ABOUT HEALTHWAY

Healthway (the Western Australian Health Promotion Foundation) was established in 1991 under Section 15 of the Tobacco Control Act 1990 as an independent statutory body reporting to the Minister for Health. Healthway now functions under Part 5 of the Tobacco Products Control Act 2006.

Healthway provides sponsorship to sports, arts, and racing organisations to promote healthy messages, facilitate healthy environments and increase participation in healthy activities. Healthway also provides grants to a diverse array of organisations to encourage healthy lifestyles and advance health promotion programs.

The key priorities for Healthway are reducing harm from tobacco, reducing harm from alcohol, reducing obesity and promoting good mental health.

Chairperson's Report

I am pleased to present the Healthway annual report for 2010/11, a year of great challenges and opportunities in health promotion.

One of these challenges is the growing problem of alcohol-related harm, a high priority for Healthway, which was highlighted with the tabling in the WA Parliament of the Education and Health Standing Committee report *Alcohol: Reducing the Harm and Curbing the Culture of Excess* in June 2011. The Committee spent the previous year taking testimony and evidence from hundreds of community members, industry representatives and health experts.

As a GP, I see the harmful effects of alcohol abuse in our community first-hand. Under the onslaught of heavy alcohol marketing and the cultural acceptance of drunkenness, Western Australia is in the grip of a serious problem. The strong culture of high risk drinking causes acute harm and well recognized long term adverse effects on health. Excess alcohol consumption also contributes to a range of social problems such as road trauma, domestic violence, family breakdowns and criminal behavior.

Annual alcohol consumption in Australia ranks 35th in the world, yet WA is placed much higher at 10th in this international ranking. At least 75% of all police responses across the State are alcohol-related and managing the negative effects of alcohol consumption in WA costs the community between $1.5 and $2 billion each year.

All this occurs in an environment where alcohol marketing and promotion is inescapable. Alcohol companies spend nearly $500 million each year in Australia marketing their products, with the majority spent on sponsorship of activities and events. There is good evidence this marketing investment increases alcohol consumption in young people and influences binge drinking.

We are aware that community concern around the issue of alcohol promotion is mounting. A recent survey of 2000 community members by researchers at the University of WA found that nearly two-thirds (65%) of respondents disagreed with the promotion of alcohol at events where children are spectators and fewer than 1 in 5 (19%) people agreed with the practice. Another survey on behalf of health insurer HBF and the West Australian newspaper found that 59% of people agreed that all alcohol advertising and sponsorship during sport, including televised games should be banned, compared with 48% support in 2010 and 45% in 2009.

I am pleased that over the past year Healthway, together with our partners in sport, arts and racing, has pushed back against the tide of alcohol promotion through community sponsorship. Approximately 1 in every 10 organisations applying for Healthway sponsorship during 2010/11 was required to reduce unhealthy promotions associated with their activities as a condition of funding.

According to demographic data supplied by the organisations, the combined reach of Healthway-sponsored arts, sport and racing activities that agreed to reduce unhealthy promotions linked to sponsorship arrangements during 2010/11 was over 900,000 people. The majority of this number would be children and young people.

Healthway continues to fund innovative health promotion projects designed to support local action to prevent alcohol-related harm. In partnership with the WA Drug and Alcohol Office and the Department of Health, our Community Alcohol Grants supported a range of projects during 2010/11 in regional towns such as Warburton, Roebourne and Bunbury. This funding program supports effective locally targeted solutions to alcohol-related problems, through funding projects delivered by community organisations and service providers working in partnership.

The release this year of the 2010 Health and Wellbeing of Adults in WA survey by the WA Department of Health highlighted some of the other health challenges we are facing. Around 1 in 6 adults (14.8%) in WA have had a mental health condition diagnosed in the past year and promoting positive mental health is another high priority area for Healthway's work. During the year we renewed our commitment to the highly successful Mentally Healthy WA campaign,

as well as funding new research focusing on young people and identifying culturally appropriate approaches to preventing mental health problems among Aboriginal people.

In addition, the 2010 Health and Wellbeing of Adults in WA survey underlined the continuing rise in overweight and obesity, with more than one in four adults in WA now classified as obese, compared with one in five just 8 years ago. It is clear that this complex problem requires a comprehensive approach and during the year Healthway funded a number of new research studies to address the issue from different perspectives, including testing different formats for nutrition information at fast food outlets, developing a health-related rating measure for movement-based video games and a trial of a family-based intervention program for overweight adolescents.

As part of Healthway's focus on empowering individuals, groups and communities to be healthier, Healthway places capacity building at the centre of much of its work, to ensure the necessary skills to achieve good health are nurtured within the community. It is pleasing therefore that in 2010-2011, a number of grants were awarded that focus on capacity building including a Research Scholarship, a Visiting Fellowship, a Starter grant and a major health promotion project that will seek to build capacity in evidence-based health promotion amongst Aboriginal people.

I would like to acknowledge the invaluable contribution and support of my fellow board members and the commitment of the many experts who serve on Healthway advisory committees. I greatly value and thank the hard working Healthway team, and the leadership of David Malone. It is together, with their dedication, that we are able to deliver Healthway's mission to protect and promote the heath of Western Australians and face the challenges ahead.

Associate Professor Rosanna Capolingua
Chair of the Healthway Board

From The Executive Director

The past year, in which Healthway celebrated its 20th anniversary, has been another busy and exciting year. 2010/11 is perhaps best defined by the implementation of several important reforms across Healthway's sponsorship program.

The sponsorship program is critical to the effectiveness of Healthway and accounts for approximately 60% of the organisation's annual expenditure. While independent evaluation of the sponsorship program has demonstrated its ongoing effectiveness as a strategy to facilitate healthy behavioural change, Healthway's approach to sponsorship continues to evolve in response to the changing environment, emerging evidence and community expectations.

The level of alcohol and unhealthy food or drink promotion through sponsorship arrangements continues to be a major concern for Healthway's Board. Peer-reviewed evidence demonstrates that alcohol promotions increase alcohol consumption and influence binge drinking. Likewise, there is good evidence that junk food promotions influence children's diets and food preferences. The Healthway Board has to consider these powerful drivers in the context of comparatively high levels of alcohol related harm and obesity in the Western Australian community.

Healthway's approach to co-sponsorship with companies promoting alcohol or unhealthy foods continued to evolve over the past year. New processes were introduced whereby all sponsorship applications are routinely scrutinised for alcohol, food and drink co-sponsorship arrangements and assessed by a standing committee comprised of experts in sponsorship, communications, and nutrition and alcohol policy. The revised approach ensures all co-sponsorship arrangements are captured at the application stage and organisations applying for sponsorship are treated equitably. Approximately 11% of sponsored organisations were required to reduce or discontinue promotions for alcohol or unhealthy foods as a condition of Healthway funding over the past year.

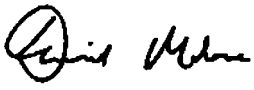
Sponsorship has increasingly become a competitive and crowded marketing medium, where innovative activation strategies and clever positioning of a sponsorship message are critical for success. In addition to a stronger stance on co-sponsorship (which improves the competitive positioning of health messages) a number of other reforms were introduced over the past year to ensure Healthway's sponsorship program remains competitive and effective:

- The executive team within Healthway was expanded through the recruitment of a new Director of Sponsorship, reporting directly to the Executive Director. Our Director of Sponsorship is currently in the process of developing the sponsorship team, reviewing sponsorship strategies, and building stronger linkages with health promotion campaigns.
- A new approach to sponsorship support was adopted from July 2011, whereby marketing support activities for the majority of Healthway sponsorships are implemented under a consistent strategic framework with more flexibility to match sponsorship support budgets to unique opportunities.

Competition for sponsorship remains high as the number of organisations applying for Healthway sponsorship continues to increase each year. 236 organisations applied for sponsorship (over $5,000) in the 2010/11 year, up from 163 in 2009/10. Despite the fact that the program remains heavily over-subscribed, 89% of organisations who applied for sponsorship in 2010/11 received some level of funding. The development and introduction of a sponsorship assessment tool, whilst in its infancy, has bought a greater level of objectivity to the sponsorship assessment process and is expected to better align sponsorship funding decisions with Healthway objectives.

Of course, Healthway continued to support innovative health promotion projects, capacity building activities and health promotion advocacy over the past year. There are many other achievements detailed in this Annual Report that provide an overview of Healthway's successes over the past year and I commend this report to you.

In closing, I acknowledge the outstanding leadership provided by Healthway's Chairperson, Associate Professor Rosanna Capolingua, and the invaluable support and dedication of Healthway's Board members. As always, the achievements of Healthway would not be possible without the hard work and professionalism of Healthway's staff. I am very proud to be a part of our team.



David Malone
Executive Director

Department of Health: campaign funding arrangements

The Department of Health's health promotion campaign contracting arrangements were reviewed over the past year. Under revised arrangements, the National Heart Foundation (WA Branch) will create a new healthy lifestyle campaign to better link messages and initiatives targeting diet and physical activity. The campaign funding will run from 1 July 2011 to 30 June 2014.

The healthy lifestyle promotion campaign will be the flagship for the Department's new approach to the promotion of a healthy lifestyle. It will create a new single healthy lifestyle brand that will be used to coordinate and integrate initiatives, messages and programs targeting diet, physical activity, and overweight and obesity. The campaign will use a comprehensive multi-message approach combining persuasion and access to accurate and practical information about lifestyle change for adults and parents. The new campaign will replace the Find Thirty every Day, Go for 2&5 and Draw the Line campaigns.

The Department's new approach has a number of ramifications for Healthway. Importantly, there will be new opportunities for Healthway to partner in the development of campaign messages that are both effective in sponsorship settings and aligned to Healthway priority areas.

Australian National Preventive Health Agency

The Australian National Preventive Health Agency (ANPHA) was established on 1 January 2011. The Federal Government established ANPHA to strengthen Australia's investment and infrastructure in preventive health. The new agency will receive approximately $133 million of federal funding over the next 4 years, with the majority of this amount allocated for social marketing campaigns. The priorities of ANPHA are closely aligned to those of Healthway and the establishment of this new agency, together with the increased federal investment in preventive health measures, heralds a new era of opportunity in health promotion. The investment in new social marketing campaigns and brands is likely to provide Healthway with more flexibility and options to leverage healthy messages through sponsorships.

An expert Advisory Council for ANPHA will provide advice and make recommendations to the Agency's CEO. Professors Mike Daube and Rob Moodie have been appointed to the Advisory Council, in a move expected to facilitate links with the two state-based health promotion foundations; Healthway and VicHealth. Professor Daube is a member of Healthway's board and Professor Moodie is a past CEO of VicHealth. The Council will be chaired by Professor Christine Bennett, Dean of Medicine at the University of Notre Dame.

Alcohol-related harm in the Western Australian community

The Education and Health Standing Committee of the Western Australian Parliament tabled the report Alcohol: reducing the harm and curbing the culture of excess in June 2011. The report highlights the significant problem and concerning trend of alcohol-related harm in the Western Australian community.

Annual alcohol consumption in Australia ranks 35th in the world, yet WA is placed much higher at 10th in this international ranking. At least 75% of all police responses across the State are alcohol-related. 60% of Department of Child Protection clients have alcohol and drug problems. Between 20-30% of drivers and riders involved in serious or fatal crashes have a blood alcohol level above the legal limit. Managing the negative effects of alcohol consumption in WA costs the community between $1.5 and $2 billion each year.

Public concern regarding alcohol and junk food sponsorship

Surveys indicate the Western Australian public is becoming increasingly concerned about alcohol and junk food promotions through sponsorship arrangements. A number of community surveys have examined public opinion on the issue of alcohol and unhealthy food sponsorship of community activities and events over the past year:

In 2010, the Health Promotion Evaluation Unit (HPEU) at the University of WA published the findings of a cross sectional survey of attendees at the Family and Youth Zones, held as part of the Australia Day celebrations on the South Perth foreshore. The results of the study showed that the majority of respondents (72%) believed that fast food company sponsorship at junior sports and arts events sends conflicting messages to children and most believed it encourages them to eat fast food (60%).

A random household telephone community survey undertaken by HPEU in November 2010, with a sample size of over 2000 respondents, found that nearly two-thirds (65%) of respondents disagreed with the promotion of alcohol at events where children are spectators and less than 1 in 5 (19%) agreed with the practice.

A recent community survey of 600 West Australian adults undertaken on behalf of health insurer HBF and the West Australian newspaper found that 59% of those surveyed called for all alcohol advertising and sponsorship during sport, including televised games, to be banned. This finding compares with 48% support in 2010 and 45% in 2009.

Board Members

Membership of the Board of Healthway is set out under section 61 of the Tobacco Products Control Act 2006.

Under the Act, the Board consists of 11 members of whom one is to be the chairperson appointed by the Minister for Health on the nomination of the Premier.

The remaining 10 members of the Board are appointed by the Minister for Health on the nomination of stakeholder groups, as set out in the Act.

On June 30 2011, the members of the Board were:

ASSOCIATE PROFESSOR ROSANNA CAPOLINGUA

Chairperson

Associate Professor Capolingua joined the Board of Healthway as the nominee of the Australian Medical Association (WA) in 2000 and was appointed Chairperson in 2009.

Dr Capolingua has played an active leadership role within the medical profession and she has a keen interest and extensive experience in community health and effective governance of public and private organisations.

She has been a general practitioner in Perth for more than 20 years and is principal of her own successful medical practice. She served two terms as State AMA President and two terms as AMA National President where she chaired the AMA Ethics and Medico Legal Committee and the Taskforce on Indigenous Health.

She is a member of the Council and Board of the Medical Defence Association, the Board of St John of God Healthcare, the University of WA's Raine Foundation, Health Training Australia and the Board of Governors of the University of Notre Dame.

Dr Capolingua is a former member of two National Health and Medical Research Council advisory bodies, has served on the Medical Board of WA, has chaired the Australian Publishing Company and is a former Board member of MercyCare.

As Medical Director of the AMA (WA) Youth Foundation, Dr Capolingua is the driving force behind the Dr Yes and Youth Friendly Doctor programs which have helped more than 90,000 high school children deal with issues such as sexual health, mental health, drugs and alcohol.

MR CATHCART WEATHERLY

Deputy Chairperson

Mr Weatherly was appointed to the Board as the nominee of the WA Arts Federation.

He has a passionate interest in the arts, culture and social justice issues.

Originally from Tasmania, he moved to Western Australia in the 1990's and, in 1996, was appointed founding Executive Director of the Community Housing Coalition of WA – the peak representative body for non-government, not-for-profit housing providers. In that role he was a member of many state and national committees including a three year term as Chairperson of the Community Housing Federation of Australia and a Board member of the WA Council of Social Service (WACOSS).

In 2001, he served on the State Government's State Homelessness Task Force which inquired into and proposed an action plan for resolving the issue of homelessness in WA.

From July 2005 to December 2010, Mr Weatherly was the General Manager of the Spare Parts Puppet Theatre in Fremantle. Currently working in his own consultancy, he is a Board member of the Chamber of Arts and Culture Western Australia.

PROFESSOR MIKE DAUBE

Professor Daube was appointed to the Board in December as the nominee of the Australian Council on Smoking and Health (ACOSH). He is the President of ACOSH.

Professor Daube is Professor of Health Policy at Curtin University and Director of the Public Health Advocacy Institute and the McCusker Centre for Action on Alcohol and Youth.

Before joining Curtin University in January 2005, Professor Daube was Director General of Health for Western Australia. He has played a leading role in health administration and advocacy in Australia and internationally since 1973. Since moving to WA in 1984 he has held many key roles in both government and non-government organisations in WA, nationally and internationally.

CR WALTER BARRETT

Mr Barrett was appointed to the Board as the nominee of the WA Local Government Association (WALGA).

