorship programs. Healthway activities reflect the continued support for the World Health Organisation's philosophy and directions for health promotion, set out in the Ottawa Charter for Health Promotion 1986, which outlines that effective health promotion is based on:

- Building health public policy;
- Creating supportive environments for sustainable change;
- Strengthening community action;
- Developing personal knowledge and skills;
- Promoting shared community and social responsibility for improving health;
- Developing, consolidating and expanding partnerships for health;
- Increasing the skills and resources of communities to promote healthy behaviours; and
- Empowering individuals to make informed decisions

Successful funding applications that contain a health promotion capacity building component are reflected in the indicator below as an average cost per application for Healthway support provided towards assisting recipients to implement and sustain capacity building.

This support includes pre-funding application meetings with organisations to outline health policy requirements, support provided to health agencies which work with funding recipients and program specific workshops/seminars to encourage capacity building in funding applications.

This indicator is calculated using a measure of the level of direct labour effort contributed to capacity building activities as a portion of total Healthway administrative costs and taking into account the number of capacity building applications for the year.

In 2009/10 additional once-off costs of relocating Healthway's premises and other higher charges impacted on the average cost per capacity building project costed at $592.

In 2010/11 the average cost per capacity building project is expected to remain consistent with the previous year at an average cost of $591.

	2009/10 Target $	2009/10 Actual $	2008/09 Actual $	2007/08 Actual $	2006/07 Actual $
Average cost per funding application with a capacity building component	546	592	523	515	503