Since 1994, he has been an elected councillor on the Shire of Murray and is the Deputy Shire President.

He served as a police officer in Western Australia for 34 years and after retiring as a First Class Sergeant in 1993, Mr Barrett became very involved in local government and community health.

He is a member of the Shire of Murray's Corporate Services, Technical Services and the Planning and Development Committees, the Local Government Reform Committee, and Rivers Regional Council. He represents the Peel Zone on WALGA's State Council and is a member of the Municipal Waste Advisory Committee and the Finance and Planning Committees of WALGA.

Mr Barrett has been a part time investigator with the Health Department of WA's Smoking and Health Program Team helping to ensure retailers comply with the Tobacco Control Act, now the Tobacco Products Control Act. He is also a member of the Australian Institute of Company Directors.

CLINICAL PROFESSOR GARY GEELHOED

Dr Geelhoed was appointed to the Board as the nominee of the Australian Medical Association (WA).

He is a medical expert on child health, a paediatrician and Director of Princess Margaret Hospital for Children's Emergency Department since 1990.

He is also involved in medical research on many areas of children's health and has contributed to medical textbooks including the ***Encyclopaedia of Respiratory Medicine*** and the ***Textbook of Paediatric Emergency Medicine.***

Dr Geelhoed is the immediate past State President of the AMA (WA) and is a member of the AMA's Federal Council.

As AMA (WA) President, Dr Geelhoed was a strong advocate for public health and campaigned strongly to encourage local councils to introduce smoking bans in alfresco dining areas.

His successful campaign to encourage Subiaco City Council to reverse its policy on smoking led to the AMA (WA) winning the 2009 Public Health Award presented by the Federal AMA.

Dr Geelhoed worked for many years with Princess Margaret Hospital's Child Protection Unit Committee and has chaired the State Trauma Advisory Committee.

MS MARGARET DAWKINS

Ms Dawkins was appointed to the Board as the nominee of the Department for Communities which develops policy, delivers programs and funds community organisations on behalf of the state government in the areas of early years, children, youth and families.

Her role as Executive Director, Policy and Planning also encompasses policy and program development in the areas of women's interests, carers, seniors and volunteering. Ms Dawkins has many years' experience in strategic administration and planning and research roles in the public sector.

She is a current member of the State Government's Drug and Alcohol Senior Officers Group and the Crime Prevention Senior Officer's Group. Ms Dawkins has previously headed the Office for Youth, the Office for Seniors Interests and the State Government's Volunteering Secretariat. She originally trained as a psychologist and teacher and has worked as both a practitioner and in research and evaluation in the child abuse and broader social welfare areas.

JENNIFER RIATTI

Ms Riatti was appointed to the Board as the nominee of the Department of Sport and Recreation (DSR) where she is Director, Programs and Services.

Ms Riatti has a wealth of experience working with government at state and national level on a wide range of community issues.

Prior to joining the staff of DSR, Ms Riatti was Manager of the Premier's Physical Activity Taskforce from 2002 to 2008 within the Department of Premier and Cabinet and later at DSR.

Ms Riatti previously worked at the Department of Immigration and Ethnic Affairs and the Department of Employment, Education and Training in Canberra. Ms Riatti was also Coordinator of the implementation of the National Collaborative Adult English Language, Literacy and Numeracy Strategy.

Ms Riatti has extensive experience in the TAFE system in managerial roles. Between 1997 and 2002, she was Portfolio Manager, Vocational Education and Training Programs within Commercial and International Operations at West Coast College of TAFE.

COLIN WALKER

Mr Walker was appointed to the Board as the nominee of the Department of Culture and the Arts. He is the Director of the Department's Cultural Development and Strategic Programs.

Mr Walker is a senior arts manager with extensive experience and networks in the private, not for profit arts and government sectors.

Prior to joining the Department in 2006, Mr Walker was Director, Arts & Business West Midlands in Birmingham in the UK and Head of International Development Arts & Business in London.

He has acted as an arts sponsorship consultant to a range of international brands and many of the most recognisable arts institutions in the UK.

In his current role with the Department of Culture and the Arts, Mr Walker is responsible for developing and implementing the Department's policies relating to Indigenous arts, young people and the arts, the collections sector, international, urban planning, public art, digital arts, research, arts in health and arts in education. He is Chair of the Urban Art sub-committee of the State Graffiti Taskforce.

MR ANDREW WATT

Mr Watt was appointed to the Board as the nominee of the Australian Council for Health, Physical Education and Recreation WA (ACHPER), an organisation of which he is President.

He is a Senior Associate at Creating Communities Australia where he manages a range of community and economic development projects which involves working with key stakeholders across government, non-government, business and resource sectors to plan and activate towns and cities.

Mr Watt has previously held several positions with the Department of Education and Training including School Principal, Manager District Operations, Project Manager of Local Area Planning, Deputy Principal and teacher. Mr Watt was also the Primary Project Leader of the Be Active School and Community Project which was funded by Healthway.

PROFESSOR TARUN WEERAMANTHRI

Dr Weeramanthri was appointed to the Board as the nominee of the Department of Health. After clinical training in WA, Dr Weeramanthri worked in the Northern Territory from 1991-2007, first in Aboriginal health research, and then as an outreach and specialist physician. He helped develop the NT Preventable Chronic Disease Strategy, and became NT Chief Health Officer in 2004. He returned to WA in 2008 to establish a new Public Health Division within the WA Department of Health where he is Executive Director Public Health and Chief Health Officer. His interests are in the contribution public health can make to Aboriginal health improvement, health services research, use of new social networking technologies in public health and the implementation of health policy.

BOARD MEMBERS DURING 2010/11 INCLUDED:

MR MAURICE SWANSON – to December 2010

Mr Swanson was appointed to the Board as the nominee of The Australian Council on Smoking and Health (ACOSH) in December 2000.

He is currently Chief Executive of the Heart Foundation (WA Division) and prior to joining the Heart Foundation in 1998, he was Director, Health Promotion Services with the Health Department of WA.

Mr Swanson's term on the Healthway Board concluded in December 2010

MR MIKE ALLENBY – to June 2011

Mr Allenby was appointed to the Board as the nominee of the WA Sports Federation (WASF) in March 2009.

Mr Allenby was Chief Executive Officer of the WA Cricket Association from 1998 to 2001 and has been a board member of WASF since 1998 and is currently chairperson of the WASF Board.

Mr Allenby is a Fellow of the Australian Institute of Management as well as Fellow of the Institute of Company Directors with a BSc in Chemistry.

Mr Allenby resigned from the Board in June 2011.

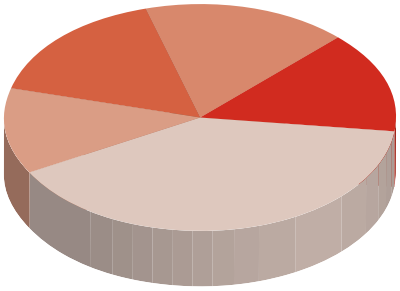
Healthway's strategic framework 2008-2011 focuses on four priority areas and is guided by four overarching themes.

The priority areas are reducing harm from tobacco, reducing harm from alcohol, reducing overweight and obesity and promoting good mental health. The overarching themes to the strategic framework are reducing inequalities, building and using the evidence, sustainable change, and investment in the future.

PERFORMANCE IN HIGH PRIORITY HEALTH AREAS

The highest priority health issues in Healthway's 2008-2011 Strategic Plan are reducing harm from tobacco and alcohol, preventing overweight and obesity, and promoting mental health and wellbeing. In 2010/11, more than 83% of Healthway funding across all program areas was allocated to these high priority health issues.

Percentage of Healthway funding in 2010/11 allocated to high priority health issues (across all program areas)



Tobacco smoking control **14.5%**

Overweight and Obesity Prevention **39.9%**

Alcohol and Other Drug Missuse **12.4%**

Mental Health Promotion **16.4%**

Other Health Issues **16.7%**

Reducing harm from tobacco

While the prevalence of smoking continues to fall, tobacco use is still estimated to kill 1,200 West Australians annually, costing the Australian community more than $31 billion nationally.

Healthway continues to play a leadership role in tobacco control in WA through sponsorships and through health promotion grants. In 2010/11 Healthway allocated nearly 15% of its total budget for grants and sponsorships to tobacco control activities. Although this percentage is less than in previous years, changes to the sponsorship program in 2010/11 introduced the requirement for all outdoor and indoor areas under the control of sponsored organisations to be smoke free from 1 July 2010. As a result of the new condition of funding, fewer sponsorships were allocated tobacco control messages in 2010/11 than in previous years.

For the second consecutive year, Healthway provided a major Arts sponsorship to the Royal Agricultural Society for the 2010 Smoke-free Perth Royal Show, which attracted a record number of visitors. A comprehensive evaluation of the sponsorship was conducted by the Health Promotion Evaluation Unit (HPEU) at the University of WA and found overwhelmingly high public support for the smoke-free policy. Heathway's sponsorship of the Wagin Woolorama, also resulted in WA's second biggest agricultural show, becoming a fully smoke free event. This has since led the way for other regional shows in WA to become smoke free.

Nineteen per cent of the Sport Sponsorship Message Promotion budget was allocated to sponsorships promoting the Smarter Than Smoking and Smoke Free WA messages. Continued sponsorship of key sports such as netball and hockey ensured the Smarter Than Smoking message reached thousands of young participants while support for events such as the Kimberley Cup conducted by the Broome High School and the Port Hedland based Youth Involvement Council's NAIDOC Basketball Tournament, provided an opportunity to reach Indigenous youth in the North West of the State.

Concerns about the higher level of smoking in venues where racing events are held, saw Healthway maintain a strong focus on promoting smoking related messages through the Racing Sponsorship program. Sponsorship of key racing events such as the Targa and Forest Rallies, regional turf clubs, regional speedways and motorcycling provided opportunities in promote key smoking related messages to target populations.

Healthway continued the new Venue Sponsorship program in 2010/11, which was introduced in the previous year. Through this program, Healthway supported a number of significant events and organisations for the purpose of introducing structural reforms including smoke-free outdoor policies. New Venue sponsorships approved in 2010/11 included support for the Perth Zoo and Adventureworld to go entirely smoke-free for the first time.

Healthway allocated 32% of its total funding for health promotion projects in 2010/11 to tobacco control projects, a similar percentage to previous years. Significant funding was allocated to continue support for three major tobacco control initiatives, the Australian Council on Smoking and Health (ACOSH), the Cancer Council of WA's (TCCWA) Make Smoking History project, which is co-funded with TCCWA and the WA Department of Health, and the Heart Foundation's highly successful youth-focused "Smarter than Smoking" project.

Reducing harm from alcohol

Alcohol-related harm affects the entire community and in 2004-5 was estimated to cost $15 billion nationwide. Up to 70% of all police responses are alcohol related and rates of alcohol related harm in young people aged 16-24 years have increased significantly over recent years. Healthway increased its focus on preventing harm from alcohol in 2010/11 and allocated 12% of its total budget to grants and sponsorships addressing alcohol and other drugs misuse, higher than in previous years. In addition, the introduction of a revised co-sponsorship policy on 1 July, has significantly reduced alcohol promotions including signage and other promotional activity associated with Healthway sponsored events and activities.

More than one third of the Sport Sponsorship Message Promotion budget and 6% of the Racing Sponsorship Message Promotion budget was allocated to projects promoting alcohol harm reduction messages. In seeking to reach target audiences Healthway used Western Australian teams participating in national league competitions as a key strategy for raising awareness of the Alcohol Think Again message. National Basketball League teams the Perth Wildcats and the West Coast Waves, together with the West Coast Fever National Netball League team and the Championship winning Perth Heat baseball team ensured the message received considerable exposure over the year. The sponsorship of Barbagello Raceway also provided an avenue to promote the Alcohol Think Again message and at the same time, achieved a significant reduction in alcohol signage and promotions at the venue.

In 2010/11, around 23% of the Arts Sponsorship Program budget was allocated to 36 projects promoting the Alcohol Think Again message. The RTR FM 92.1 Fresh Blast Program provided valuable support to local bands launching their first CD of original music and reached a priority target population, with 2,488 young people attending 12 launches across the metropolitan area. The sponsorship delivered outstanding returns mainly through the use of role models, announcements by the MC, signage and use of merchandise.

In 2010/11 Healthway continued its partnership with the Drug and Alcohol Office and the WA Department of Health to offer Community Alcohol Grants for health promotion and prevention initiatives to reduce harm from alcohol at the community level. The program supported 11 projects across WA including projects in Warburton, Roebourne, Bunbury and the Peel region to address locally identified issues related to reducing alcohol harm. Healthway also entered into an agreement with DAO in 2010/11 to offer a special one-off priority driven research initiative that will focus specifically on informing alcohol policy with a focus on prevention.

A research grant awarded to Dr Mandy Wilson of Curtin University in 2010/11 will use Participatory Action Research methods in a collaborative study between Maamba Aboriginal Corporation and the National Drug Research Institute to better understand how to target Aboriginal young people in the Canning District area with health promotion programs to prevent and reduce alcohol-related harm.

Preventing overweight and obesity

Overweight and obesity are linked with a large number of chronic diseases and rates in the community have dramatically increased since the 1980s. Now affecting more than two thirds of adults and around a quarter of children in WA, the main cause is insufficient physical activity combined with the over-consumption of energy dense foods and drinks. In the current strategic period, Healthway has placed greater emphasis on projects and sponsorships that encourage physical activity and promote healthy eating. In 2010/11 Healthway allocated almost 40% of its budget for projects and sponsorships aimed at preventing overweight and obesity, a considerable increase on 2009/10.

The introduction of Healthway's revised co-sponsorship policy from 1 July 2010 has significantly reduced promotions for energy dense foods and drinks at Healthway-sponsored events and activities. In addition, approximately two-thirds of the total Sport Sponsorship Program budget and over one third of the Racing Sponsorship budget was allocated to sponsorships with a nutrition or physical activity focus. Over 50% of the Sport Sponsorship Program budget was allocated to Healthy Participation projects that delivered significant opportunities for active participation with a preference for participation of Healthway priority population groups. Sponsorships promoting the Be Active and Go for 2&5 messages received nearly 20% of the Message Promotion budget and supported a wide range of programs across many sports including cycling, orienteering, canoeing, badminton, touch, basketball, gymnastics, athletics, baseball, and the equestrian sports.

In the Racing Sponsorship Program almost 50% of the Message Promotion budget was allocated to projects promoting key nutrition and physical activity messages.

As well as supporting a wide range of main stream sport programs with the capacity to engage thousands of young west Australians, Healthway also sponsored less well known activities such as roller skating, calisthenics, ballroom dancing and mass participation community events including the Shire of Mundaring's Trek the Trail and the Town of Kwinana Petscapade.

During 2010/11 Healthway continued to work with the WA School Canteen Association and partner organisations to improve supply and access to healthy food choices. The Healthy Club Sponsorship Program continued to encourage grass-roots sporting clubs to undertake canteen reform and increase healthy food choices, while the WA Football Commission was awarded a Structural Reform sponsorship to develop a pilot program designed to improve food choices in junior football club canteens.

Major racing venues continued to be leaders in nutrition reform with Gloucester Park and Bunbury Turf Club making significant advances in terms of increasing healthy food choices across their venues, whilst decreasing the provision and promotion of unhealthy food and drink choices.

In the Arts sponsorship program, 30% of the budget was allocated to sponsorships focusing on preventing overweight and obesity. An exciting new initiative, Kitchen Whiz Kids, was introduced as part of Healthway's sponsorship of the 2010 Smoke Free Perth Royal Show and involved a state-wide healthy food cooking competition for young people aged 10–12 years. Twenty finalists were invited to participate in a cook-off prior to the show and a recipe book was produced from the competition. Healthway also supported a number of community based arts festivals such as the Ravensthorpe Arts Council's School Holiday Youth Festival, featuring renowned artist/kite maker Mike Alvares, which included Thai cooking classes,

a Country Fruit and Vegetable Competition and other activities to promote the Go for 2 'n' 5 message. The Be Active message was promoted through 18 Arts sponsorship projects in 2010/11, including youth dance activities such the annual program presented by Ballet Workshop that reached more than 11,000 young people in the metropolitan area and five rural towns.

Several new research grants funded in 2010/11 have a strong focus on preventing overweight and obesity. A Starter Grant awarded to Dr James Fogarty at the University of WA in 2010/11 aims to determine if providing energy content information at point of sale at fast food outlets can influence consumer choices. A major three year research grant to Prof Leon Straker of Curtin University of Technology will test a multi-disciplinary family-centred program for overweight adolescents targeting physical activity, nutrition and psychosocial health. Two five-year 'Research into Practice Grants' awarded in 2010/11 will both focus on obesity prevention. The first, to Associate Professor Michael Rosenberg at UWA aims to develop a health related rating measure for movement based video games to inform consumer choice, and the second, to Christina Pollard of Edith Cowan University will establish a collaboration of policy makers and practitioners to undertake extensive further analysis of existing survey data to inform policies and interventions to improve community nutrition.

Mental health promotion

The 2010 WA Health and Wellbeing survey found that more than 25% of adults report symptoms of moderate or high levels of psychological distress, and mental ill-health is the leading cause of the non-fatal burden of disease and injury. Healthway makes a significant contribution to promoting positive mental health through supporting diverse community sport, arts and recreational activities. In 2010/11 Healthway allocated more than 16% of its project and sponsorship funding to projects promoting positive mental health, an increase from the previous year.

In 2010/11 Healthway approved a new year three health promotion grant, which combined with other funding partners, will contribute to a significant expansion of the Mentally Healthy WA campaign over three years, doubling the number of local Act-Belong-Commit sites to more than 50 across WA.

In 2010/11, Healthway funded more than 75 sponsorships promoting the campaign's Act Belong Commit (ABC) health message, a large increase on 2009/10.

The Arts Sponsorship Program continued to strongly promote positive mental health in 2010/11 through the Act Belong Commit and Make time to Talk messages. More than 100 sponsorships, comprising 32% of the Arts Sponsorship Program budget were allocated to this area during the year. Major Act Belong Commit sponsorships included the YOH Fest or Youth on Health Drama Festival, which in 2010, received 291 entries, representing a 60% increase on the previous year and the biggest increase was from the Kimberley region. The event provides a platform for high school students to participate in an innovative approach to health education where entrants develop and perform their own dance, drama, art piece or media production. In 2010/11 YOH Fest focused on the health theme of isolation.

In the last two financial years Healthway's investment in sporting projects promoting a mental health and wellbeing message has increased almost four fold. During the 2010/11 report period the Avon Descent became the second large participation event to receive sponsorship to promote the Act, Belong, Commit message and raise awareness about the mental health benefits of participation. Sponsorship of the Avon Descent and the HBF Run for a Reason ensures extensive promotion of the Act, Belong, Commit message to more than fifteen thousand competitors and volunteers together with the hundreds of thousands of West Australians who follow these events as spectators or through media coverage. In only its second year the HBF Run for a Reason resulted in extensive exposure of the Act, Belong, Commit message as well as more than ten thousand participants completing the 4km and 14km courses.

A three year research grant funded to Professor Stephen Houghton in the

University of WA in 2010/11 will develop and evaluate an interactive multimedia school-based program to identify and address some of the factors influencing loneliness among children aged 10-17 years. A major grant to Dr Debora Brown of Edith Cowan University will extend the earlier Solid Kids Solid Schools bullying prevention project to develop a culturally sensitive bullying prevention campaign in the Midwest Murchison region, supported by whole-school bullying prevention education and specific support for affected Aboriginal students and their families.

REDUCING INEQUALITIES

In 2010/11 Healthway continued to prioritise health promotion activities focusing on population groups at highest risk of poor health, or with unhealthier lifestyles or behaviours. Healthway also supported research and local projects to better understand how these groups can be supported to have healthy lifestyles. The high priority groups identified in the Healthway Strategic Plan 2008-2011 include Aboriginal people, rural and remote populations, economically, socially or educationally disadvantaged groups, and others experiencing inequalities. Healthway's strong focus on regional and remote areas is aligned with the WA government goal of improving the overall quality of life for people living in remote and regional areas of the state. Children and young people remain an important target group for Healthway in the current strategic period, reflecting the evidence linking early childhood experiences and behaviours with lifelong patterns of health.

Increase the focus on promoting and improving health in population groups where health inequalities exist.

Healthway has a strong focus on allocating resources to supporting projects that reach high priority target groups. In 2010/11 Healthway allocated funds to high priority target groups across all its program areas as follows:

Projects and funding to high priority groups in 2010/11 across Healthway programs;

Priority group	% of total projects in 2010/11	% of approved funding in 2010/11
Indigenous people	41.1%	67.3%
Rural and remote populations	54.8%	68.9%
Children and Youth	88.8%	80.7%
Other disadvantaged groups *e.g. low income*	39.5%	69.4%

NB. This classification allows for multiple responses therefore the %'s in the table add to more than 100%

In 2010/11, a higher percentage of Healthway sponsorships and projects reached priority target groups compared with the previous year. The table shows that 41% of projects and 67% of funding was allocated to activities that included indigenous participants, and 55% of projects and 69% of funding was allocated to activities that reached rural and remote populations. In addition, 89% of projects included children and youth, with 81% of funding allocated to activities reaching children and youth, and 40% of projects included other disadvantaged groups such as people on low incomes and culturally and linguistically diverse groups, with 70% of funding allocated to activities that included these groups.

A project funded jointly through the Sport Sponsorship Program and the Health Promotion Projects Program in 2010/11 is focusing on establishing a sustainable model for increasing physical activity among people with mental illness. The project is a partnership between Ability Solutions, mental illness agencies and residential facilities in the community, and will extend to metropolitan and several regional areas.

A starter grant awarded in 2010/11 to Dr Cheryl Kickett-Tucker from the Koya Aboriginal Corporation is part of a national research partnership between the Pindi Pindi National Research Centre for Aboriginal Children, Murdoch University

and James Cook University, as well as regional stakeholders. The project will address perinatal depression and anxiety in Aboriginal populations in four regions in WA (Swan, Kalgoorlie, Peel and Great Southern) and will develop a culturally inclusive perinatal mental health promotion strategy for WA Aboriginal communities.

In addition to encouraging a wide variety of main stream sporting groups to increase participation opportunities for people living in rural and remote areas, Healthway's sponsorship of organisations such as the WA Disabled Sports Association, Wheelchair Sports WA, Special Olympics, Riding for the Disabled WA and Sailability WA significantly increased opportunities for people with a disability to access quality physical activity programs.

Sponsorship of the Garnduwa Amboorny Wirnan Aboriginal Corporation's Be Active Community project was renewed in 2010/11. This program assists remote Indigenous communities to deliver sustainable sport and recreation programs through the development of community based plans and the establishment of community recreation officers. To date 12 communities have been involved in the project and this number is expected to increase to 17 in the next 12 months. In addition to increasing the level of participation in physical activity other outcomes of the program include improved school attendances, reduction in contact with the justice system and generally improved self-esteem among program participants.

Improve knowledge and understanding to address the determinants and modifiers of health inequalities.

A key focus of Healthway's Research and Health Promotion Projects Program is on improving knowledge and understanding to address health inequalities. Funding was approved in 2010/11 for a new health promotion project to Edith Cowan University that will provide a state wide program of training and workshops for frontline health and other relevant professionals working with Indigenous people. The project will focus on increasing access to and use of the web-based Australian Indigenous HealthInfoNet to inform and improve evidence-based health promotion practice with Indigenous people.

An indigenous Training Scholarship awarded in 2010/11 to June Oscar at the University of Notre Dame will identify how the oral tradition and transmission of knowledge in the form of storytelling has shaped the resilience and lives of two Banuba women. The research will use the oral tradition methodology and the results will inform community initiatives being developed to address individual and family anxiety, grief and depression.

Build awareness and support for groups who are experiencing inequalities.

In 2010/2011 Healthway staff and managers contributed to committees and seminars to promote Healthway's objectives and explain funding opportunities. Examples included regular attendance at meetings of the inter-agency Youth Funders Forum and membership of the Royal Agricultural Society's Open Art Committee. Healthway staff also contributed to interagency funding seminars training for regional Mentally Healthy WA project officers, all of whom provide support and guidance to potential grant and sponsorship recipients in regional areas.

Since 2006 Healthway has funded a Regional Coordinator position in the Kimberley, with a role to support potential sponsorship and grant applications in the region and provide support for funded sponsorships and projects. During 2010/11 the Coordinator provided varying levels of support for more than 30 Healthway sponsorships in the region, including small 'under $5,000' sponsorships and Healthy Clubs. The position has also run a local grants scheme during the year, providing a mechanism for awarding small sums of money in a way that is responsive to the needs of the Indigenous community. Healthway's focus on building awareness and support for groups experiencing inequalities aligns with the WA government's goal of social responsibility.

BUILDING & USING THE EVIDENCE

Healthway has a strong commitment to supporting work that contributes to the evidence base in health promotion and builds on what is already known to be effective. This is a key theme in the Healthway 2008-2011 Strategic Plan and Healthway is in a strong position to support high quality research and projects to address gaps in current knowledge, particularly with respect to priority population groups.

Focus on improving & increasing the translation of research findings into effective and sustainable policy and practice in health promotion.

A focus for Healthway in the current strategic period is on increasing the translation of research findings into effective and sustainable policy and practice.

A Health Promotion Grant awarded in 2010/11 will support a project at Curtin University that will focus on the transfer of knowledge through partnerships, innovative technology and social networking, designed to create maximum impact on policy. It will aim to build sector ownership for advocacy activities and build expertise in this area in WA.

During the year Healthway organised two seminars focusing on sharing and communicating results from health promotion research to audiences of practitioners, policy-makers and researchers. The first focused on adolescent mental health and included a presentation by Dr Julian Dooley from Edith Cowan University on technology use and mental health in young people. The second seminar included a presentation from Healthway scholarship holder Marion Kickett from the Centre for International Health at Curtin University, who presented on her research focusing on resiliency in Aboriginal people. A major 5-year Research into Practice grant awarded to a multi-disciplinary team led by Dr Christina Pollard at Curtin University will focus on further analysis of data from nutrition monitoring surveys, the health and wellbeing surveillance system and other sources to inform food law, policy and communications focusing on the promotion of good nutrition.

Independent evaluation by an academic research group has always been a key feature of Healthway's work, and during 2010/11 the contract for the evaluation service was renewed through an open public tender process. There was a large interest in providing the service although the Health Promotion Evaluation Unit (HPEU) at UWA was again successful in winning the contract. The evaluation work continues to make a major contribution to building the evidence for effective health promotion as well as informing Healthway's work.

Work completed by the HPEU during 2010/11 included redesigning the evaluation framework for Healthway sponsorships in line with the new structure of the sponsorship program, a comprehensive field study at the 2010 Smoke-free Royal Show and several reports from the 2010 survey on recreation and health among adults resident in WA.

Continue to nurture quality research and evaluation in WA.

Healthway is committed to supporting high quality research in WA and in 2010/11 allocated approximately $2.5 million to research grants and scholarships, nearly one half of which was allocated to new projects. All major research grants undergo a comprehensive review process involving assessment by up to 4 independent experts from outside WA to ensure rigour and transparency of decision-making.

In 2010/11 Healthway awarded 14 new research grants in total, including Starter Grants, Research Project grants, Research into Practice Grants, Graduate and Indigenous Scholarships, a Fellowship and two Visiting Fellowships. All of the successful applications addressed high priority health issues and/or target groups for Healthway.

Healthway's continuing commitment to funding independent evaluation of health promotion and sport, arts and racing projects contributes significantly to the evidence base around health promotion and sponsorship. During the year the HPEU published more than ten technical papers and reports based on the evaluation of Healthway's work.

SUSTAINABLE CHANGE

Successful and effective health promotion programs and activities have components that can be sustained over time to achieve lasting improvements in the health of the community. All Healthway projects and programs aim to include sustainable outcomes as a key component, either in terms of maintaining behavioural changes, program or policy sustainability.

Recognise and support the variety of ways sustainable change can be achieved across programs.

Healthway's revised sponsorship program introduced a set of minimum health policy requirements for all sponsored organisations from 1 July 2010, including completely smoke-free indoor and outdoor areas, free drinking water, provision of healthy food choices where food is served and low-alcohol options where alcohol is served. Previous evaluations have shown that once organisations introduce healthy environment policies, these are generally maintained by the organisation because of public popularity, even if the Healthway funding is only short term.

Three significant racing sponsorships, Gloucester Park, Barbagello Raceway and Bunbury Turf Club received Structural Reform Sponsorships in 2010/11. These sponsorships provided an avenue for significant sustainable change to be achieved in relation to provision of healthy food and drink choices as well as alcohol practices that support a reduction in alcohol related harm The Healthy Club Program also continued to achieve sustainable change by assisting sporting clubs to develop and implement health policies designed to create a healthy sporting environment. The program also provides increased access to education and training opportunities for club coaches and officials. In 2010/11 401 Healthy Club sponsorship applications received with 336 or 84% successful. Approximately 41% of successful clubs were country based.

Healthway continued the Venue Sponsorship program in 2010/11, as a means of achieving significant structural reform in major community and recreational venues visited by large numbers of people. For example, during the year, a major Venue Sponsorship was awarded to the Perth Zoo, which has more than 600,000 visitors per year, resulting in the Zoo becoming an entirely smoke-free venue for the first time, as well as improving some of the food choices available. A similar contract for an entirely smoke-free venue was also negotiated with AdventureWorld ONE OF Perth;s most popular outdoor leisure facilities. These changes will be sustainable beyond the end of the Healthway contract.

In recent years, Healthway has worked in partnership with the WA School Canteen Association (WASCA) to improve the provision of healthy food and drink options in sponsored sport and recreation venues. In 2010/11 this partnership continued with WASCA working with several organisations in receipt of Healthway Venue Sponsorship support to improve healthy food and drink provision, including a major sponsorship approved during the year to Venues West, which will cover all their main venues in the Perth metropolitan area.

Behavioural sustainability in Healthway sponsorship projects is evaluated every two years using the HPEU series of audience surveys at sponsored events, the 'Sponsorship Monitor', which measures audience awareness, understanding, attitudes, intentions and behaviours in relation to health messages promoted at the events. In 2010/11, an abbreviated version of the Sponsorship Monitor was implemented, because for the first time not all sponsored projects were required to promote health messages. The results show that 59% of people attending Healthway-sponsored events during the year were aware of the message promoted at the event and nearly 9% reported a change in their behaviour as a result of exposure to the message at a previous event.

INVESTING IN THE FUTURE - BUILDING HEALTH PROMOTION CAPACITY

Capacity building in health promotion is a critical strategy for improving the health of the population in a way that is sustainable, through developing skills and organisational structures, and through provision of resources.

The Healthway strategic plan for 2008-2011 identifies a commitment to increasing the capacity of the health promotion workforce in WA. This includes supporting the development of health promotion leaders, funding scholarships and facilitating collaborative partnerships between researchers, policy makers and practitioners. Healthway also recognises that capacity building should not be confined to the health promotion workforce and is committed to increasing health promotion leadership and literacy across sectors, Healthway stakeholder groups and at the community and individual levels.

Contribute to the development of an effective health promotion workforce in WA.

Healthway has maintained a commitment to building capacity for health promotion in WA for many years, by investing in workforce development through scholarships, fellowships, traineeships and other development opportunities. Healthway Health Promotion Graduate Scholarships and Fellowships offer funding for up to three years to support Masters, Doctoral and post-doctoral research in health promotion.

In 2010/11 Healthway funded a Health Promotion Graduate Scholarship, an Indigenous Research Training Scholarship and the first higher level Research Fellowship to Associate Professor Lisa Wood at UWA. All the new researchers are conducting studies that address Healthway high priority health areas. Two out of three Starter Grants funded by Healthway in 2010/11 were awarded to new researchers, defined as 'junior' researchers who have not previously held major competitive research grants.

Two Healthway Visiting Fellowships were awarded in 2011, one focusing on physical activity and on obesity prevention in children, and the second on Indigenous mental health. A Visiting Fellowship awarded to the University of WA in 2010/11 supported a three month visit in early 2011 by Professor Gareth Stratton from the Research Institute for Sport and Exercise Sciences at Liverpool John Moores University in the UK. Professor Stratton has expertise in physical activity, fitness and overweight and obesity, with a focus on prevalence and behaviour change in children and young people, as well as research translation. While in WA, he delivered workshops, seminars, advice to researchers, practitioners and policy-makers, as well as a visit to regional WA.

The second Visiting Fellowship, awarded to the Koya Aboriginal Corporation, supported a visit to WA by Professor Deborah Johnson and Dr James Bruce from North America, to conduct workshops and seminars with professionals and community seminars focusing on culturally inclusive approaches to mental health promotion, and overcoming racism and disadvantage for Indigenous youth.

The development and support of the next generation of health promotion leaders is another area in which Healthway has made a significant contribution. In 2010/11 Healthway commenced its fourth Leadership Development in Health Promotion Program, offering a unique opportunity for twelve young health promotion and related professionals from across the state to participate. Since its introduction in 2003, 36 health professionals have completed leadership development training through the program.

Workforce development also includes sharing and disseminating knowledge from funded programs. Healthway held two research seminars in 2010/11, attended by around 100 people, including professionals based in regional areas who accessed the seminars by videoconference.

Contribute to the development of health promotion skills in sectors outside health.

Healthway supports sponsored sport, arts and racing organisations to effectively implement strategies to promote healthy lifestyles through a new sponsorship team appointed to Healthway in 2010/11 and through its relationship with health agencies running health promotion campaigns. During 2010/11 Healthway also contributed to professional development for Mentally Healthy WA local staff, who include local government and community organisation staff as well as health professionals.

Healthway is one of the inaugural members of the International Network of Health Promotion Foundations, which has a role to share experiences internationally on effective programs and support the development of new Foundations. In 2010/11 Healthway continued to be funded by the Network to run the secretariat role, which has led to the development of strong international collaborations.

Develop and nurture the expertise of individuals and groups working within health promotion to ensure that high quality, innovative and effective health promotion work continues in WA.

In 2010/11 Healthway funding was renewed for a further three years to the Australian Health Promotion Association WA Branch (AHPA-WA), to support the highly successful Healthway/AHPA Graduate Scholarship and ATSI Traineeship programs. The scheme has supported nearly 40 graduates and more than 12 Aboriginal people to develop their careers in health promotion over more than 15 years.

Healthway also provided capacity building scholarship support for around 30 regional people to attend three major conferences in WA at the end of 2010 aligned to Healthway priorities. These include the 18th Alcohol and Other Drugs Symposium in Fremantle, the National Health Promoting Schools Conference and the State PHA conference.

Acknowledgement of Health Agencies

In 2010/11, Healthway engaged the following health agencies to support sponsorships:

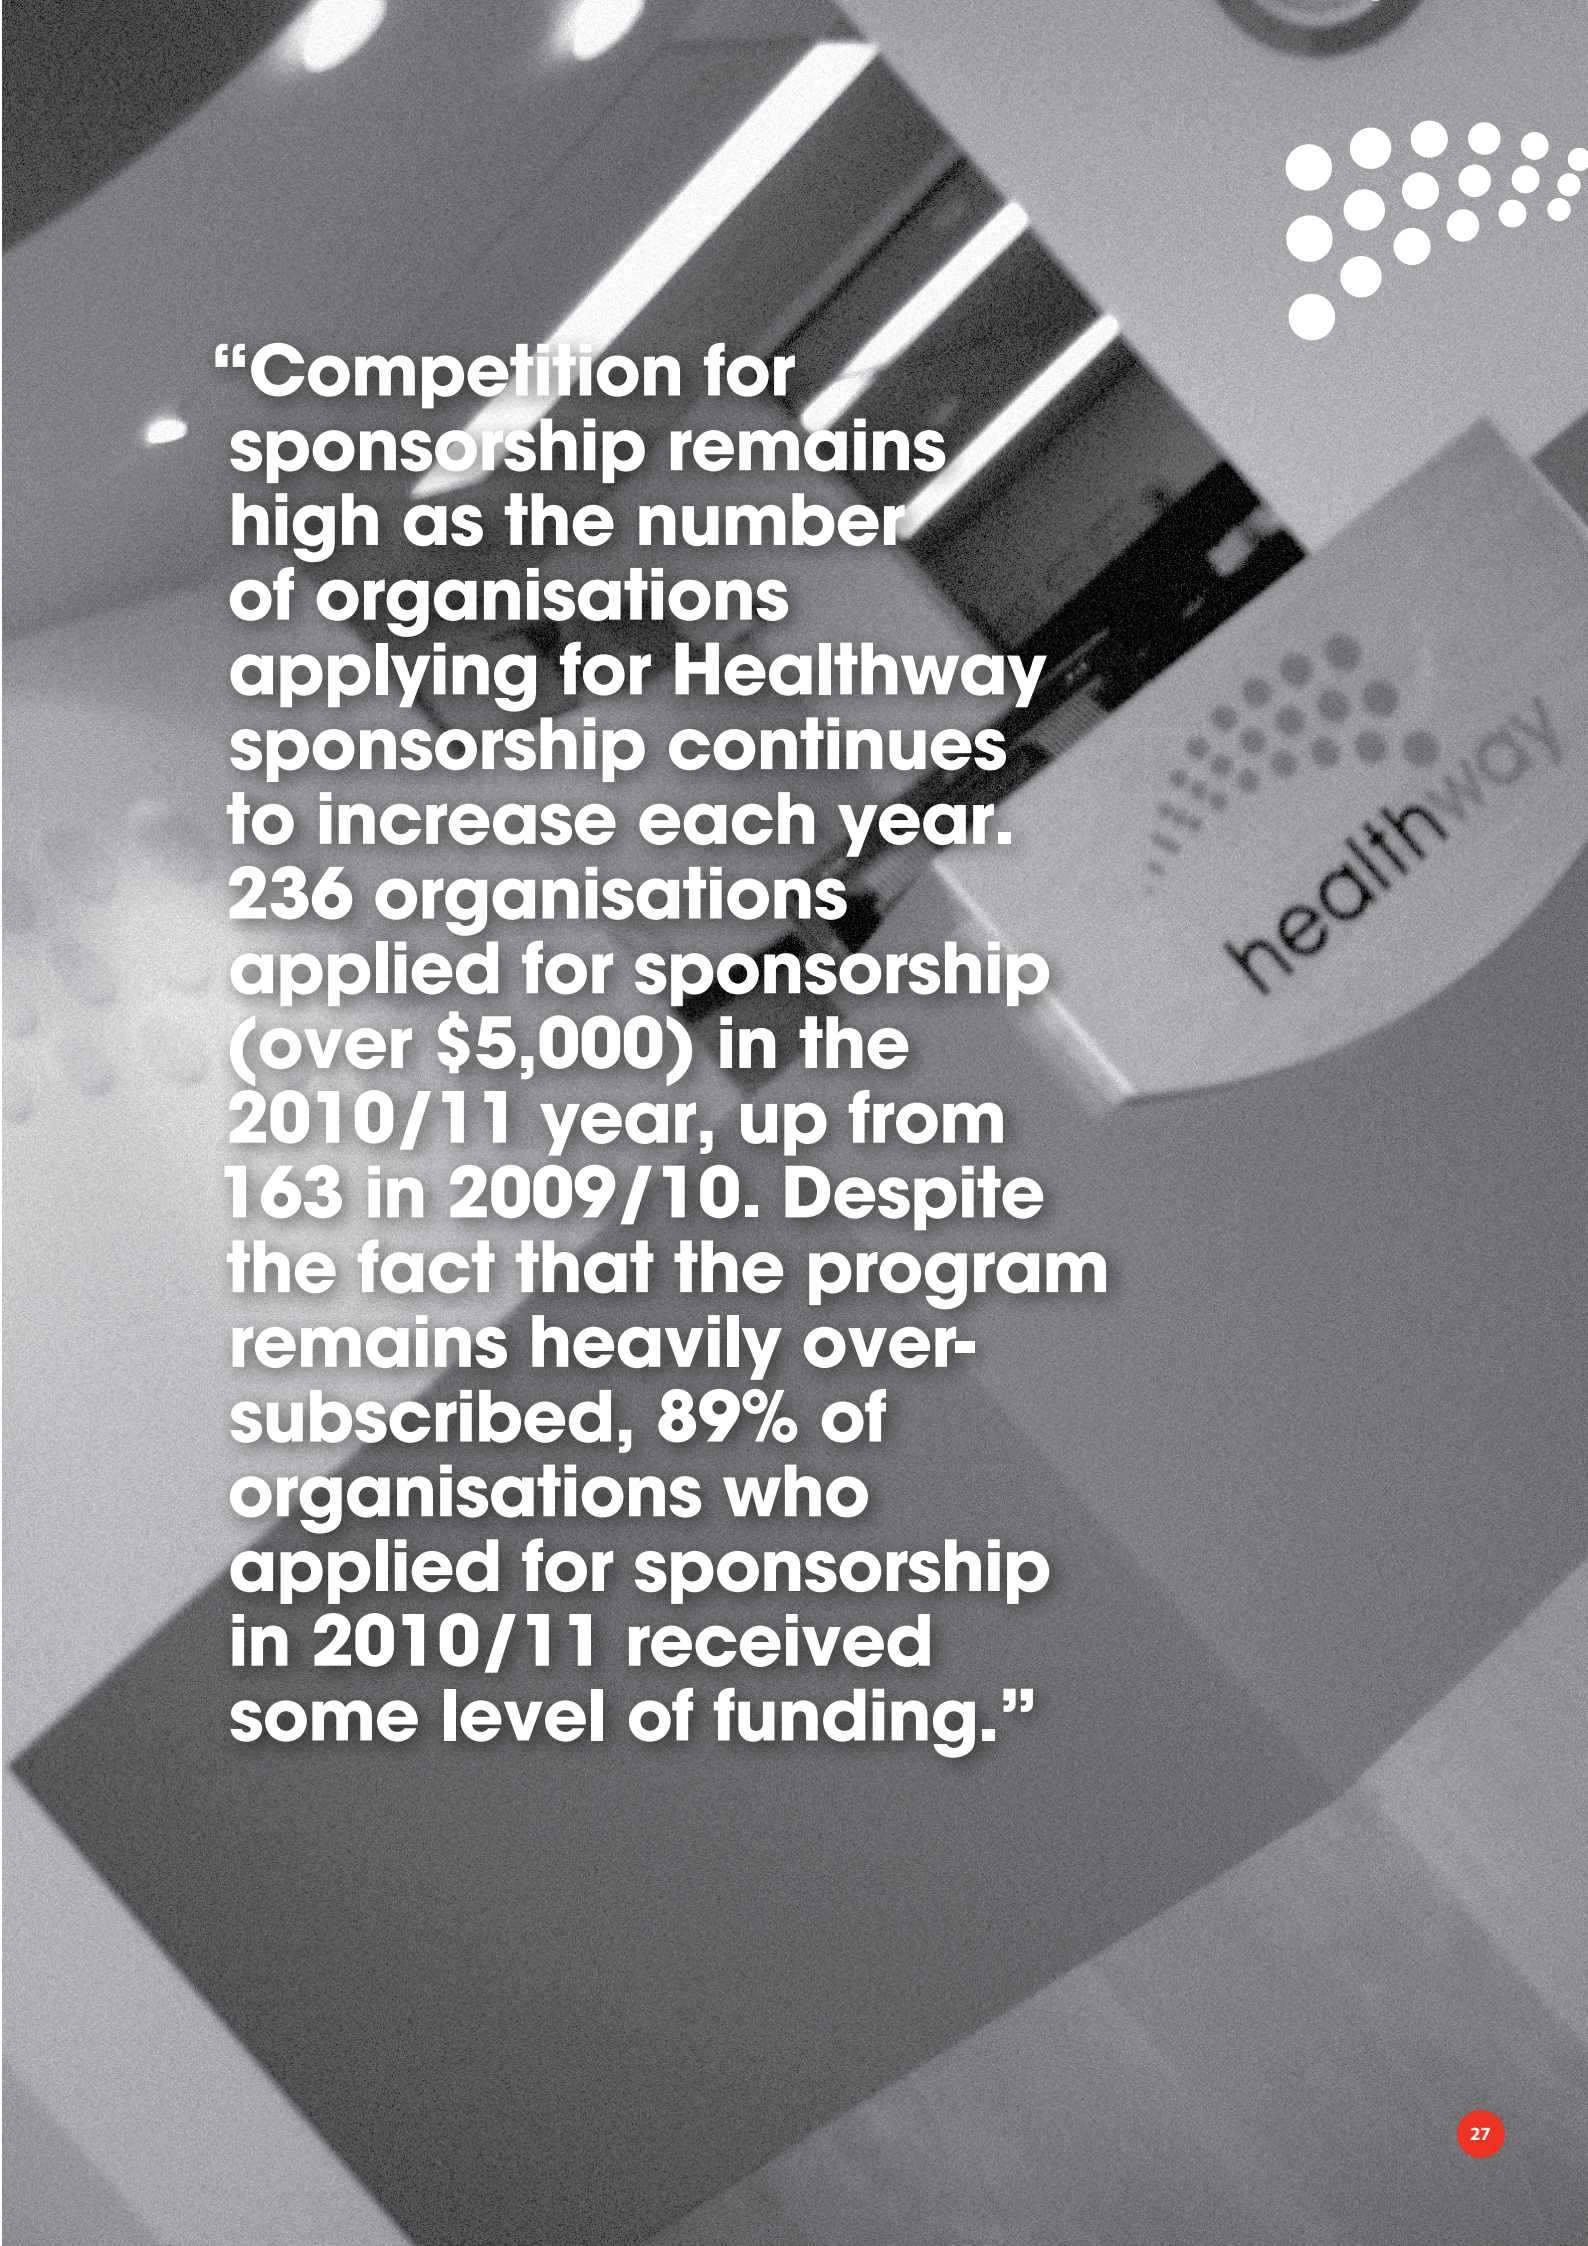
- The Cancer Council WA
- The Drug and Alcohol Office
- The National Heart Foundation (WA Division)
- Relationships Australia
- Sports Medicine Australia
- Curtin University of Technology
- Kimberley Population Health Unit

These agencies supported 612 Healthway sponsorships in 2010/11. 346 of these were Healthy Club sponsorships supported by Sports Medicine Australia.

The Healthway funded Act Belong Commit campaign has expanded from the original six pilot sites to the whole of the state. In 2010/11, 79 Act Belong Commit sponsorships were conducted in regional and metropolitan WA.

The assistance and support from the various agencies and the officers involved again ensured that the sponsorship program operated in an efficient and effective manner with excellent health promotion returns being achieved.

Since 2005, Healthway has funded a Regional Coordination Initiative through the Kimberley Population Health Unit. The role of the Coordinator includes supporting Healthway sponsorships in the region and strengthening links between Healthway sponsorships and the state-wide health promotion campaigns. In 2010/11, the Kimberley Regional Coordinator directly supported 4 major message promotion sponsorships funded during the year, along with another 3 continuing sponsorships funded in previous years. In addition, the Coordinator provided indirect support in the form of guidance on approximately 15 'under $5000' message promotion sponsorships and 5 healthy participation sponsorships.



"Competition for sponsorship remains high as the number of organisations applying for Healthway sponsorship continues to increase each year. 236 organisations applied for sponsorship (over $5,000) in the 2010/11 year, up from 163 in 2009/10. Despite the fact that the program remains heavily over-subscribed, 89% of organisations who applied for sponsorship in 2010/11 received some level of funding."

GOVERNANCE DISCLOSURES

Governance disclosures relate to government policy requirements, such as those regarding potential conflict of interest or ministerial directives.

Ministerial Directives

No Ministerial directives were received during the financial year.

Contracts With Senior Officers

At the date of reporting, other than normal contacts of employment of service, no Senior Officers, or firms of which Senior Officers are members, or entities in which Senior Officers have a substantial interests, had any interests in existing or proposed contracts with Healthway.

Indemnity Insurance Premium

Healthway covers members of the Healthway Board and senior management under a Directors and Officers Liability Insurance policy limited to $5 million at a cost of $4,900 (exc gst). Board members make a small contribution towards the premium costs.

OTHER DISCLOSURES

Employment and Industrial Relations

Staff Profile

Employee Profile	2010-11	2009-10
Full-time Permanent	14	13
Part-time Permanent (FTE basis)	1	1
Total FTE	15.0	14.0

Healthway has maintained a full time staffing equivalent of 15.0 with two officers working part-time.

Staff Development

Healthway is committed to developing a workforce that is highly competent, ethical, innovative and responsive to change.

During the year training and development was tailored to individual requirements and included access to leadership courses, support for study courses, project management, first aid etc. The wellbeing program was also expended and staff were provided with access to various knowledge sharing initiatives.

Industrial Relations

There were no industrial issues during the year and no services to the public were disrupted.

Occupational Safety and Health and Injury Management

Healthway's vision for a Healthy WA commits us to quality standards of health, safety and well-being for our employees and affiliates, adopting a pro-active consultative approach to occupational safety and health where all people within the organisation have a responsibility to maintain their own safety and ensure they do not cause harm to others.

A Policy and Procedures Manual sets out Healthway's commitment to provide a safe and healthy work environment and outlines guidelines and procedures to ensure compliance with the Occupational Safety and Health Act 1984, Workers' Compensation and Injury Management Act 1981 and related codes of practice and standards.

Relevant information on health and safety matters continue to be raised and discussed at regular staff meetings with standard agenda items set for this purpose.

Occupational safety and health and injury management systems are available to staff on Healthway's internal system. Information is also communicated through Healthway's induction processes.

Through its wellbeing program Healthway encourages healthy lifestyles initiatives, including annual health assessments, influenza vaccinations, nutrition themes days days and access to information sessions.

An externally accredited assessment of occupational safety and health management systems within Healthway last year provided us with an assurance that we are compliant with OSH requirements. A few areas for improvement were identified by the assessors and these were addressed in an Action Plan with responsibilities and target dates set for completion. In 2010/11, the following improvements were implemented:

- Healthway Code of Practice document was revised and consolidated as a Safety Management System document and renamed the Healthway OSH Policy and Procedures Manual.
- A revised OSH Statement of Commitment was prepared and incorporated into the OSH Manual.
- The Wellness policy and framework was incorporated into OSH Manual.
- Key performance measures used to report on OSH compliance in the Annual Report were incorporated in the OSH Manual.
- A Healthway Officer with OSH responsibilities undertook refresher training during 2010/2011.
- A Country Driving Checklist was developed and implemented.

Report of performance against 2010/11targets:

Indicator	2010/11 Target	2010/11 Actual
Number of fatalities	0	0
Lost time/injury/diseases (LTI/D) incidence rate	0	0
Lost time injury/diseases severity rate	0	0
Workers compensation claims	0	0
Percentage of managers trained in occupational safety and health and injury management responsibilities	100	100

OTHER LEGAL COMPLIANCE

Advertising

In accordance with section 175ZE of the Electoral Act 1907, details of expenditure incurred during 2010/11 are set out below:

Category	Name of Agency	Amount expended
Advertising Agencies	Adcorp Australia	$617 (exc GST)
Market research organisations		Nil
Polling organisations		Nil
Direct mail organisations		Nil
Media advertising organisations		Nil

Recordkeeping Plans

Healthway's Recordkeeping Plan (RKP) was revised and approved by the State Records Commission in September 2010 for a further 5 years, demonstrating compliance with the State Records Act 2000 and State Records Commission Standard 2, Principle 6.

State Records Commission - Standard 2, Principle 6 – Compliance	
Compliance Indicator	**Healthway Compliance**
The efficiency and effectiveness of Healthway's recordkeeping systems has been evaluated.	This requirement was met with the revision of our RKP in 2010 and its approval on 25 September 2010 by the State Record Commission. Continuation of our Retention and Disposal Schedule was also approved. Regular audits of our file compactus continue to be undertaken, including a recent major review to reduce our on-site records to make way for office refurbishments.
Healthway conducts a recordkeeping training program.	Two further members of the Corporate Services team attended an external training course in Records Management Basics and Keyword Classifications.
The efficiency and effectiveness of Healthway's recordkeeping training program is reviewed from time to time.	Weekly staff meetings continue to provide the forum for staff to openly discuss the effectiveness of recordkeeping training and identify requirements for further training.
Healthway's induction program addresses employee roles and responsibilities in regard to their compliance with the recordkeeping plan.	Our Induction Program continues to provide initial recordkeeping training to all staff and the Induction Manual includes up to date versions of all records management policies and procedures. The induction manual can be accessed by staff via our internal network.

Disability and Access Inclusion Plan Outcomes

Healthway actively seeks to ensure that people with disabilities have access to facilities, services, information, funding and consultation forums. As part of Healthway's relocation in 2010 several design features and other considerations were adopted to ensure ease of access to the building and other facilities for people with disabilities. A review of these facilities has revealed that the standard ensured ease of access for people with disabilities. The website was refreshed in 2011 and steps were taken to improve accessibility to information for people with disabilities. Other documents are also available in alternate formats. In addition, recorded information is available on Healthway's main telephone line.

Healthway also continued to fund organisations directed at providing access to activities for people with disabilities. Healthway invites feedback on a range of matters and will also be undertaking community consultation as part of its strategic planning process, which includes stakeholders and people with disabilities.

Staff have developed a good working relationships with organisations that work with people with disabilities and are aware and understand disability and access issues. In addition, Healthway continues to encourage people with knowledge of disability issues to participate on Committees. Further, the induction process for new staff includes training on understanding disability and access issues.

Compliance with Public Sector Standards and Ethical Codes

In accordance with s31(1) of the Public Sector Management Act 1994, Healthway is required to report on compliance with Public Sector Standards in Human Resource Management and Codes of Ethics and Codes of Conduct.

During the year there were no breaches of public sector standards claims lodged and no claims for breaches of Codes of Ethics.

Healthway continued to foster a culture valuing high work ethics and integrity. Healthway requires all staff to participate in training on "Accountable and Ethical Decision-Making in WA Public Sector". These values are also reinforced at weekly staff meetings. Also during 2010-11 the Conflict of Interest policy was revisited and further advice was received and discussed with the Board.

Auditor General

INDEPENDENT AUDITOR'S REPORT

To the Parliament of Western Australia

WESTERN AUSTRALIAN HEALTH PROMOTION FOUNDATION

Report on the Financial Statements
I have audited the accounts and financial statements of the Western Australian Health Promotion Foundation.

The financial statements comprise the Statement of Financial Position as at 30 June 2011, the Statement of Comprehensive Income, Statement of Changes in Equity and Statement of Cash Flows for the year then ended, and Notes comprising a summary of significant accounting policies and other explanatory information.

Board's Responsibility for the Financial Statements
The Board is responsible for keeping proper accounts, and the preparation and fair presentation of the financial statements in accordance with Australian Accounting Standards and the Treasurer's Instructions, and for such internal control as the Board determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility
As required by the Auditor General Act 2006, my responsibility is to express an opinion on the financial statements based on my audit. The audit was conducted in accordance with Australian Auditing Standards. Those Standards require compliance with relevant ethical requirements relating to audit engagements and that the audit be planned and performed to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the Foundation's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances. An audit also includes evaluating the appropriateness of the accounting policies used and the reasonableness of accounting estimates made by the Board, as well as evaluating the overall presentation of the financial statements.

I believe that the audit evidence obtained is sufficient and appropriate to provide a basis for my audit opinion.

Opinion
In my opinion, the financial statements are based on proper accounts and present fairly, in all material respects, the financial position of the Western Australian Health Promotion Foundation at 30 June 2011 and its financial performance and cash flows for the year then ended. They are in accordance with Australian Accounting Standards and the Treasurer's Instructions.

4th Floor Dumas House 2 Havelock Street West Perth 6005 Western Australia Tel: 08 9222 7500 Fax: 08 9322 5664

Western Australian Health Promotion Foundation

Report on Controls
I have audited the controls exercised by the Western Australian Health Promotion Foundation. The Board is responsible for ensuring that adequate control is maintained over the receipt, expenditure and investment of money, the acquisition and disposal of public and other property, and the incurring of liabilities in accordance with the Financial Management Act 2006 and the Treasurer's Instructions, and other relevant written law.

As required by the Auditor General Act 2006, my responsibility is to express an opinion on the controls exercised by the Board based on my audit conducted in accordance with Australian Auditing Standards.

Opinion
In my opinion, the controls exercised by the Western Australian Health Promotion Foundation are sufficiently adequate to provide reasonable assurance that the receipt, expenditure and investment of money, the acquisition and disposal of property, and the incurring of liabilities have been in accordance with legislative provisions.

Report on the Key Performance Indicators
I have audited the key performance indicators of the Western Australian Health Promotion Foundation. The Board is responsible for the preparation and fair presentation of the key performance indicators in accordance with the Financial Management Act 2006 and the Treasurer's Instructions.

As required by the Auditor General Act 2006, my responsibility is to express an opinion on the key performance indicators based on my audit conducted in accordance with Australian Auditing Standards.

Opinion
In my opinion, the key performance indicators of the Western Australian Health Promotion Foundation are relevant and appropriate to assist users to assess the Foundation's performance and fairly represent indicated performance for the year ended 30 June 2011.

Independence
In conducting this audit, I have complied with the independence requirements of the Auditor General Act 2006 and the Australian Auditing Standards, and other relevant ethical requirements.

COLIN MURPHY
AUDITOR GENERAL
29 July 2011

Certification of Financial Statements

The accompanying financial statements of the Western Australian Health Promotion Foundation have been prepared in compliance with the provisions of the Financial Management Act 2006 from proper accounts and records to present fairly the financial transactions for the year ending 30 June 2011 and the financial position as at 30 June 2011.

At the date of signing, we are not aware of any circumstances which would render any particulars included in the financial statements misleading or inaccurate.

The Statement of Cash Flows should be read in conjunction with the accompanying notes.

1 Australian Accounting Standards

General

The Authority's financial statements for the year ended 30 June 2011 have been prepared in accordance with Australian Accounting Standards. The term 'Australian Accounting Standards' refers to Standards and Interpretations issued by the Australian Accounting Standard Board (AASB).

The Authority has adopted any applicable, new and revised Australian Accounting Standards from their operative dates.

Early adoption of standards

The Authority cannot early adopt an Australian Accounting Standard unless specifically permitted by TI 1101 Application of Australian Accounting Standards and Other Pronouncements.
No Australian Accounting Standards that have been issued or amended but not operative have been early adopted by the Authority for the annual reporting period ended 30 June 2011.

2 Summary of significant accounting policies

(a) General Statement

The financial statements constitute a general purpose financial statements that have been prepared in accordance with Australian Accounting Standards, the Framework, Statements of Accounting Concepts and other authoritative pronouncements of the Australian Accounting Standards Board, as applied by the Treasurer's Instructions. Several of these are modified by the Treasurer's Instructions to vary the application, disclosure, format and wording.

The Financial Management Act and the Treasurer's Instructions are legislative provisions governing the preparation of financial statements and take precedence over the Australian Accounting Standards, the Framework, Statements of Accounting Concepts and other authoritative pronouncements of the Australian Accounting Standards Board.

Where modification is required and has a material or significant financial effect upon the reported results, details of that modification and the resulting financial effect are disclosed in the notes to the financial statements.

(b) Basis of Preparation

The financial statements have been prepared on the accrual basis of accounting using the historical cost convention.

The accounting policies adopted in the preparation of the financial statements have been consistently applied throughout all periods presented unless otherwise stated.

The financial statements are presented in Australian dollars rounded to the nearest dollar ($).

Note 3 'Judgements made by management in applying accounting policies' discloses judgements that have been made in the process of applying the Authority's accounting policies resulting in the most significant effect on amounts recognised in the financial statements.

Note 4 'Key sources of estimation uncertainty' discloses key assumptions made concerning the future, and other key sources of estimation uncertainty at the end of the reporting period, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year.

(c) Reporting Entity

The reporting entity comprises the Authority only.

(d) Income

Revenue recognition
Revenue is recognised and measured at the fair value of consideration received or receivable. The following specific recognition criteria must also be met before revenue is recognised for the major business activities as follows:

Sale of goods
Revenue is recognised from the sale of goods and disposal of other assets when the significant risks and rewards of ownership transfer to the purchaser and can be measured reliably.

Provision of services
Revenue is recognised on delivery of the service to the client or by reference to the stage of completion of the transaction.

Interest
Revenue is recognised as the interest accrues.

Service Appropriations

Service Appropriations are recognised as revenues at fair value in the period in which the Authority gains control of the appropriated funds. The Authority gains control of appropriated funds at the time those funds are deposited to the bank account or credited to the 'Amounts receivable for services' (holding account) held at Treasury.

Grants, donations, gifts and other non-reciprocal contributions.
Revenue is recognised at fair value when the Authority obtains control over the assets comprising the contributions, usually when cash is received. Unexpended grant monies returned to Healthway are recognised upon the receipt of cash.

Other non-reciprocal contributions that are not contributions by owners are recognised at their fair value. Contributions of services are only recognised when a fair value can be reliably determined and the services would be purchased if not donated.

Gains

Realised and unrealised gains are usually recognised on a net basis. These include gains arising on the disposal of non-current assets and some revaluations of non-current assets.

(e) Property, Plant and Equipment

Capitalisation/Expensing of assets

Items of property, plant and equipment costing $5,000 or more are recognised as assets and the cost of utilising assets is expensed (depreciated) over their useful lives. Items of property, plant and equipment costing less than $5,000 are immediately expensed direct to the Statement of Comprehensive Income (other than where they form part of a group of similar items which are significant in total).

Initial recognition and measurement

Property, plant and equipment are initially recognised at cost.

For items of property, plant and equipment acquired at no cost or for nominal cost, the cost is the fair value at the date of acquisition.

Subsequent measurement

Property, plant and equipment are stated at historical cost less accumulated depreciation and accumulated impairment losses.

Depreciation

All non-current assets having a limited useful life are systematically depreciated over their estimated useful lives in a manner that reflects the consumption of their future economic benefits.

Depreciation is calculated using the straight line method, using rates which are reviewed annually. Estimated useful lives for each class of depreciable asset are:

Motor Vehicles	5 years
Furniture, Fixture and Fittings	5 to 20 years
Office Equipment	5 to 20 years
Computer Equipment	3 years

(f) Impairment of Assets

Property, plant and equipment are tested for any indication of impairment at the end of each reporting period. Where there is an indication of impairment, the recoverable amount is estimated. Where the recoverable amount is less than the carrying amount, the asset is considered impaired and is written down to the recoverable amount and an impairment loss is recognised. As the Authority is a not-for-profit entity, unless an asset has been identified as a surplus asset, the recoverable amount is the higher of an asset's fair value less costs to sell and depreciated replacement cost.

The risk of impairment is generally limited to circumstances where an asset's depreciation is materially understated, where the replacement cost is falling or where there is a significant change in useful life. Each relevant class of assets is reviewed annually to verify that the accumulated depreciation/amortisation reflects the level of consumption or expiration of the asset's future economic benefits and to evaluate any impairment risk from falling replacement costs.

The recoverable amount of assets identified as surplus assets is the higher of fair value less costs to sell and the present value of future cash flows expected to be derived from the asset. Surplus assets carried at fair value have no risk of material impairment where fair value is determined by reference to market-based evidence. Where fair value is determined by reference to depreciated replacement cost, surplus assets are at risk of impairment and the recoverable amount is measured. Surplus assets at cost are tested for indications of impairment at the end of each reporting period.

(g) Leases

The Authority has entered into an operating lease arrangement for the rent of the office building and motor vehicles where the lessor effectively retains all of the risks and benefits incident to ownership of the items held under the operating leases. Operating leases are expensed on a straight line basis over the lease term as this represents the pattern of benefits derived from the leased properties.

(h) Financial Instruments

In addition to cash , the Authority has two categories of financial instrument:

- Loans and receivables; and
- Financial liabilities measured at amortised cost.

Financial instruments have been disaggregated into the following classes:

Financial Assets

- Cash and cash equivalents
- Restricted cash and cash equivalents
- Receivables

Financial Liabilities

- Payables

Initial recognition and measurement of financial instruments is at fair value which normally equates to the transaction cost or the face value. Subsequent measurement is at amortised cost using the effective interest method.

The fair value of short-term receivables and payables is the transaction cost or the face value because there is no interest rate applicable and subsequent measurement is not required as the effect of discounting is not material.

(i) Cash and Cash Equivalents

For the purpose of the Statement of Cash Flows, cash and cash equivalent (and restricted cash and cash equivalent) assets comprise cash on hand and short term deposits with original maturities of three months or less that are readily convertible to a known amount of cash and which are subject to insignificant risk of changes in value, and bank overdrafts.

(j) Accrued Salaries

Accrued salaries (see Note 22) represent the amount due to staff but unpaid at the end of the financial year. Accrued salaries are settled within a fortnight of the financial year end. The Authority considers the carrying amount of accrued salaries to be equivalent to its net fair value.

(k) Receivables

Receivables are recognised at original invoice amount less an allowance for any uncollectible amounts (i.e. impairment). The collectability of receivables is reviewed on an ongoing basis and any receivables identified as uncollectible are written-off against the allowance account. The allowance for uncollectible amounts (doubtful debts) is raised when there is objective evidence that the Authority will not be able to collect the debts. The carrying amount is equivalent to fair value as it is due for settlement within 30 days.

(l) Payables

Payables are recognised when the Authority becomes obliged to make future payments as a result of a purchase of assets or services. The carrying amount is equivalent to fair value, as settlement is generally within 30 days.

(m) Provisions

Provisions are liabilities of uncertain timing or amount and are recognised where there is a present legal or constructive obligation as a result of a past event and when the outflow of resources embodying economic benefits is probable and a reliable estimate can be made of the amount of the obligation. Provisions are reviewed at the end of each reporting period.

Provisions - Employee Benefits

All annual leave and long service leave provisions are in respect of employees' services up to the end of the reporting period.

Annual leave

The liability for annual leave expected to be settled within 12 months after the reporting period is recognised and measured at the undiscounted amounts expected to be paid when the liability is settled.

Annual leave not expected to be settled within 12 months after the reporting period is recognised and measured at the present value of amounts expected to be paid when the liabilities are settled using the remuneration rate expected to apply at the time of settlement.

When assessing expected future payments consideration is given to expected future wage and salary levels including non-salary components such as employer superannuation contributions, as well as the experience of employee departures and periods of service. The expected future payments are discounted using market yields at the end of the reporting period on national government bonds with terms to maturity that match, as closely as possible, the estimated future cash outflows.

The provision for annual leave is classified as a current liability as the Authority does not have an unconditional right to defer settlement of the liability for at least 12 months after the reporting period.

Long service leave

The liability for long service leave expected to be settled within 12 months after the reporting period is recognised and measured at the undiscounted amounts expected to be paid when the liability is settled.

Long service leave not expected to be settled within 12 months after the reporting period is recognised and measured at the present value of amounts expected to be paid when the liabilities are settled using the remuneration rate expected to apply at the time of settlement. When assessing expected future payments consideration is given to expected future wage and salary levels including non-salary components such as employer superannuation contributions, as well as the experience of employee departures and periods of service. The expected future payments are discounted using market yields at the end of the reporting period on national government bonds with terms to maturity that match, as closely as possible, the estimated future cash outflows.

Unconditional long service leave provisions are classified as current liabilities as the Authority does not have an unconditional right to defer settlement of the liability for at least 12 months after the reporting period. Conditional long service leave provisions are classified as non-current liabilities because the Authority has an unconditional right to defer the settlement of the liability until the employee has completed the requisite years of service.

Superannuation

The Government Employees Superannuation Board (GESB) administers public sector superannuation arrangements in Western Australia in accordance with legislative requirements.

Eligible employees contribute to the Pension Scheme, a defined benefit pension scheme closed to new members since 1987, or the Gold State Superannuation Scheme (GSS), a defined benefit lump sum scheme closed to new members since 1995.

The GSS is a defined benefit scheme for the purposes of employees and whole-of-government reporting. However, it is a defined contribution plan for agency purposes because the concurrent contributions (defined contributions) made by the Authority to GESB extinguishes the agency's obligations to the related superannuation liability.

The Authority has no liabilities under the Pension Scheme or the GSS. The liabilities for the unfunded Pension Scheme and the unfunded GSS transfer benefits attributable to members who transferred from the Pension Scheme, are assumed by the Treasurer. All other GSS obligations are funded by concurrent contributions made by the Authority to the GESB.

Employees commencing employment prior to 16 April 2007 who were not members of either the Pension Scheme or the GSS became non-contributory members of the West State Superannuation Scheme (WSS). Employees commencing employment on or after 16 April 2007 became members of the GESB Super Scheme (GESBS). Both of these schemes are accumulation schemes. The Authority makes concurrent contributions to GESB on behalf of employees in compliance with the Commonwealth Government's Superannuation Guarantee

(Administration) Act 1992. These contributions extinguish the liability for superannuation charges in respect of the WSS and GESBS.

Provisions - Other
Employment On-Costs

Employment on-costs, including workers' compensation insurance, are not employee benefits and are recognised separately as liabilities and expenses when the employment to which they relate has occurred. Employment on-costs are included as part of 'Other expenses' and are not included as part of the Authority's 'Employee benefits expense'. The related liability is included in 'Employment on-costs provision'.

(n) Superannuation expense

The superannuation expense in the Statement of Comprehensive Income comprises employer contributions paid to the GSS (concurrent contributions), WSS, and the GESBS.

(o) Comparative Figures

Comparative figures are, where appropriate, reclassified to be comparable with the figures presented in the current financial year.

3 Judgements made by management in applying accounting policies

The preparation of financial statements requires management to make judgements about the application of accounting policies that have a significant effect on the amounts recognised in the financial statements. The Authority evaluates these judgements regularly.

Operating Lease Commitments

The Authority has entered into a commercial lease and has determined that the lessor retains all the significant risks and rewards of ownership of the property. Accordingly, the lease has beenclassified as an operating lease.

4 Key sources of estimation uncertainty

Key estimates and assumptions concerning the future are based on historical experience and various other factors that have a significant risk of causing a material adjustment to the carrying amount of assets and liabilities within the next financial year.

Long Service Leave

Several estimations and assumptions used in calculating the Authority's long service leave provision include expected future salary rates, discount rates, employee retention rates and expected future payments. Changes in these estimations and assumptions may impact on the carrying amount of the long service leave provision.

5 Disclosure of changes in accounting policy and estimates

Initial application of an Australian Accounting Standard

The Authority has applied the following Australian Accounting Standards effective for annual reporting periods beginning on or after 1 July 2010 that impacted on the Authority.

2009-5 Further Amendments to Australian Accounting Standards arising from the Annual Improvements Project [AASB 5, 8, 101, 107, 117, 118, 136 & 139]

Under amendments to AASB 117, the classification of land elements of all existing leases has been reassessed to determine whether they are in the nature of operating or finance leases. As leases of land & buildings recognised in the financial statements have not been found to significantly expose the Authority to the risks/rewards attributable to control of land, no changes to accounting estimates have been included in the Financial Statements and Notes to the Financial Statements.

Under amendments to AASB 107, only expenditures that result in a recognised asset are eligible for classification as investing activities in the Statement of Cash Flows. All investing cashflows recognised in the Authority's Statement of Cash Flows relate to increases in recognised assets.

Future impact of Australian Accounting Standards not yet operative

The Authority cannot early adopt an Australian Accounting Standard unless specifically permitted by TI 1101 Application of Australian Accounting Standards and Other Pronouncements. Consequently, the Authority has not applied early any of the following Australian Accounting Standards that have been issued that may impact the Authority. Where applicable, the Authority plans to apply these Australian Accounting Standards from their application date.

		Operative for reporting periods beginning on/after
AASB 2009-11	Amendments to Australian Accounting Standards arising from AASB 9 [AASB 1, 3, 4, 5, 7, 101, 102, 108, 112, 118, 121, 127, 128, 131, 132, 136, 139, 1023 & 1038 and Interpretations 10 & 12].	1 Jan 2013

The amendment to AASB 7 Financial Instruments: Disclosures requires modification to the disclosure of categories of financial assets. The Authority does not expect any financial impact when the Standard is first applied. The disclosure of categories of financial assets in the notes will change.

AASB 2009-12	Amendments to Australian Accounting Standards [AASBs 5, 8, 108, 110, 110, 112, 119, 133, 137, 139, 1023 & 1031 and interpretations 2, 4, 16, 1039 & 1052] This standard introduces a number of terminology changes. There is no financial impact resulting from the application of this revised standard.	1 Jan 2011
AASB 1053	Application of Tiers of Australian Accounting Standards This Standard establishes a differential financial reporting framework consisting of two tiers of reporting requirements for preparing general purpose financial statements. The Standard does not have any financial impact on the Authority. However it may affect disclosures in the financial statements of the Authority if the reduced disclosure requirements apply. DTF has not yet determined the application or the potential impact of the new Standard for agencies.	1 July 2013
AASB 2010-2	Amendments to Australian Accounting Standards arising from Reduced Disclosure Requirements This Standard makes amendments to many Australian Accounting Standards, including Interpretations, to introduce reduced disclosure requirements into these pronouncements for application by certain types of entities. The Standard is not expected to have any financial impact on the Authority. However this Standard may reduce some note disclosures in the financial statements of the Authority. DTF has not yet determined the application or the potential impact of the amendments to these Standards for agencies.	1 July 2013

AASB 2011-2	Amendments to Australian Accounting Standards arising from the Trans-Tasman Convergence Project – Reduced Disclosure Requirements [AASB 101 & 1054] This Amending Standard removes disclosure requirements from other Standards and incorporates them in a single Standard to achieve convergence between Australian and New Zealand Accounting Standards for reduced disclosure reporting. DTF has not yet determined the application or the potential impact of the amendments to these Standards for agencies.	1 July 2011
AASB 2010-5	Amendments to Australian Accounting Standards [AASB 1, 3, 4, 5, 101, 107, 112, 118, 119, 121, 132, 133, 134, 137, 139, 140, 1023 & 1038 and Interpretations 112, 115, 127, 132 & 1042] (October 2010) This Standard introduces a number of terminology changes as well as minor presentation changes to the Notes to the Financial Statements. There is no financial impact resulting from the application of this revised Standard.	1 Jan 2011
AASB 2010-6	Amendments to Australian Accounting Standards – Disclosures on Transfers of Financial Assets [AASB 1 & AASB 7] This Standard makes amendments to Australian Accounting Standards, introducing additional presentation and disclosure requirements for Financial Assets. The Standard is not expected to have any financial impact on the Authority. DTF has not yet determined the application or the potential impact of the amendments to these Standards for agencies.	1 July 2011
AASB 9	Financial Instruments This Standard supersedes AASB 139 Financial Instruments: Recognition and Measurement, introducing a number of changes to accounting treatments.	1 Jan 2013

	The Standard was reissued on 6 Dec 2010 and the Department is currently determining the impact of the Standard. DTF has not yet determined the application or the potential impact of the Standard for agencies.	
AASB 2010-7	Amendments to Australian Accounting Standards arising from AASB 9 (December 2010) [AASB 1, 3, 4, 5, 7, 101, 102, 108, 112, 118, 120, 121, 127, 128, 131, 132, 136, 137, 139, 1023 & 1038 and Interpretations 2, 5, 10, 12, 19 & 127] This Amending Standard makes consequential adjustments to other Standards as a result of issuing AASB 9 Financial Instruments in December 2010. DTF has not yet determined the application or the potential impact of the Standard for agencies.	1 Jan 2013
AASB 1054	Australian Additional Disclosures This Standard, in conjunction with AASB 2011-1 Amendments to Australian Accounting Standards arising from the Trans-Tasman Convergence Project, removes disclosure requirements from other Standards and incorporates them in a single Standard to achieve convergence between Australian and New Zealand Accounting Standards.	1 July 2011
AASB 2011-1	Amendments to Australian Accounting Standards arising from the Trans-Tasman Convergence Project [AASB 1, 5, 101, 107, 108, 121, 128, 132 & 134 and Interpretations 2, 112 & 113] This Amending Standard, in conjunction with AASB 1054 Australian Additional Disclosures, removes disclosure requirements from other Standards and incorporates them in a single Standard to achieve convergence between Australian and New Zealand Accounting Standards.	1 July 2011

6 Employee benefits expense

	2011 $	2010 $
Wages and salaries (a)	1,427,313	1,254,873
Superannuation – defined contribution plans(b)	138,925	125,300
	1,566,238	1,380,173

(a) Includes the value of the fringe benefit to the employee plus the fringe benefits tax component, leave entitlements including superannuation contribution component.
(b) Defined contribution plans include West State, Gold State and GESB Super Scheme (contribution paid).

Employment on-costs such as workers' compensation insurance are included at note 11 'Other Expenses'.
The employment on-costs liability is included at note 21 'Provisions'.

7 Supplies and services

Communications	44,099	46,738
Consultants and contractors (a)	510,111	441,155
Consumables	75,752	65,122
Travel	31,013	24,923
Other	75,276	92,252
	736,251	670,190

(a) Includes Audit fees, see also note 31 'Remuneration of auditor'.

8 Depreciation and amortisation expense

Motor vehicles	-	7,805
Office Establishment	-	6,983
Equipment and apparatus	7,888	5,371
Computing equipment and software	33,305	50,561
	41,193	70,720

9 Accommodation expenses

Lease rentals	323,569	354,065
Cleaning	57,248	83,315
	380,817	437,380

10 Grants and sponsorships

	2011 $	2010 $
Health promotion and research grants	7,290,695	6,037,211
Arts sponsorships	3,074,767	3,012,987
Sport sponsorships	5,969,172	6,069,404
Racing sponsorships	839,500	772,202
Support sponsorships	711,621	1,927,519
Evaluations	385,000	421,798
	18,270,755	18,241,121

11 Other expenses

Other staff costs (a)	29,146	13,170
Maintenance	15,170	37,889
	44,316	51,059

(a) Includes workers' compensation insurance and other employment on-costs. The on-costs liability associated with the recognition of annual and long service leave liability is included at note 21 'Provisions'. Superannuation contributions accrued as part of the provision for leave are employee benefits and are not included in employment on-costs.

12 Interest revenue

Bank Interest	910,258	685,428
	910,258	685,428

13 Other revenue

Return of unexpended grants and sponsorships	79,471	337,356
Other	479,739	252,858
	559,210	590,214

14 Net gain/(loss) on disposal of non-current assets

Costs of Disposal of Non-Current Assets		
Plant, equipment and vehicles	-	145,487
Proceeds from Disposal of Non-Current Assets

	$	$
Computing Equipment and Software		
At Cost	253,148	210,075
Less Accumulated depreciation	195,206	161,901
	57,942	48,174
	87,110	69,294

Reconciliations of the carrying amounts of property, plant, equipment and vehicles at the beginning and end of the reporting period are set out below.

2011	Motor Vehicles $	Fixtures and Fittings $	Equipment and Apparatus $	Computing Equipment $		Total $
Carrying amount at the start of the year	-	-	21,120	48,174		69,294
Additions (i)	-	-	15,936	43,073	(i)	59,009
Disposals	-	-	-	-		-
Depreciation	-	-	(7,888)	(33,305)		(41,193)
Carrying amount at the end of the year	-	-	29,168	57,942		87,110

(i) Additions to computing equipment includes work in progress of $23,812 which is not subject to depreciation.

2010	Motor Vehicles $	Fixtures and Fittings $	Equipment and Apparatus $	Computing Equipment $	Total $
Carrying amount at the start of the year	10,974	148,926	2,695	71,137	233,731
Additions	-	-	23,796	27,598	51,394
Disposals (a)	(3,169)	(141,943)	-	-	(145,112)
Depreciation	(7,805)	(6,983)	(5,371)	(50,561)	(70,720)
Carrying amount at the end of the year	-	-	21,120	48,174	69,294

(a) The adoption of the new capitalisation threshold of $5000 has resulted in assets that had values of under $5000 being declassified as assets and accounted for in Equity.

There were no indications of impairment to property, plant and equipment at 30 June 2011.

		2011	2010
20	**Payables**	**$**	**$**
	Current		
	Trade payables	46,861	87,013
	Grants and sponsorships	7,992,114	7,206,192
		8,038,975	7,293,205

21	**Provisions**		
	Current		
	Employee benefits provision		
	Annual Leave (a)	91,366	91,095
	Long service leave (b)	126,008	133,957
	Other provisions		
	Employment on-costs (c)	20,537	19,588
		237,911	244,640
	Non-current		
	Employee benefits provision		
	Long service leave (b)	138,256	102,741
	Other provisions		
	Employment on-costs (c)	13,691	7,757
		151,947	110,498

(a) Annual leave liability

Annual leave liabilities have been classified as current as there is no unconditional right to defer settlement for at least 12 months after the reporting period. Assessments indicate that actual settlement of the liabilities will occur as follows:

Within 12 months of the end of the reporting period	72,921	62,813
More than 12 months after the reporting period	18,446	28,282
	91,366	91,095

(b) Long service leave liability

Long service leave liabilities have been classified as current where there is no unconditional right to defer settlement for at least 12 months after the reporting period. Assessments indicate that actual settlement of the liabilities will occur as follows:

Within 12 months of the end of the reporting period	23,245	114,875
More than 12 months after the reporting period	241,019	121,823
	264,264	236,698

	2011 $	2010 $
(c) Employment on-costs		
Movements in Other Provisions		
Employment on-cost provisions		
Carrying amount at the start of period	27,344	28,083
Net Movements	6,884	(739)
Carrying amount at end of period	34,228	27,344

The settlement of annual and long service leave liabilities gives rise to the payment of employment on-costs including workers' compensation insurance. The provision is the present value of expected future payments. The associated expense is disclosed in note 11 'Other expenses'.

22 Other current liabilities

Current		
Board and Committee Fees	-	3,919
Accrued salaries	37,220	17,308
Amount owing to the ATO	5,121	4,674
Other	70,397	1,910
	112,738	27,811

23 Equity

Equity represents the residual interest in the net assets of Healthway. The Government holds the equity interest in Healthway on behalf of the community

Accumulated surplus		
Balance at start of year	1,494,612	1,608,191
Result for the period	516,898	(113,579)
Balance at the end of the year	2,011,510	1,494,612

24 Notes to the Statement of Cash Flows

Reconciliation of cash

Cash at the end of the financial year as shown in the Statement of Cash Flows is reconciled to the related items in the Statement of Financial Position as follows:

Cash and cash equivalents	9,307,995	8,227,407
Cash on hand	87	331
	9,308,082	8,227,738

Reconciliation of net cost of services to net cash flows used in operating activities

	2011 $	2010 $
Net cost of services	(19,570,102)	(19,709,579)
Non-cash items:		
Depreciation	41,193	70,720
(Gain)/Loss on Disposal of Assets	-	134,578
(Increase)/decrease in assets:		
Current receivables	(36,298)	(37,500)
Other current assets	(33,149)	15,837
Increase/(decrease) in liabilities:		
Current payables	726,508	440,382
Current provisions	(6,729)	(45,528)
Other current liabilities	84,927	(26,826)
Non-current provisions	41,449	40,424
Net GST receipts/(payments)	(149,750)	47,991
Change in GST in receivables/payables	(64,958)	(41,475)
Net cash used in operating activities	(18,966,909)	(19,110,976)

At the end of the reporting period, the Authority had fully drawn on all financing facilities, details of which are disclosed in the financial statements.

25 Commitments

(a) Grants expenditure commitments

Grant expenditure commitments relate to the Board's approval to fund applications which were received on or prior to 30 June 2011 and are contingent on Healthway's continued existence and future revenue being received. The balance is not recognised as a liability until the year payment is to be made. The amounts payable are as follows:

Within 1 year	8,979,138	6,659,299
Later than 1 year and not later than 5 years	4,705,769	3,194,717
	13,684,907	9,854,016

(b) Non-cancellable operating lease commitments

Commitments for minimum lease payments are payable as follows:		
Within 1 year	361,750	384,396
Later than 1 year and not later than 5 years	1,432,377	1,904,416
Later than 5 years	1,284,193	1,254,563
	3,078,319	3,543,375

Healthway relocated premises in February 2010 and a new non-cancellable lease was established with rent payable monthly in advance. The current lease concludes 31 October 2019 with two, three year options.

26 Contingent liabilities and contingent assets

There were no known contingent liabilities and contingent assets at balance sheet date and at the date of signing the financial report.

27 Events occurring after the balance sheet date

No events, matters or circumstances have arisen since the end of the reporting period which significantly affected or may significantly affect the operations of the Authority, the results of those operations, or the state of affairs of the Authority in future financial years.

28 Explanatory statement

(a) Significant variations between estimated and actual results for 2011

Significant variations are considered to be those greater than 10% and $25,000.

	2011 Budget	2011 Actual	Variance
Revenues			
Interest revenue	750,000	910,258	(160,258)
Other revenue	0	559,210	(559,210)

The variance in interest earnings is due to unexpected increases in the interest rate during the year.

During the year the Drug and Alcohol Office provided a contribution towards (a) Research on Alcohol Prevention ($300,000) (b) a further provision towards Community Alcohol Grants ($150,000). The balance of revenue of $109,210 mainly reflects unspent funds returned by grant and sponsorship recipients.

Expenses			
Supplies and services	596,000	736,251	(140,251)

During the year transition arrangements were progressed to return formerly outsourced functions in-house. The variance partly reflects the cost associated with the transition.

(b) Significant variations between actual results for 2010 and 2011

Significant variations are considered to be those greater than 10% and $25,000.

	2011 Actual $	2010 Actual $	Variance $
Revenues			
Interest Revenue	910,258	685,428	224,830

The increase in interest revenue is directly related to upward movements in interest rates in comparison to the previous year.

Expenses			
Depreciation	41,193	70,720	(29,527)
Accommodation	380,817	437,380	(56,563)

A reduction in depreciation reflects a change over from purchased fleet vehicles to leasing arrangements and assets being fully depreciated in the previous year.

Healthway relocated in 2010 and the accommodation expense reflects once-off over-lap of rental charges between the old and new accommodation to allow for the relocation.

29 Financial Instruments

(a) Financial Risk Management Objectives and Policies

Financial instruments held by the Authority are cash and cash equivalents, receivables and payables. Healthway has limited exposure to financial risks. Healthway's overall risk management program focuses on managing the risks identified below.

Credit risk

Credit risk arises when there is the possibility of the Authority's receivables defaulting on their contractual obligations resulting in financial loss to the Authority.

The maximum exposure to credit risk at the end of the reporting period in relation to each class of recognised financial assets is the gross carrying amount of those assets inclusive of any provisions for impairment as shown in the table at Note 29(c) 'Financial Instruments Disclosures' and Note 17 'Receivables'.

Credit risk associated with the Authority's financial assets is minimal. For receivables other than government, the Authority trades only with recognised, creditworthy third parties. The Authority has policies in place to ensure that sales of products and services are made to customers with an appropriate credit history. In addition, receivable balances are monitored on an ongoing basis with the result that the Authority's exposure to bad debts is minimal. At the end of the reporting period there are no significant concentrations of credit risk.

Allowance for impairment of financial assets is calculated based on objective evidence such as observable data indicating changes in client credit ratings. For financial assets that are either past due or impaired, refer to Note 29(c) 'Financial Instrument Disclosures'.

Liquidity risk

Liquidity risk arises when the Authority is unable to meet its financial obligations as they fall due. The Authority is exposed to liquidity risk through its trading in the normal course of business.

The Authority has appropriate procedures to manage cash flows including drawdowns of appropriations by monitoring forecast cash flows to ensure that sufficient funds are available to meet its commitments

Market risk

The Authority's exposure to market risk for changes in interest rates relate primarily to cash investments. The Authority does not trade in foreign currency and is not materially exposed to other price risks.

(b) Categories of Financial Instruments

In addition to cash, the carrying amounts of each of the following categories of financial assets and financial liabilities at the end of the reporting period are as follows:

	2011	2010
Financial Assets		
Cash and cash equivalents	9,308,082	8,227,738
Loans and receivables (a)	158,798	122,500
Financial Liabilities		
Financial liabilities measured at amortised cost	8,151,713	7,321,016

(a) The amount of loans and receivables excludes GST recoverable from the ATO (statutory receivable).

(c) Financial Instruments disclosures

Credit Risk and Interest rate Exposures

The following table disclose the Authority's maximum exposure to credit risk, interest rate exposures and the ageing analysis of financial assets. The Authority's maximum exposure to credit risk at the end of the reporting period is the carrying amount of financial assets as shown below. The table discloses the ageing of financial assets that are past due but not impaired and impaired financial assets. The table is based on information provided to senior management of the Authority.

The Authority does not hold any collateral as security or other credit enhancement relating to the financial assets it holds.

The Authority does not hold any financial assets that had to have their terms renegotiated that would have otherwise resulted in them being past due or impaired.

Interest rate exposures and ageing analysis of financial assets(a)

			Interest Rate Exposure		
	Weighted Average Effective Interest Rate	**Carrying Amount**	**Floating Interest Rate**	**Non Interest Bearing**	**Past Due Not Impaired**
Financial Assets					
2011					
Cash and cash equivalents	5.031%	9,308,082	9,307,995	87	-
Receivables		158,798	-	158,798	-
		9,466,880	9,307,995	158,885	-
2010					
Cash and cash equivalents	3.999%	8,227,738	8,227,407	331	-
Receivables		122,500	-	122,500	-
		8,350,238	8,227,407	122,831	-

(a) The amount of receivables excludes GST recoverable from the ATO (statutory receivable).

Liquidity risk

The following table details the contractual maturity analysis for financial liabilities. The table includes interest and principal cash flows. An adjustment has been made where material.

Interest rate exposure and maturity analysis of financial liabilities

		Interest Rate Exposure			
	Weighted Average Effective Interest Rate	**Carrying Amount**	**Floating Interest Rate**	**Non Interest Bearing**	**Maturity Dates Up to 3 Months**	**Maturity Dates 3-12 Months**
Financial Liabilities						
2011						
Payables		8,038,975		8,038,975	4,175,548	3,863,427
Other liabilities		112,738		112,738	112,738	-
		8,151,713	-	8,151,713	4,288,286	3,863,427
2010						
Payables		7,293,205		7,293,205	2,990,382	4,302,823
Other liabilities		27,811		27,811	27,811	-
		7,321,016	-	7,321,016	3,018,193	4,302,823

The amounts disclosed are the contractual undiscounted cash flows of each class of financial liabilities.

Interest rate sensitivity analysis

The following table represents a summary of the interest rate sensitivity of the Authority's financial assets and liabilities at the end of the reporting period on the surplus for the period and equity for a 1% change in interest rates. It is assumed that the change in interest rates is held constant throughout the reporting period.

		-100 basis points		**+100 basis points**	
	Carrying amount	Profit $	Equity $	Profit $	Equity $
2011					
Financial Assets					
Cash and cash equivalents	9,307,995	(93,080)	(93,080)	93,080	93,080
		(93,080)	(93,080)	93,080	93,080
2010					
Financial Assets					
Cash and cash equivalents	8,227,407	(82,274)	(82,274)	82,274	82,274
		(82,274)	(82,274)	82,274	82,274

Fair Values

All financial assets and liabilities recognised in the Statement of Financial Position, whether they are carried at cost or fair value, are recognised at amounts that represent a reasonable approximation of fair value unless otherwise stated in the applicable notes.

30 Remuneration of members of the Accountable Authority and senior officers

Remuneration of Members of the Accountable Authority

The number of members of the Accountable Authority whose total of fees, salaries, superannuation, non-monetary benefits and other benefits for the financial year, falls within the following bands:

	2011	2010	2011 $	2010 $
$0 - $10,000	11	11		
$10,001 - $20,000	-	2		
$20,001 - $30,000	1	-		
The total remuneration of the members of the Accountable Authority is:			65,465	72,522

The total remuneration includes the superannuation expense incurred by the Authority in respect of members of the Accountable Authority.

Remuneration of Senior Officers

The number of senior officers, other than senior officers reported as members of the Accountable Authority, whose total of fees, salaries, superannuation, non-monetary benefits and other benefits for the financial year, fall within the following bands are:

	2011	2010		
$70,001 - $80,000	1	-		
$110,001 - $120,000	1	1		
$120,001 - $130,000	1	1		
$130,001 - $140,000	1	1		
$150,001 - $160,000	1	1		
$170,001 - $180,000	1	1		
The total remuneration of senior officers is:			795,430	688,184

The total remuneration includes the superannuation expense incurred by the Authority in respect of senior officers other than senior officers reported as members of the Accountable Authority.
No senior officers are members of the Pension Scheme.

31 Remuneration of auditor

	2011 $	2010 $
Remuneration payable to the Auditor General for the financial year is as follows:		
Auditing of the accounts, financial statements and performance indicators.	33,500	40,000

32 Related bodies

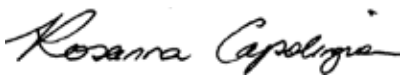
The Authority had no related bodies during the financial year.

33 Affiliated bodies

The Authority had no affiliated bodies during the financial year.

Certification of Performance Indicators

We hereby certify that the performance indicators are based on proper records, are relevant and appropriate for assisting users to assess the Western Australian Health Promotion Foundation's performance and fairly represent the performance of the Western Australian Health Promotion Foundation for the year ending 30 June 2011.



Rosanna Capolingua
Chairperson

Mr Cathcart Weatherly
Deputy Chairperson

22 July 2011

KEY OUTCOMES

Healthway's outcome is to increase individual knowledge and skills, and change behaviour and community and organisational policies and environments to improve health.

KEY EFFECTIVENESS INDICATORS

Healthway's effectiveness indicators report on distinct areas that measure the extent to which Healthway's key outcome has been met.

These indicators are as follows:

- extent to which funded organisations have met the requirements and objectives agreed to with Healthway (refer to contractual evaluation measure);
- extent to which sponsorship as a strategy contributes to health behaviour change (refer to Sponsorship Monitor Survey); and
- extent to which Healthway support has enabled capacity building activities in the community (refer to capacity building indicator).

Since 1992, quantitative evaluative data measuring the outcomes of Healthway funded projects have been extracted and reported by the Health Promotion Evaluation Unit (HPEU) which is an independent academic group based at The University of Western Australia.

Contractual Evaluation Measure

Extent to which funded organisations have met the requirements and objectives agreed to with Healthway

Healthway has adopted a six point scale under a Graduated Project Evaluation approach, developed through HPEU. Each project receives a score by Healthway upon the completion of the project as measured against a set of criteria and contractual obligations. These are then aggregated in the table below and reflected against respective program areas.

Grant and sponsorship recipients are required to complete statistical forms at the conclusion of each project. These are used as part of the project assessment, to arrive at a contractual evaluation measure. Other factors include assessment by Healthway Board members, Committee members and staff or by health agency representatives monitoring the respective grant or sponsorship.

Key to Scores

Score	Descriptive Interpretation	Notional number interpretation
6	The outcomes[1] of the project exceeded those required by the contract to a very substantial degree. The project delivered outstanding value for money.	150%+
5	The outcomes[1] of the project exceeded those required by the contract to a large degree. The project delivered excellent value for money.	120-149%
4	The outcomes[1] of the project were consistent with, or in the vicinity of, those required by the contract. The project delivered good value for money.	95-119%
3	The outcomes[1] of the project fell short of those required by the contract, but were still within the bounds of acceptability. The project delivered marginally adequate value for money.	75-94%
2	The outcomes[1] of the project fell well short of those required by the contract. The project delivered poor value for money.	50-74%
1	The outcomes[1] of the project fell short of those required by the contract to a very substantial degree. The project delivered completely unacceptable value for money.	<50%

[1] Reference to outcomes takes into account measures relating to educational strategies, population reach, contributions to increases in individual knowledge and skills and the extent to which organisations have implemented health policies and maintain a healthy environment. These contractual evaluation measures relate directly to Healthway's overall outcome.

Contractual Evaluation Measures of all Projects and Sponsorships

Contractual evaluation measure: Average contractual evaluation score (cf. Norm of 4.0)	2011/12 Target	2010/11 Actual	2009/10	2008/09	2007/08
Health Promotion Projects	4.0	4.1	3.9	4.1	3.9
Arts projects Sport projects Racing projects	4.0 4.0 4.0	4.1 3.9 4.1	4.0 3.9 4.1	4.0 4.0 4.0	4.1 3.9 4.0
Support Sponsorship	4.0	4.0	3.9	4.0	4.0

The contractual evaluation measures for 2010/11 are consistent with previous years and generally within the targets established for the period. The measures reflect that grant and sponsorship recipients continue to understand and meet Healthway's objectives and the requirements contained within grant and sponsorship agreements. From 1 July 2010, sponsorship reforms came into effect that introduced the implementation of minimum health promotion, structural and co-sponsorship requirements covering areas such as tobacco control, nutrition and alcohol. As these sponsorships reach evaluation stage, contractual evaluation scores are being monitored to assess the impact of these requirements on the organisations meeting their contractual obligations. The results are showing that organisations have been able to meet their contractual obligations.

Significant surveys conducted by HPEU in preceding years including the Organisational Survey completed in 2010, revealed that a high proportion of organisations reported a positive sponsorship relationship with Healthway, that Healthway's performance met their expectations and that Healthway's expectations of their organisation were reasonable. The implementation of health promotion programs was positively perceived by sponsored groups and health organisations. This survey confirms that organisations are continuing to work with Healthway in meeting their contractual obligations.

In the period ahead, Healthway will continue to support organisations to meet contractual obligations in a manner that will also help maintain health promotion outcomes beyond the terms of the contract.

Targets proposed for 2011/12 are consistent with prior years and also reflects the implementation of a sponsorship reforms. The targets for each sponsorship and grant program is set at an average of 4.0 acknowledging that projects are expected to meet the contracted obligations and provide good value for money. Healthway will also continue to work on strategies to raise the average scores of sponsored projects.

Sponsorship Monitor Survey

As part of their evaluation work, HPEU has developed a standard set of instruments and methodology, which have been published in the peer reviewed scientific literature,1 enabling them to undertake extensive audience surveys at Healthway sponsored events. These surveys, compiled over the course of a year are collectively known as the "Sponsorship Monitor" and measure the impact of health messages on audiences, including health message awareness, understanding of the message and intention to act on the message promoted at the event.

These studies confirm the effectiveness of sponsorship as a strategy to achieve high levels of awareness and comprehension of health messages at sport, arts or racing events. They also provide evidence that health sponsorship can lead to behaviour change.

Due to the complexity of the survey and the analysis required, these extensive surveys are generally undertaken every alternate year. On 1 July 2010, Healthway launched the new sponsorship program, which for the first time is segmented into message promotion, participation and structural reform sponsorships. The Sponsorship Monitor methodology was only designed to measure the impact of message promotion sponsorships. Future Organisational Surveys will measure the effectiveness of the participation and structural reform sponsorships, as well as new evaluation methods for these new sponsorships, to be developed in the 2011/12 year.

[2] Donovan R, Jalleh G, Clarkson J and Giles-Corti B. 1991. Evidence for the effectiveness of sponsorship as a health promotion tool. Australian Journal of Primary Health Interchange 5 (4) 81-91

Due to the changes to the Sponsorship Program introduced in 2010/11, the most recent Sponsorship Monitor, completed during 2010/11, involved a modified sampling methodology with a smaller number of sponsorship projects than in previous years. A total of six major sport, arts and racing projects was evaluated in the 2010/11 Sponsorship Monitor, and surveys were collected from 825 people aged over 15 years randomly selected across these projects. Previous Sponsorship Monitors have included samples of around 30 projects and between 2,000 and 3,000 people per study. It should be noted that larger samples generally provide more reliable estimates.

In the 2010/11 Sponsorship Monitor, 27% of respondents completed interviewer-administered questionnaires and 73% completed self-administered surveys. Despite the increasing clutter of other sponsors' messages at events, the results show that 59% of people who attended a Healthway sponsored event were aware of the health message being promoted at the event. Females and those aged 40 to 49 years, and aged 20 to 29 years were more likely to be aware of the health message than males and people in other age groups.

Extent to which sponsorship as a strategy contributes to health behaviour change

	2010/11 Target	2010/11 Actual	2008/09	2006/07	2004/05
% People attending Healthway sponsored events who were aware of the health message	74%	59%	74%	72%	67%
% People attending a Healthway sponsored event who correctly understood the health message	62%	49%	58%	65%	63%
% People who showed intention to act on health message	18%	14%	17%	21%	17%

The overall awareness levels are lower than those measured in previous years, as the table above shows. The lower awareness levels are in part due to the over-representation of self-administered surveys in the current Sponsorship Monitor, compared with previous Monitors. Surveys completed by patrons themselves collect less information than surveys completed by interviewers, and respondents are known to be less thorough in their responses. However this method is necessary at events where time limitations prevent the use of interviewer-administered methods. It should be noted that awareness levels achieved through self-administered surveys in the 2010/11 Sponsorship Monitor are similar to levels achieved from self-administered surveys in previous Sponsorship Monitors.

An important step in encouraging people to adopt healthier lifestyles is to ensure that they correctly understand the health messages promoted at events. The Sponsorship Monitor asks patrons about their understanding of the health message being promoted at the surveyed events. Note that only people who are aware of the message can be asked if they understand its meaning, and therefore the lower awareness levels measured in the 2010/11 Sponsorship Monitor also translate through to lower levels of comprehension or understanding compared with earlier years, at 49% of all patrons surveyed in 2010/11 (58% in 2008/09). It is important to stress however that comprehension among those people who were aware of message remained high.

As an indication of changing behaviours and habits, survey participants are asked about their intentions to act on the message. Again, only people who were aware of the message can be asked about their intentions, so again the proportion of the overall sample who indicated an intention to act on the message in the 2010/11 Sponsorship Monitor was slightly lower, at 14% of all respondents surveyed, compared with 17% in 2008/09. Again it should be stressed that among respondents who were aware, understood and agreed with the message, the level of intention was comparable with 2008/09.

The Sponsorship Monitor Surveys provide evidence over many years that a consistently high percentage of people attending events are aware of and understand the health promotion message promoted at Healthway-sponsored events, and process the information to the extent that they form an intention to act on the messages promoted.

Capacity Building

Extent to which Healthway support has enabled capacity building activities in the community

The Healthway Strategic Plan 2008-2011 places a priority on building and sustaining capacity of individuals, organisations and communities to promote and improve the health of Western Australians which is recognised in the two overarching themes being "sustainable change" and "investing in the future".

For Healthway, capacity building recognises the development of sustainable skills, structures, resources and commitment to embrace behavioural change that continues beyond the term of a project or program.

Healthway has identified four capacity building domains as follows:

1. Organisational commitment including policy changes;
2. Building partnerships and creating supportive environments;
3. Building health promotion skills and activities; and
4. Reaching new priority groups.

Key Performance Indicators continued

These domains form part of an extensive and comprehensive Organisational Survey conducted independently by the Health Promotion Evaluation Unit (HPEU) approximately every four years. Therefore to provide ongoing comparative data an abridged survey is conducted every two years as shown in Table A below. In view of the full Organisational survey undertaken during 2009/10 the next abridged survey will be undertaken in two years in 2011/12.

Table A below presents comparative data from the both surveys relating only to the responses of sport, arts and racing organisations (i.e. the impact of responses from health organisations has been removed from the Organisational Survey results in 2005/06).

The results in Table A show similar levels of capacity development amongst the sport, arts and racing organisations in the field study compared with those surveyed in 2005. The data indicate that Healthway had a strong influence in the large movement in the proportion of organisations that had increased organisational commitment to health and implemented health priorities. The 2007 data also provides evidence for the continued effects of Healthway on sponsored sport, art and racing organisations beyond the term of Healthway funding.

Table B below provides the results of the full set of data as collected in previous surveys. The 2009 Organisational Survey results in Table B indicate that capacity building measures/indicators relating to the implementation of health policies, health promotion skills and reaching new priority groups have generally increased compared with 2001/02 and maintained similar levels compared with 2004/05.

The targets established for 2009/10 are also included in Table B below. The results of the 2009 organisational survey showed that Healthway continued to have a strong influence across all four capacity building indicators, particularly in the "health promotion Skills/Activities dimension", which was higher than 2006 and 2007. "Building partnership and Environments" and "Reaching new target groups" were observed to show a high level of impact amongst funded organisations, which was similar to previous years.

Creating "organisational commitment/policy changes" remained high in 2009, but was lower than the previous survey conducted in 2007 which recorded a result of 82% compared to 75% in 2009. In part this reflects changes in the wording of the questions in the 2009 survey. However, a field study conducted by HPEU titled "Views of Sport, Arts and Racing Organisations on Healthway's Health Policy Requirements" reported that these sponsored groups have reported a number of challenges in developing, implementing and enforcing health policies. It is now envisaged that the streamlining of the sponsorship program going forward will help to reduce the overall burden of compliance on sponsored groups.

The overall trend of the data suggests that Healthway continues to invest in areas that are impactful on health promotion capacity building across the four broad dimensions measured. The results also suggest that organisations in receipt of Healthway funding are able to deliver on a range of activities that align with Healthway's stated capacity development objectives.

In view of the implementation of the Strategic Plan 2008-2011 it is also envisaged that a review of the questions and approach of the Organisational Survey will be undertaken by Healthway and HPEU during the year ahead. Accordingly there may be some revision of the capacity building indicators and measures in the future.

Table A

Abridged Survey	2007/08	2005/06
Surveyed projects (number)	112	462
% organisations implementing health policies and demonstrating commitment to health promotion	82	78
% organisations building partnerships and creating supportive environments	72	70
% organisations commitment to building and sustaining health promotion skills	64	65
% organisations reaching new priority groups	62	62

Table B

Full Organisational Survey	2009/10 Target	2009/10 Actual	2005/06	2004/05	2001/02	1997/98
Surveyed projects		302	462	220	672	616
% organisations implementing health policies and demonstrating commitment to health promotion	75	75	75	75	61	50
% organisations building partnerships and creating supportive environments	65	70	63	65	67	64
% organisations committed to building and sustaining health promotion skills	74	72	73	69	68	74
% organisations reaching new priority groups	69	64	69	70	66	57

Grants and Sponsorships

The efficiency indicator measures the average administrative cost for every $100 of approved funding for the WA community through the grant and sponsorship programs.

Administrative costs are apportioned between health promotion capacity building projects and grant and sponsorship activities. This apportionment is based on a methodology that involves detailed process mapping of organisation wide work flow analysis assessing the direct proportion of labour effort component for processing, assessing, monitoring and acquitting grants and sponsorships which is utilised as the basis for calculating this efficiency indicator.

The table below shows the movements in administrative corporate costs associated with planning, assessing, approval, monitoring and acquittal of grants and sponsorships. During 2010/11 the average administration cost per $100 of approved funding was calculated at $12.82, slightly higher than the target of $12.34. This mainly reflects slightly higher than anticipated administrative costs.

In 2011/12 the previously outsourced support sponsorship function will return to Healthway. This will result in an accounting change with the costs associated which with this function recorded against the corporate budget and not the support sponsorship budget. Accordingly, the support sponsorship budget will be reduced to offset the charges recorded against the corporate budget. As a consequence of this accounting change it is expected the average cost for every $100 approved for grants and sponsorships will increase to $15.42.

	2010/11 Target	2010/11 Actual	2009/10	2008/09	2007/08
	$	$	$	$	$
Average cost per $100 of approved funding	12.34	12.82	12.73	10.60	9.98

Capacity Building

Following the First International Conference on Health Promotion, the World Health Organisation released the Ottawa Charter which provided guiding principles for effective health promotion capacity building based on:

- Building health public policy;
- Creating supportive environments for sustainable change;
- Strengthening community action;
- Developing personal knowledge and skills;
- Promoting shared community and social responsibility for improving health;
- Developing, consolidating and expanding partnerships for health;
- Increasing the skills and resources of communities to promote healthy behaviours; and
- Empowering individuals to make informed decisions

Healthway has continued to apply these principles which were also further implemented as part of the sponsorship reforms undertaken in 2010.

As part of Healthway's capacity approach, it supports funding applicants through a number of mechanisms including pre-funding application meetings with organisations to outline health policy requirements and provide advice, monitor and assist funded organisation to achieve agreed capacity building outcomes and program specific workshops/seminars to encourage capacity building in funding applications.

Successful funding applications that contain a health promotion capacity building component are reflected in the indicator below as an average cost per application for Healthway support provided towards assisting recipients to implement and sustain capacity building. This indicator is calculated using a measure of the level of direct labour effort contributed to capacity building activities as a portion of total Healthway administrative costs and taking into account the number of capacity building applications for the year.

In 2010/11 amount invested in capacity building was consistent with the prior year, however the amount was allocated across a lower number of applications which has affected the average cost per application. Accordingly, the target in 2010/11 of an average administrative cost of $591 was exceeded to reach an average cost of $651.

In 2011/12 the average cost per capacity building project is expected to increase to $743 as a consequence of administrative costs associated with formerly outsourced functions returning in-house.

	2010/11 Target $	2010/11 Actual $	2009/10 Actual $	2008/09 Actual $	2007/08 Actual $
Average cost per $100 of approved funding	591	651	592	523	515

HEALTH PROMOTION GRANTS FUNDED IN 2010/2011
